<b>Open Forums</b>	4.0	3.9	4.0	(Based on 12 respondents)

### **COMMENTS**

#### **Special Tool Requirements/Various Topics (International)**

- Good presentation (1)
- Not many answers to problems presented (1)

#### **Diagnostic Tools & Emission Controls (Thomas)**

- Good presentation (1)
- "Good, but basic electrical knowledge."

#### **Safety Standards (MPI)**

- Good information presented (1)
- "Contractors should not be included in school division stats."
- Not much relevant information presented (1)

### **Importance of Proper Maintenance (PTU)**

- Good presentation (3)

### **Diagnostic & Maintenance Procedures (Cummins Engines)**

- Good speaker (1)
- Presentation similar to the Thomas presentation (1)

### **Biodiesel & Proper Use of Additives (Western Turbo)**

- Interesting information presented (1)
- "Infomercial"/presentation too company-oriented (2)

### **Open Forums**

- Not too many answers to questions presented (1)
- "More round table discussion could be helpful in problem solving."

### **General Comments**

- Generally good seminar/good information (5)
- Don't include emission reduction information in future seminars (2)
- Would like more information on anti-freeze test strips presented (1)
- Would like more detailed diagnostic information/hands-on troubleshooting (1)
- Presenters must stay away from the "sales pitch" (1)
