INTRODUCTION

Purpose

The purpose of the *Subject Table Handbook: Technology Education* is to support schools in the 2021/2022 school year by

- providing basic information to schools for entering student records into the Student Records system (SRS)
- providing subject computer codes for courses developed by Manitoba Education and for those approved or registered by the department

A new edition of the *Subject Table Handbook: Technology Education* is provided for each school year. It reflects changes to course codes, credits, et cetera, that apply for the upcoming school year. Schools are responsible for ensuring that they are using the appropriate edition of the *Handbook* when reporting student high school (Senior Years) marks to Education Administration Services. **Note that schools must use the September 2020 to August 2021** *Subject Table Handbook* for reporting 2020/2021 student marks in the summer and fall of 2021.

This edition of the *Subject Table Handbook: Technology Education* is in effect from September 1, 2021, to August 31, 2022, and is available online at <u>www.edu.gov.mb.ca/k12/docs/policy/sthte/index.html</u>. Placing the *Handbook* online provides information about course codes, levels, and credits to accommodate schools in setting up their registrations and course offerings for the next school year. Some changes may occur over the 2021/2022 school year as new curricula are released. The online content will be updated several times during the year, but schools should exercise some caution when setting up their course codes.

Senior Years Credit System

The Senior Years (Grade 9 to Grade 12) credit system provides flexibility to enable students to pursue Senior Years courses best suited to their individual requirements and aspirations. Students may earn *one credit* by undertaking and successfully completing a course of study designed for a minimum of 110 hours of instruction. *Half credits* (courses designed for a minimum of 55 hours of instruction) may be earned in like manner. There are two categories of credits: compulsory and optional.

Graduation Requirements for the Senior Years Technology Education Program

To receive a Senior Years Technology Education diploma, a student must complete eight departmentally developed courses from an approved technical-vocational or applied commerce education cluster, together with 17 compulsory credits and five optional credits.

Exploration credits at the Grade 9 level can be used to complement one or more TVE clusters, but do not count toward the requirements of the Senior Years Technology Education (SYTEP) diploma. In the listing of TVE courses beginning on page 22, courses shaded in blue count toward a SYTEP diploma.

Graduation Requirements for the Senior Years Technology Education Program						
Diploma Requirements Credits Required for Graduation						
Compulsory Credits	17					
English language arts (1 credit per grade)	4					
mathematics (1 credit per grade)	4					
physical education/health education (1 credit per grade)	4					
social studies (1 credit in each of Grades 9, 10, and 11)	3					
science (1 credit in each of Grades 9 and 10)	2					
Approved Cluster of Technology Education Credits 8 to 12						
Optional Credits 1 to 5						
Totals	30					

Please see www.edu.gov.mb.ca/k12/policy/grad_require.html for more information.

Senior Years Course Identification

Course Numbering

The present course numbering system comprises a three-character, alpha-numeric code. The first and second characters are numerals, while the third is a letter.

First Character

- 1 for courses developed for Grade 9
- 2 for courses developed for Grade 10
- 3 for courses developed for Grade 11
- 4 for courses developed for Grade 12

Second Character

- 0 developed by Manitoba Education for one credit
- 5 developed by Manitoba Education for one-half credit
- developed by schools or school divisions and registered by Manitoba Education (includes SICs and SIPs)
- 2 externally developed by an educational authority and, in the case of dual credit, a post-secondary institution (e.g., university, out-of-country)

Third Character

- G General
- F Foundation
- S Specialized
- E EAL
- M Modified
- I Individualized
- C College-based
- U University-based

Course Designations

Foundation (F):

Educational experiences that are broadly based and appropriate for all students and that may lead to further studies beyond the Senior Years (e.g. apprenticeship, college, and university). When a subject area is compulsory for graduation and there is only one course option, the designation will be F.

General (G):

General educational experiences for all students. Industrial arts courses may be identified as General (G) or Specialized (S) at the Grade 11 and Grade 12 levels.

Specialized (S):

Educational experiences in specialized areas leading to further studies beyond the Senior Years (e.g., apprenticeship, college, and university). Applied commerce education courses at Grades 10 to 12 and technical-vocational courses at Grades 9 to 12 are designated as Specialized.

EAL (E):

Educational experiences designed to focus on English as an additional language (EAL) learning goals in the context of the subject area, based on the student's assessed level of EAL proficiency, and to assist the student in making the transition into regular Senior Years programming in this content area. An EAL individual educational plan (EAL-IEP) is required for each student.

Modified (M):

Educational experiences intended for students with significant cognitive disabilities and where the provincial subject area curriculum outcomes have been modified to take into account the learning requirements of a student; an individual education plan (IEP) is required for each student.

Individualized (I):

Educational experiences intended for students with significant cognitive disabilities and that are developmentally and age appropriate and highly individualized to take into account the learning requirements of the student; an individual education plan (IEP) is required for each student.

Note: Students in individualized programming do not use Manitoba Education curricula. The designation indicates student participation in individualized programming. For example, 111 indicates year one of student participation in locally developed programming individualized for the student; 711 indicates year seven of such participation.

College-based (C):

Post-secondary courses that can be recognized for dual credit at the Grade 12 level (and in some cases, at the Grade 11 level) and also for the first year of college. These courses count towards fulfilling the credit requirements for high school graduation.

University-based (U):

Post-secondary courses that can be recognized for dual credit at the Grade 12 level and also for the first year of university. These courses count towards fulfilling the credit requirements for high school graduation.

Partnerships:

Some technical-vocational programming may be offered in partnership with postsecondary institutions. Schools are required to request approval from Manitoba Education to ensure proper course codes, agreements, and teaching credentials are in place.

Course Levels

Grade 9:

All subject area curricula, except technical vocational, will be developed as foundation courses. Some technology education curricula may be developed as specialized courses. The Foundation (F) course designation will replace the General (G) course designation as new curricula come into effect.

Grade 10:

As new curricula are introduced, all subject area curricula, except technical vocational and mathematics, will be developed as Foundation (F) courses. Some curricula for technology education and mathematics may be developed as Specialized (S) courses.

Grade 11:

As new curricula are introduced, a variety of subject area curricula will be developed for different purposes, including a range of Foundation (F) and Specialized (S) courses.

Grade 12:

As new curricula are introduced, a variety of subject area curricula will be developed for different purposes, including a range of Foundation (F) and Specialized (S) courses. Courses that qualify for a U designation are first-year University courses. Those that qualify for a C designation are first-year College courses.

Note: From Grades 9 to 12, a particular Foundation, General, and/or Specialized subject area curriculum can be altered on an individual basis via a student's individual education plan following departmental requirements. The E or M course designation then applies.

No departmental regulation will prevent a student from taking a designated course in one Senior Years grade and then switching to a different designation in a later grade. For example, a student who receives an M designation for Grade 9 Science (10M) could subsequently take Grade 10 Science (20F). Similarly, a student receiving an E designation for Grade 10 Science (20E) could subsequently take Grade 11 Chemistry (30S).

Examples:

Grade 9 Exploration of Electronics Technology (10S)

Grade 9, developed or approved by Manitoba Education for one credit, Specialized course.

Grade 9 Exploration of Technical-Vocational Education (15S)

Grade 9, developed or approved by Manitoba Education for one-half credit, Specialized course.

Grade 9 Family Studies (15M)

Grade 9, developed or approved by Manitoba Education for one-half credit, modified in curriculum goals and objectives or outcomes to accommodate a student with significant cognitive disabilities according to the individual education plan (IEP).

Grade 10 Textile Arts and Design (25S)

Grade 10, developed or approved by Manitoba Education for one-half credit, Specialized course.

Grade 11 Metalwork Technology (30G)

Grade 11, developed or approved by Manitoba Education for one credit, General course.

Calculus (1103/4) (42C)

Grade 12, a first-year college-level course for dual credit, developed by a college and approved by Manitoba Education for one-half credit, College-based course.

Introduction to Sociology (077.120) (42U)

Grade 12, a first-year university-level course for dual credit, developed by a university and approved by Manitoba Education for one credit, University-based course.

Granting Other Credits for Senior Years

Challenge for Credit

The Challenge for Credit Option offers students the opportunity to apply prior knowledge in a particular subject area by demonstrating achievement in the learning outcomes of that course/speciality and receiving credit for it. For information on the Challenge for Credit Option refer to <u>www.edu.gov.mb.ca/k12/policy/gradreq/alt_credits.html</u>.

Community Service Student-Initiated Project (CSSIP)

Students may earn one Community Service credit (in the form of a SIP) within the 30 credits for graduation. These SIPs consisting of volunteer service are not to be registered with the department. A Community Service SIP course code (8977) is available. Guidelines for this SIP are available at <u>www.edu.gov.mb.ca/k12/docs/support/ldc/index.html</u>.

Cultural Exploration Student-Initiated Project (CESIP)

Students can gain valuable educational experience by enhancing their knowledge of their own cultural origins or a cultural group that interests them through interaction with community members such as Elders and members of cultural organizations. The skills, knowledge, and attitudes obtained from such activities can increase a student's self-esteem and maturity, strengthen cultural identity, and/or provide greater intercultural understanding and an appreciation of cultural diversity. One credit may be available to a student who participates in such activity in the Senior Years for graduation purposes. CESIPs do not require departmental registration. Additional information is available at www.edu.gov.mb.ca/k12/policy/gradreq/docs/culture_guidelines.pdf.

Distance Learning Courses

Students may take compulsory or optional courses in either print or online format, including courses delivered from outside the province. Additional information about distance learning courses is available at www.edu.gov.mb.ca/kl2/dl/index.html.

In-Province Courses: The course codes for in-province compulsory and optional distance learning courses that are based on department curricula are the same codes that are used for in-class instruction (e.g., 0092 ELA: A Comprehensive Focus 40S).

Out-of-Province Courses: The distance learning optional courses delivered by an outof-province educational authority are the same as those for any non-Manitoba credits. See <u>www.edu.gov.mb.ca/k12/docs/policy/op_credits/index.html</u> for information on granting non-Manitoba credits.

Recognizing Post-Secondary Courses for Dual Credit

Post-secondary courses can be offered to students while they are attending high school or an adult learning centre. Upon the successful completion of a post-secondary course, a student earns a post-secondary credit that counts towards fulfilling the credit requirements for high school graduation. Final grades are reported on the provincial report card as Complete or Incomplete, and upon successful completion, reported to the department as Standing ("S"). For more information, see www.edu.gov.mb.ca/k12/policy/gradreq/alt_credits.html.

School-Initiated Courses (SICs) and Student-Initiated Projects (SIPs)

Information about school-initiated courses (SICs) and student-initiated projects (SIPs) is available at <u>www.edu.gov.mb.ca/k12/docs/support/ldc/</u>. The most current information on registration procedures is found there.

Special Language Credit Option

This credit option provides for the recognition of Manitoba's linguistic diversity. Students proficient in languages other than English or French are eligible. Only one special language credit may be earned at each of the Senior Years. Student marks can be reported as a percentage mark; however, "S" for "Standing" may be used for granting additional/prior credit(s). For further information refer to <u>www.edu.gov.mb.ca/k12/</u><u>docs/policy/lancredits/index.html</u>.

Substitution of Credits in Unusual Situations

In exceptional circumstances, and in discussion with parents, a school administrator may approve the substitution of an optional course for a compulsory course. Substitution of credit is permitted for any compulsory subject. School divisions/schools can decide whether to allow substitution of credits. A maximum of two substitute credits may be used toward high school graduation. If a course is substituted for another, the school must report the substitution to Education Administration Services and note the substitution on the student's transcript and report card. See <u>www.edu.gov.mb.ca/k12/</u> <u>policy/gradreq/docs/substitution_credits_policy.pdf</u> for the policy and <u>www.edu.gov.mb.ca/k12/policy/gradreq/docs/substitution_form.pdf</u> for the reporting form.

Technology Education—Program Groupings

The *Subject Table Handbook: Technology Education* divides available courses into the following groups. Each program group may be eligible for program cluster funding, and each course or unit in the cluster may be eligible for unit-credit funding, as outlined in the *Funding of Schools* document found at <u>www.edu.gov.mb.ca/k12/finance/schfund/</u> <u>index.html</u>. Please see listings of groups, program clusters, and unit-credit titles starting on page 11 of this Introduction.

Applied Commerce Education

Applied commerce education (ACE) courses are eligible for program support when a series of eight courses are offered and all eligibility requirements are met. See note on page 11.

Human Ecology

Senior Years human ecology curricula provide full and half credits in the areas of food and nutrition, textile arts and design, environmental design, and family studies. Fullcredit courses are available in human ecology (made up of one-third food and nutrition, one-third textile arts and design, and one-third family studies learning outcomes) and in Grade 12 Applied Family Studies. All Senior Years courses are eligible for unit-credit funding. Details are found on page 11.

Industrial Arts

The Senior Years curricula for industrial arts were originally prepared for Grades 10 to 12. Half-credit versions of the Grades 9 and 10 curricula have been identified for those schools that prefer to provide half-credits; however, students may only earn either a half or a full credit at each grade level within the same subject area. Grade 9 programming is derived from the existing middle years/junior high curriculum for Grade 9. New course titles have been identified for the industrial arts unit-credits. All Senior Years courses are eligible for unit-credit funding. Details are found on page 12.

Technical-Vocational Education

An approved technical-vocational education (TVE) program cluster comprises departmentally developed and/or approved courses in one specific trade or trained occupation that facilitates the transition from school to either post-secondary training (such as the training provided through Apprenticeship Manitoba) or entry into the workforce (often at an entry-level position). The TVE implementation model provides credits from Grades 9 to 12; however, only the courses developed for Grades 10 to 12 form the specific cluster foundation and may qualify for the Senior Years Technology Education Program (SYTEP) diploma and TVE program funding. (These are shaded in the course listing starting on page 25.)

Manitoba Education is mandated to determine the number of courses in each subject area. TVE courses are required to meet specific outcomes and hours for certifications, articulation agreements, and various credentialing opportunities. The number of courses may vary by cluster, but students who are seeking the SYTEP diploma must complete all of the Grades 10 to 12 courses for that specific cluster.

Clusters generally include an optional exploration course in Grade 9, which can be taught as a full or half-credit course. Additionally, schools can teach "Exploration of Technical-Vocational Education" as part of any TVE subject area. It allows students to explore any number of trades and/or trained occupations.

School divisions/districts are eligible for a categorical grant of \$5,500.00 per approved Senior Years Technology Education Program cluster as well as unit-credit support based on approved courses within Category I (\$165.00 per pupil credit) and Category II (\$55.00 per pupil credit). See page 13.

For more information, please refer to the *Technical-Vocational Education Overview* document www.edu.gov.mb.ca/k12/cur/teched/sytep/docs/tve_overview.pdf.

High School Apprenticeship Program

The High School Apprenticeship Program (HSAP) falls within the Senior Years Technology Education Program. In Manitoba, apprenticeship training, including HSAP, is administered by Apprenticeship Manitoba. Apprenticeship is a training relationship involving a trainee (known as an apprentice), an employer, and Apprenticeship Manitoba. An employer hires an apprentice to meet an existing or projected skill need. A contractual arrangement, known as indenturement, is established among the employer, the apprentice, and Apprenticeship Manitoba. Students can receive up to eight credits from HSAP towards graduation. See page 13.

Program and Unit-Credit Categories

The program and unit-credit categories are listed under each program group and list category titles for each program cluster of courses. This is a method for categorizing the programs and unit-credit titles that is linked to the appropriate categorical funding. For more information on the criteria required for categorical program funding and unit-credit funding, please see www.edu.gov.mb.ca/k12/finance/schfund/index.html.

Applied Commerce Education

This group is eligible for program funding only. See page 16 for the Applied Commerce Education codes.

Human Ecology

This group of courses are eligible for unit-credit funding only.

TECHNOLOGY EDUCATION

Applied Commerce Education (home page)

Applied commerce education (ACE) consists of an optional cluster of courses for high school students interested in pursuing a future career in a commerce-related field such as economics, entrepreneurship, business, marketing, technology, or finance. Each of the individual courses is also an excellent option for any student wanting to understand more about their role in our global economy. The 14 course offerings in the applied commerce area allow students to develop the skills needed to be effective business leaders, innovators, citizens, consumers, and employees.

Teacher Education Qualifications and Certifications

Recommended qualifications for this discipline are those of certified teachers that have completed a Bachelor of Education with a major in Business Education. This Bachelor of Education degree is available through a joint program with Red River College and the University of Winnipeg Bachelor of Education degree program (www.rrc.ca/education/business-education/).

It should be noted that teachers who hold a Bachelor of Education with a major in Business Education do *not* have the required qualifications to teach a technical-vocational cluster.

Applied Commerce Education (continued) (home page)

Human Ecology Education (home page)

Human ecology courses provide an interdisciplinary approach that integrates social and physical science theory and action through the study of everyday living. Areas of study consist of human ecology, family studies, food and nutrition, textile art and design, clothing and textiles, environmental design, and applied family studies.

Teacher Education Qualifications and Certifications

Recommended qualifications for this discipline are those of certified teachers that have completed a Bachelor of Education with a teachable major or minor in Human Ecology by completing one of the following undergraduate degree programs qualifying for entry into their two-year after degree Bachelor of Education program: Bachelor of Health Studies (B.H.St.), Bachelor of Science in Human Nutritional Sciences (B.Sc.), or Bachelor of Environmental Design (B.Env.D.). These undergraduate degrees are available at the University of Manitoba.

Additional recommendations include the following:

- specialized studies from an undergraduate degree program or additional postsecondary/professional development coursework from Health Promotion and Education, Family Health, Human Nutritional Sciences, Environmental Design, and Textiles/Clothing and Design
- a Bachelor of Education with a teachable major or minor in Human Ecology, and the former Bachelor of Human Ecology/Home Economics (B.H.Ec.) or Bachelor of Human Ecology in Family Social Sciences (B.H.Ecol—Family Social Sciences)

It should be noted that teachers who hold a Bachelor of Education with a major in Human Ecology do *not* have the required qualifications to teach a technicalvocational cluster.

Industrial Arts Education (home page)

Industrial arts programming provides the opportunity to actively learn in a hands-on environment with technological tools, equipment, materials, and processes to transform concepts and ideas into goods and services. Areas of study consist of manufacturing, graphic communications, power and energy, construction, drafting design, electricity/ electronics, graphic communication, metalwork, power mechanics, and woodwork.

Teacher Education Qualifications and Certifications

Recommended qualifications for this discipline are those of certified teachers that have completed a Bachelor of Education with a major in Industrial Arts. This Bachelor of Education degree is available through a joint program with Red River College and the University of Winnipeg Bachelor of Education degree program (www.rrc.ca/education/industrial-arts/).

It should be noted that teachers who hold a Bachelor of Education with a major in Industrial Arts do *not* have the required qualifications to teach a technical-vocational cluster.

Technical-Vocational Education (home page)

Technical-vocational education (TVE) provides students with the skills and competencies needed to successfully transition into the workplace, apprenticeship opportunities, post-secondary education, and their daily lives. It also allows students to explore, sample, specialize, and transition into a designated or non-designated trade or occupation. This pathway provides students with skills to enter the world of work or continue in further post-secondary education. Students who complete the cluster of courses in a designated stream may be eligible for the Senior Years Technology Education Program Diploma and/or advanced standing in a post-secondary program.

Teacher Education Qualifications and Certifications

Manitoba Education requires all TVE courses to be taught by persons who hold the permanent Technical Vocational Teaching Certificate. Qualifications for this teaching certificate are set out in the Teaching Certificates and Qualifications Regulation 115/2015. It entitles one to teach TVE courses from Grades 9 to 12. Certification qualifications include the following:

- 1. A Technical Vocational Teacher Education diploma consisting of at least 90 credit hours of which at least 45 credit hours were professional course work including at least 18 weeks of student teaching. Information on acquiring the Technical Vocational Teacher Education certification is available at <u>www.rrc.ca/education/</u> <u>technical-vocational/</u>. *Please note that teachers who hold a permanent Technical Vocational Teaching Certificate can only teach in their industry-certified specialty area (designated or non-designated trade)*.
- 2. Industry certification (trained journeyperson status or industry-specific certification), including having experience working in that industry, or designated or non-designated trade (trained occupation) as outlined in the following:

A. Designated Trades with Red Seal Certification

(TVE programs: Automotive Technology, Baking and Pastry Arts, Cabinet and Furniture Making, Carpentry, Collision Repair and Refinishing Technology, Culinary Arts, Electrical Trades Technology, Esthetics, Hairstyling, Heavy Duty Equipment Technician, Horticulture, Machining Technology, Plumbing and Pipe Trades, Refrigeration and Air Conditioning, Welding Technology)

- a certificate of qualification (journeyperson's certificate or equivalent to a Manitoba trade-specific credential as determined by Apprenticeship Manitoba)
- two years of approved trade experience from the documented date of receiving the approved trade credential
- the Red Seal endorsement

OR

B. Other Designated Trades

(TVE program: Aircraft Maintenance Technology)

- a certificate of qualification (journeyperson's certificate or equivalent to a Manitoba trade-specific credential as determined by Apprenticeship Manitoba)
- two years of approved trade experience from the documented date of receiving the approved trade credential

OR

C. Non-designated Trades

(TVE programs: Aviation Ground School, Aviation and Aerospace Technologies, Broadcast Media Technology, Dental Assisting, Dental Technology, Early Childhood Education, Electronics Technology, Fashion Design and Technology, Graphic Design, Health Care Aide, Hotel Hospitality, Interactive Digital Media, Jewellery and Metalsmithing, Mining Engineering Technology, Motion Picture Arts, Networking and Cyber Security, Photography, Print Media, Resources and Environmental Management, Sound Engineering, Sustainable Energy)

- at least one year of formal training (can be included in the six years of work experience)
- at least six years of approved work experience including two years under the supervision of a person who holds an approved credential or has approved training in the trade

Persons who hold the permanent Technical Vocational Teaching Certificate may go on to qualify for a Bachelor of Education entitling them to teach from Kindergarten to Grade 12 with a major in vocational education. The Technical Vocational Teacher Education diploma program makes up the first three years of the five-year joint RRC-University of Winnipeg Bachelor of Education Degree. The fourth and fifth years are taught at the University of Winnipeg.

In the following charts, the shaded course listings form the foundation of each cluster and qualify for the SYTEP diploma and TVE program funding.
