

The following assessment tool appears at the **end of every cluster**:

- **Connecting and Reflecting:** Every cluster ends with an assessment activity entitled *Connecting and Reflecting*. During this activity, students review their cluster portfolio selections to synthesize their learnings throughout the cluster, and reflect on the implications of those learnings in their daily lives as citizens of their school, their local community, of Canada, or the world. This end-of-cluster activity is an important culminating step. It provides information to both teachers and students about student achievement regarding the essential ideas and understandings of the cluster.

DOCUMENT COMPONENTS AND STRUCTURE

Conceptual Map

The student learning outcomes presented in this document address the four foundation skill areas and nine essential elements common to all Manitoba curricula. The following conceptual map illustrates the foundation skill areas, essential elements, and other key components upon which the Manitoba social studies curriculum is based.

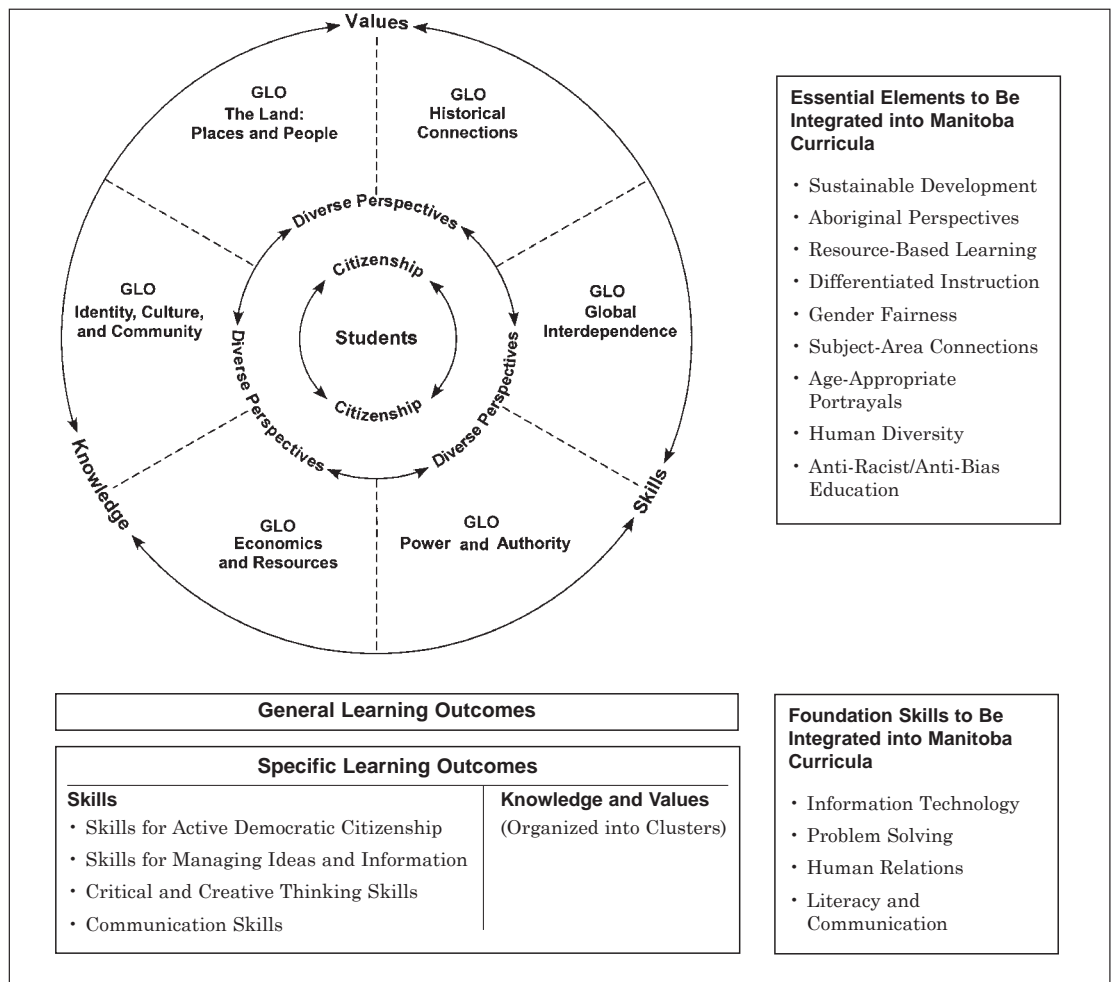

Figure 4: Conceptual Map

DOCUMENT COMPONENTS

Core Concept

As illustrated in the preceding Conceptual Map, the core concept of citizenship provides a focus for social studies learning at all grades. Citizenship knowledge, values, and skills learning outcomes are included in each grade. (See page 6.)

Diverse Perspectives

The concept of diversity is integrated throughout the social studies curriculum. Knowledge and values learning outcomes are inclusive of diverse perspectives, and encourage critical consideration of differing viewpoints as students engage in purposeful dialogue with others.

General and Specific Learning Outcomes

This document contains both general and specific learning outcomes. The **general learning outcomes** are broad statements that provide a conceptual structure for social studies, and are the basis for the specific learning outcomes in each grade. **Specific learning outcomes** are statements that describe the **skills, knowledge, and values** that students are expected to achieve in each grade. These three types of specific learning outcomes are interdependent and are intended to be integrated throughout the social studies learning process.

The six general learning outcomes (see page 9), which are the basis for the specific learning outcomes in each grade, are:

- **Identity, Culture, and Community:** Students will explore concepts of identity, culture, and community in relation to individuals, societies, and nations.
- **The Land: Places and People:** Students will explore the dynamic relationships of people with the land, places, and environments.
- **Historical Connections:** Students will explore how people, events, and ideas of the past shape the present and influence the future.
- **Global Interdependence:** Students will explore the global interdependence of people, communities, societies, nations, and environments.
- **Power and Authority:** Students will explore the processes and structures of power and authority, and their implications for individuals, relationships, communities, and nations.
- **Economics and Resources:** Students will explore the distribution of resources and wealth in relation to individuals, communities, and nations.

Skills Learning Outcomes

Social studies involves the development of discipline-related skills, including inquiry and research skills and methods, historical thinking, and geographic thinking. Social studies provides students with opportunities to refine the skills and competencies developed in other subject areas, such as skills in communication and media literacy, collaboration and cooperation, critical and creative thinking, problem solving, and decision making. As students apply these skills to complex social studies problems that may or may not have solutions, they develop competencies integral to active democratic citizenship.

Skills learning outcomes (see page 12) are organized into four categories:

- Skills for Active Democratic Citizenship
- Skills for Managing Information and Ideas
- Critical and Creative Thinking Skills
- Communication Skills

In this document, a list of grade-specific skills appears at the beginning of the grade description. The skills are also integrated in each learning activity in every grade.

A continuum of social studies skills for Kindergarten to Grade 4 is found in Appendix E.

Knowledge and Values Learning Outcomes

Knowledge learning outcomes and values learning outcomes are intended to complement one another. Both are presented under each of the six general learning outcomes at the beginning of a grade, and are also grouped according to essential ideas within the learning experiences.

Distinctive Learning Outcomes

Some specific learning outcomes are designated as distinctive learning outcomes for Aboriginal (First Nations, Inuit, and Métis) or francophone students. Distinctive learning outcomes complement the specific learning outcomes. They are intended to enhance the development of language, identity, culture, and community for Aboriginal and francophone students.

- Distinctive learning outcomes for **Aboriginal students** are intended for First Nations, Inuit, or Métis students in educational settings that include locally controlled First Nations schools, or settings where there are Aboriginal students, and where the school or school division has agreed that the distinctive learning outcomes be addressed. It is advisable that teachers selected to address the distinctive learning outcomes have a background in Aboriginal culture.
- Distinctive learning outcomes for **francophone students** are intended for students enrolled in schools where francophone programming has been developed within the context of Section 23 of the *Charter of Rights and Freedoms*.

DOCUMENT STRUCTURE

This document contains the following components:

- **Grade Overview:** A brief description of the content and focus of a given grade is presented in the grade overview.
- **Cluster Descriptions:** The knowledge and values learning outcomes are organized into thematic groups referred to as clusters. The focus of each cluster is briefly described in the cluster descriptor.
- **Specific Learning Outcomes:** Skills, knowledge, and values specific learning outcomes are presented in the following order:
 - **Skills:** The skills learning outcomes are organized in four categories, and intended to be integrated through each cluster.

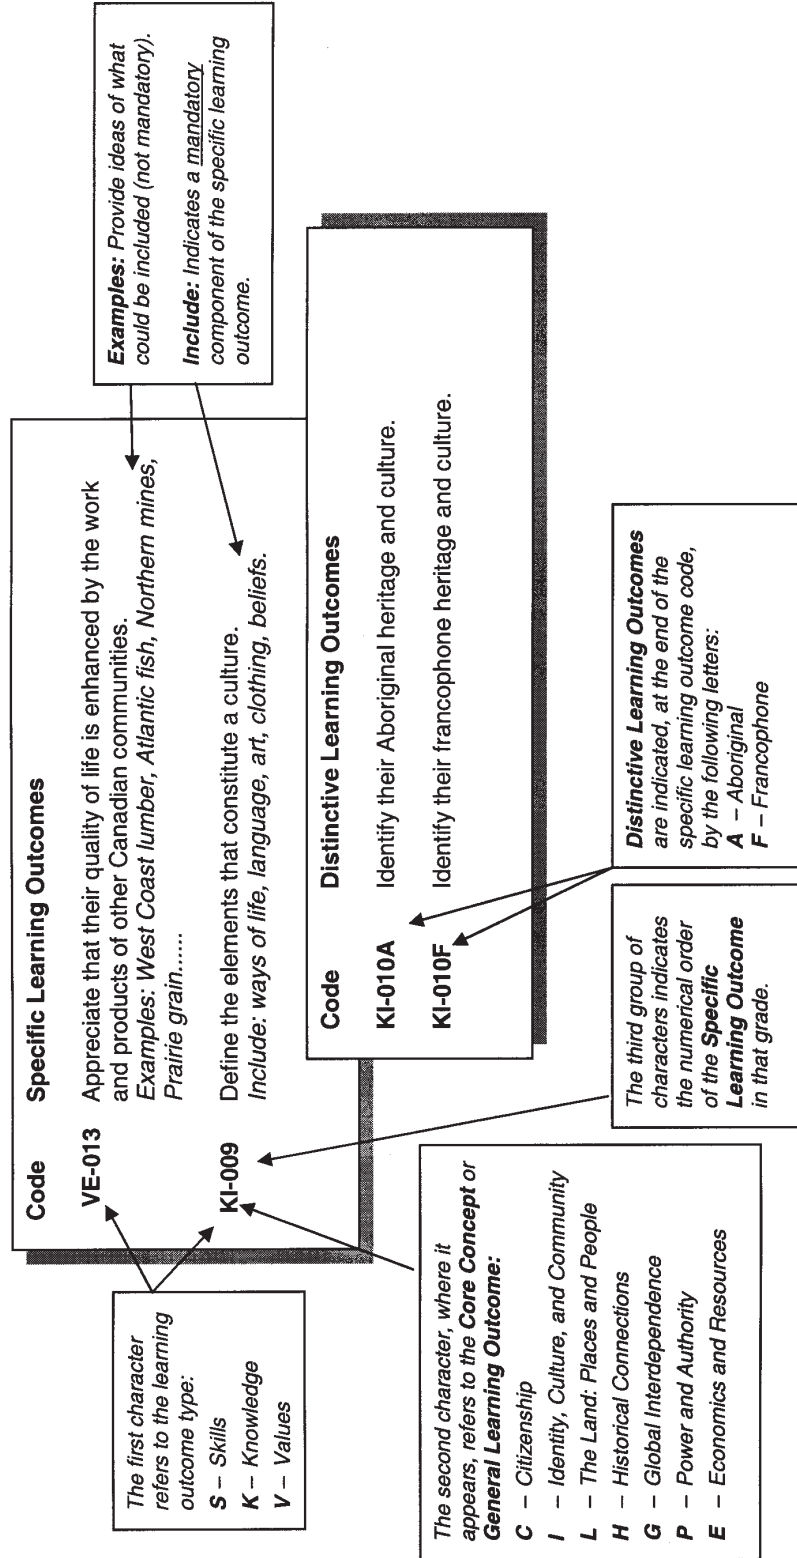

Overview

- **Knowledge and Values:** The knowledge and values specific learning outcomes are presented under the Core Concept: Citizenship, and under each of the six general learning outcomes.
- **Cluster/Learning Experiences Overview:** The knowledge and values learning outcomes within each cluster have been divided into smaller groups of related outcomes, referred to as learning experiences. The overview page presents each learning experience with the related knowledge and values learning outcomes.
- **Learning Experiences:** Each learning experience provides a series of activating, acquiring, and applying strategies to address related knowledge and values learning outcomes, and contains the following components:
 - **Skills Progress Chart** (teacher tracking tool)
 - **Student Portfolio Tracking Chart** (student tool)
 - **Engaging Students in the Cluster** (strategies to activate the cluster)
 - **Skills Set** (an icon indicating the skills targeted in the learning activity)
 - **Suggested Student Portfolio Selections** (an icon indicating that a strategy may result in the creation of products, processes, or performances for inclusion in student portfolios)
 - **Knowledge and Values Learning Outcomes** (targeted outcomes)
 - **Description of the Learning Experience**
 - **Vocabulary List**
 - **Connecting and Reflecting** (end-of-cluster summative assessment activity)

2.3.2 Historical Influences

Assessment	Outcomes	Strategies
 Appendix A Skill 4	KH-029 KH-030	Activate Using maps, atlases, and globes, collaborative groups of students list various place names in Canada. Students sort the place names according to student-determined criteria and predict the origins of various names. Students discuss the origins of place names (e.g., historical, cultural, geographic...), and identify examples from their list that represent each category. Students share examples with peers.
 Appendix A Skill 6e	KH-029 KH-030	On a community walk, students list various place names (e.g., streets, buildings, parks...). Students speculate and discuss ways in which place names are determined.
