

# Reviewing Canadian Geography

*How many of these places can your group identify on the map of Canada?*

*Place two checkmarks for each place correctly identified without using the atlas, and one checkmark for each place identified using the atlas.*

- |                    |                                      |
|--------------------|--------------------------------------|
| Pacific Ocean      | Saskatchewan River (North and South) |
| Atlantic Ocean     | Fraser River                         |
| Arctic Ocean       | Great Slave Lake                     |
| Great Bear Lake    | Lake Superior                        |
| Peace River        | Lake Athabasca                       |
| Red River          | Rocky Mountains                      |
| Assiniboine River  | Columbia Mountains                   |
| Saguenay River     | Coast Mountains                      |
| Lake Michigan      | Appalachian Mountains                |
| Lake Huron         | Cape Breton Island                   |
| James Bay          | Prince Edward Island                 |
| Ottawa River       | Vancouver Island                     |
| Churchill River    | Mackenzie Mountains                  |
| Lake Winnipeg      | Laurentian Mountains                 |
| Mackenzie River    | Queen Charlotte Islands              |
| St. Lawrence River | Baffin Island                        |
| Lake Erie          | Quebec                               |
| Nelson River       | Ontario                              |
| Lake Ontario       | Rupert's Land                        |
| Georgian Bay       | Northwest Territories                |
| Hudson Bay         | Nunavut Territory                    |
| British Columbia   | Nova Scotia                          |
| Newfoundland       | Manitoba                             |
| New Brunswick      | Alberta                              |
|                    | Yukon Territory                      |

**Add the names of any cities you can locate that you learned about in Grade 5 when you studied Confederation:**
