

**employable**

As you develop the skills to help you succeed in your field of interest, you will also learn what the working world is really like. Better still, you will make valuable contacts in your work experience that will help you in your job search.

“A local tv channel saw the work I did and requested an interview. I started the next day.”

**craig guiboche** |  
tv + radio broadcasting

**excitement**

“My grandfather was a welder. I see no reason why this should be a man’s job. Anybody can do it.”

**shylite witwicki** |  
welder

Building for the Future

# education

What do you want from life beyond high school? An interesting job with a promising future? A chance to develop employable talents in an area of personal interest?

Technical vocational education could be your answer.

Many schools and colleges in Manitoba offer exciting opportunities through technical vocational programs. Learn valuable job skills, develop a hidden talent or explore your interests through hands-on training: all while earning your high school diploma.

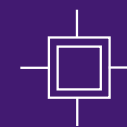

"I chose this program because there are just so many opportunities once you get your certificate. It's exciting. I'd like to keep working my way up, until I'm a dentist."

**jamie hayden** |  
dental assistant student

# experience

"I never knew I could do something like this. At the end of the day, you see the parts you made and you think, I did that. It's rewarding."

**georgette lang** |  
machinist

Teachers with industry experience can help you develop the skills and experience you need to succeed in the job market. Or, if you decide to take further education or training in your chosen field, you'll have a head start.

"Students really get two educations for the price of one. They get credits toward their Grade 12 diploma and when they graduate, they are employable."

**chantal simard** |  
instructor
