You will have access to your calculator for the first 45 minutes of the test.

## GENERAL DIRECTIONS

- Read all instructions carefully.
- The perforated pages can be removed from the test booklet. No marks will be given for work done on these pages.
- The blank pages at the back of each booklet may be used as scrap paper, but must not be removed from the test booklet. No marks will be given for work done on these pages.
- Note that diagrams and graphs provided in the test booklets may not be drawn to scale.
- After 45 minutes, put away your calculator. Even though you may not have finished Booklet 1, Booklet 2 will be distributed at this time. You may choose to continue working on Booklet 1 or start working on Booklet 2, but you will no longer have access to your calculator.

## Instructions

- There are 17 questions worth a total of 33 marks.
- Calculators (scientific or graphing) are allowed for the first 45 minutes of the test.
- A calculator icon $\because$ 㮶 $]$ appears next to the questions that require a calculator.
- Write each solution in the space provided.
- For full marks, your answers must show all pertinent diagrams, calculations, and explanations.
- Graphing calculator solutions must include an explanation of how your final answer is obtained.
- Your solutions should be neat, organized, and clear.
- Some answers are to be given as decimal values. Rounding too early in your solution may result in an inaccurate final answer for which full marks will not be given.
- Express your answers as exact values or correct to the nearest thousandth ( 3 decimal places) unless instructed otherwise.

## Terminology Sheet

Some questions may contain directing words such as explain, identify, and justify. These words are defined below.

Describe: Use words to provide the process or to report details of the response.
Determine: Use a mathematical formula, an algebraic equation, or a numerical calculation to solve a problem.

Evaluate: Find the numerical value.
Explain: Use words to provide the cause of or reason for the response, or to render the response more clear and understandable.

Identify/Indicate: Recognize and select the answer by stating or circling it.
Justify: Show reasons for or give facts that support a position by using mathematical computations, words, and/or diagrams.

Sketch the graph: Provide a detailed drawing with key features of the graph that includes a minimum of 2 coordinate points.

Solve: Give a solution for a problem or determine the value(s) of a variable.
State: Give an answer without an explanation or justification.
Verify: Establish the truth of a statement by substitution or comparison.

## Question 1 掄

A section of a car windshield is cleaned by a wiper as shown in the diagram below. The arm of the wiper is 22 inches, and it rotates through a central angle of $132^{\circ}$. Determine the length of the arc that is created by the tip of the wiper.

## Question 2 (4im

There are 20 boys and 11 girls who can be selected to be on a team.
Determine the number of ways that 7 boys and 5 girls can be selected for this team.

## Question 3

A water filtration system which removes impurities from a sample of water can be modelled by $P=0.25(0.55)^{n}$, where:
$P=$ the percentage of impurities remaining, in decimal form
$n=$ the number of filters
Determine, algebraically, how many filters are required so that less than $1 \%$ of the impurities remain in the water sample. Express your answer as a whole number.

## Question 4 阴

In the binomial expansion of $\left(x^{2}-\frac{2}{y}\right)^{8}$, determine the middle term in simplified form.
