

Reporting Test Results

- Standards test counts for 30% of student's final course grade.
- Standards test result must be indicated separately from final course grade on report card and in school file.
- For each school and school division, the Department prepares profiles using results from all completed scoring sheets.
- For each school division, the Department prepares a *Marking Accuracy and Consistency* report based on the re-marking of a sample of test booklets at the Department. Booklets are returned to schools and the report is sent to school divisions within three months of test administration.
