UKRAINIAN LANGUAGE ARTS
KINDERGARTEN TO GRADE 12

LANGUAGE ARTS
CULTURE
The Culture section supports the development of a positive self-concept, a strong self-identity as a bilingual/multicultural learner and a positive identification with Ukrainian language and culture. This section provides opportunities for the exploration of the Ukrainian culture from the perspectives of historical elements, contemporary elements, diversity and change. It promotes the development of a sense of community, an understanding of similarities and differences among people, and an appreciation for personal contributions to society. It also is designed to help students develop an understanding of global interrelatedness and interdependence, as well as cultural sensitivity, and to support their preparation for effective participation in the global marketplace and workplace.

The Culture section is intended to be integrated with language learning, as well as learnings related to other subject areas, and is an essential part of daily activities in Ukrainian bilingual programming. This program of studies divides the Language Arts and Culture sections for ease of use only.

While Ukrainian cultural learning is unquestionably best conducted in Ukrainian, certain concepts may be too complex to be undertaken in the language. On such occasions, limited and judicious use of English may be resorted to in order to facilitate learning.

General Outcome
The following general outcome outlines the key learnings that the Culture section is designed to support.

General Outcome 7
Students will explore, understand, appreciate and value Ukrainian culture in Canada and the world for personal growth, enrichment and satisfaction and for participating in and contributing to an interdependent and multicultural global society.

Note: Additional outcomes that deal with cultural content may be found elsewhere in this program of studies, including sections under General Outcome 5, as well as under cluster heading 6.3 Sociocultural/Sociolinguistic Competence.
