Description/Опис

This Grade 3 Unit on Ukraine is intended to support the implementation of the Manitoba social studies curriculum in schools offering Ukrainian–English Bilingual programming.

The unit is composed of five modules or “lessons” (Урок) that serve to introduce learners to Ukraine, its peoples, and its culture. Each lesson provides teachers with blackline masters for use in the classroom, short articles, visual resources, and links to references and additional resources.

The five lessons are as follows:

- Lesson 1 / Урок 1 introduces learners to the unit and the geography of Ukraine. It begins with activating activities designed to draw on students’ prior knowledge of Ukraine, and highlights important symbols.
- Lesson 2 / Урок 2 explores the climate, flora and fauna, and natural regions of Ukraine.
- Lesson 3 / Урок 3 explores the history of Ukraine and the contributions of people of Ukrainian origins throughout the world.
- Lesson 4 / Урок 4 expands learners’ vocabulary related to the flora and fauna of Ukraine and common household articles.
- Lesson 5 / Урок 5 explores Ukrainian culture, highlighting significant festivals and traditions.
