

Mapping the Globe: Key Concepts

Use words and images to create a poster-size vocabulary cycle to explain the meaning of each of these terms and to show the relationship to other words in the list. Use sticky notes or cards to move the words around until you find an order that is clear and logical. Then, using point form and images, add the explanations of the links. Remember, each word must be linked to at least two other words! Be prepared to present your poster to other members of the class.
