TBLM ICT.9#3: Sample URL Database

Note: This URL database is best created using a spreadsheet (see ICT.12: Chart This).

Preparation and Set-up
- Brainstorm a list of possible search terms.
- Ensure that all search terms are spelled accurately, and that the spelling is consistent throughout.
- The database can be sorted by subject. If more than one subject applies, make another identical entry with the other subject.
- Favourite websites can be listed on the class website, by subject, each with the title, URL, and a short review.
