Lesson 3: Consequences and Implications of Sexual Behaviour

Cluster of Learning Outcomes

Students will…

✓ K.5.S1.E.1b Describe the potential consequences and risks associated with sexual behaviour (e.g., unplanned pregnancy, STIs, HIV, AIDS…) and different types of contraceptive methods (e.g., abstinence, use of condoms, foam, the pill, diaphragm, intrauterine device…).

✓ K.5.S1.E.2b Examine the psychological implications of sexual activity and teenage pregnancy (e.g., hurt feelings, increased responsibility, loss of reputation…), and responsibilities regarding prevention (e.g., discuss decision with parents/religious leaders/doctor, abstain, communicate with partner, obtain contraception…).

S.4.S1.A.2 Design, implement, and evaluate an action plan for making a decision based on personal values and beliefs related to physically active and healthy lifestyle practices (e.g., active living, good nutrition, no substance use, safety…).

✓ Indicates targeted learning outcomes.

Lesson Focus

As a result of the learning activities within this lesson students will be able to

• identify reasons for choosing abstinence
• list reasons some teenagers choose to have sex
• describe potential risks associated with sexual behaviour
• generate accurate information regarding the efficacy and availability of various methods of contraception
• identify emotional consequences of early sexual activity
• discuss the importance of making responsible decisions for preventing pregnancy
Notes to Teacher

Be sensitive to different cultural perspectives on reproductive health. For background information on contraception and teenage pregnancy prevention, refer to RM 3 to 5 (in Appendix C).

Curricular Connections

PH/HE:
K.5.S1.E.2b
K.5.S1.E.1b

FS:
S1.2.3.2 Evaluate the role of abstinence in relationships, e.g., mental health, pregnancy prevention, physical health—STIs, emotional health.

Resources

Blackline Master
- BLM S1-3.1: Postponing Intercourse Versus Having Intercourse

Resource Masters (See Appendix C)
- RM 3: Contraceptive Methods and Considerations
- RM 4: Pregnancy Prevention and Youth
- RM 5: Consequences of Teenage Pregnancy

Print/Publications

Organization/Website
- Birth control kits can be ordered from Sexuality Education Resource Centre (SERC), Manitoba: <http://www.serc.mb.ca>.

Professionals
- Elder/religious leader
- public health nurse
Suggestions for Instruction

1. **Life Is Too Short**
   Students define the following terms:
   - sexual abstinence (e.g., refraining from any sexual activity that could cause pregnancy, STIs, or HIV/AIDS)
   - safer sex (e.g., use of contraceptive methods to reduce the risk of pregnancy, STIs, or HIV/AIDS)

   Working in pairs, students brainstorm:
   - reasons why some youth choose abstinence
   - reasons why some youth choose to have intercourse
   - potential risks of sexual behaviour (e.g., unplanned pregnancy, STIs, HIV/AIDS)

   Pairs share their information with classmates.

   To assist with class discussion, refer to BLM S1-3.1: Postponing Intercourse Versus Having Intercourse.

2. **Get the Facts…NOW!**
   As a class, brainstorm and create a master list of various types of contraceptive methods. If desired, show a video or provide fact sheets on contraceptive methods prior to this learning activity. Working in groups of three or four, students:
   - research the effectiveness of one contraceptive method related to pregnancy prevention and STI prevention
   - record information using the following chart
   - present findings to classmates

   Students complete their charts during class discussion.

   Refer to RM 3: Contraceptive Methods and Considerations (see Appendix C).

3. **Surprise Package**
   Prepare and distribute individual paper bags, each containing one type of contraceptive device. Working in groups of three or four, students gather and present the following information about a specific contraceptive device:
   - name (e.g., condom)
   - function (e.g., condom prevents semen from getting into the vagina and anus)
   - effective use (e.g., for male condom, check expiration date, use once only)

   Encourage appropriate class discussion.

4. **Consider the Consequences**
   In groups of five or six, students brainstorm to identify the emotional consequences of early sexual activity. Volunteers share their group’s information. Create a master list to generate class discussion.

5. **What Am I to Do?**
   Remaining in the same groups (as in the previous learning activity), students analyze the following statement:
   “Your boyfriend/girlfriend says he/she is ready for sex.”

   Each group examines the psychological implications of the above statement and addresses the issue of making a responsible decision for preventing teenage pregnancy. Volunteers share group answers. Encourage class discussion.

</table>

* Rank effectiveness level of protection against pregnancy and STIs using a scale of 1 (least effective) to 10 (most effective).
Suggestions for Assessment

Paper and Pencil Task: Get the Facts…NOW!  
Self-Assessment: Inventory
Create a post-quiz to assess student knowledge.  
Post answers for students to self-assess responses.

<table>
<thead>
<tr>
<th>Contraceptive Methods</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Suggested Questions:</strong></td>
</tr>
<tr>
<td>1. What is the purpose/function of condoms?</td>
</tr>
<tr>
<td>2. What is the emergency contraceptive pill (morning-after pill) and what is its function?</td>
</tr>
<tr>
<td>3. What is a latex dam used for?</td>
</tr>
<tr>
<td>4. What are three highly unreliable contraceptive methods?</td>
</tr>
</tbody>
</table>

**Answer Key:**
1. Condoms form a barrier that prevents semen from getting into the vagina and anus.  
2. An emergency contraceptive pill is given at a medical centre only in emergency situations (e.g., forced intercourse, condom breakage). It may prevent unwanted pregnancy.  
3. A latex dam is used for oral sex as protection against STIs.  
4. Three highly unreliable contraceptive methods are: natural family planning (rhythm), withdrawal, and douching.

Journal/Learning Log: Consider the Consequences  
Teacher Assessment: Anecdotal Notes
Students answer the following questions in their journals/learning logs:
1. Imagine that you and your partner are expecting a baby. At this time in your life, how would you handle the situation?  
2. Is there a difference in how society views males having premarital sex versus females having premarital sex? Explain.  
3. How would being a teenage parent affect you and your life? Explain.

Journal/Learning Log: All Activities  
Teacher Assessment: Anecdotal Notes
Students answer the following questions in their journals/learning logs:
1. How does an individual’s life change when he or she is diagnosed with HIV? Explain.  
2. There are various contraceptive methods. What factors would influence your selection? Explain.
