SOCIAL STUDIES AND THE CREATION OF A DEMOCRATIC LEARNING COMMUNITY

Welcome to the world of social studies, where students have opportunities to interact with each other in democratic groups and communities, and to acquire the knowledge, values, and skills they need to become active, responsible citizens within our Canadian society. As they grow and learn the skills of citizenship, they not only contribute to their learning communities, but also contribute to the betterment of our society.

What do active, responsible citizens look like? They are aware of the world in which they live, and they care about people around them—the people with whom they share this planet, both near and far away. They know that their actions affect others. They have informed opinions, and think critically about issues that concern themselves and others. They have the confidence to make their voices heard, to take a stand on issues, and to engage in social action when necessary. They are concerned with the well-being of the environment, and live their lives in ways that reflect that concern.

Background

This document was produced by Manitoba Education, Citizenship and Youth, in collaboration with Manitoba educators. It includes the core concept citizenship, and identifies general and specific learning outcomes. It integrates the four foundation skill areas of literacy and communication, problem solving, human relations, and technology, and provides ideas and strategies to support the implementation of social studies. It is mandated for use in all schools in Manitoba.

A Brief History of the Social Studies Curriculum

Just as knowing oneself means knowing one's history, fully understanding the new social studies curriculum requires knowing something of its history. The Manitoba curriculum was created through a culturally collaborative process; diverse voices guided the process, and the result is a social studies curriculum that better reflects the cultural reality of Canada.

The first stage of the process was the creation of the *Western Canadian Protocol (WCP) Common Curriculum Framework for Social Studies, Kindergarten to Grade 9 (2002)**. This was the first inter-provincial/territorial curriculum project to include both Aboriginal and francophone representatives as full and equal partners in the development process.

* In November 2003 the name was changed to the Western and Northern Canadian Protocol (WNCP) for Collaboration in Basic Education.

Manitoba Advisory Groups

- Social Studies Steering Committee
- K to S4 Framework Development Team
- Cultural Advisory Team

Manitoba's involvement in the Western and Northern Canadian Protocol project, and in the next stage of adapting the *WCP Framework* to produce *Kindergarten to Grade 8 Social Studies: Manitoba Curriculum Framework of Outcomes*, was guided by three advisory groups:

- The **Manitoba Social Studies Steering Committee**, including representatives from Manitoba educational stakeholders
- The **Manitoba Kindergarten to Senior 4 Framework Development Team**, comprising Early, Middle, and Senior Years teachers from English, français, and French Immersion Programs, as well as Aboriginal educators and consultants, and university advisors in history, geography, and education
- The **Manitoba Cultural Advisory Team**, with representatives from 15 ethnocultural organizations in Manitoba
(See the Acknowledgments section for a listing of team members and organizations.)

Manitoba also solicited feedback from educational stakeholders during the development of the WCP and Manitoba frameworks. Regional consultations took place, as did a province-wide mailout, resulting in feedback from hundreds of Manitoba educators and stakeholders, including the Manitoba First Nation Education Resource Centre and the Manitoba Métis Federation.

Contents of the Document

This document contains the following sections:

- **Introduction:** The introduction describes the purpose, background, and contents of this document.
- **Social Studies in Manitoba—A Kindergarten to Senior 4 Overview:** This section presents an overview of the Kindergarten to Senior 4 social studies program in Manitoba.
- **Document Components and Structure:** This section presents the components of the Manitoba social studies curriculum and explains how the learning outcomes and strategies for teaching, learning, and assessment are organized within this document.
- **Grade 6: Canada: A Country of Change (1867 to Present):** This section contains the grade overview; cluster descriptions; skills, knowledge, and values learning outcomes; suggested strategies for assessment; and strategies to activate, acquire, and apply learning.
- **References**
- **Appendices:** This sections contains the following appendices: A: Skills Assessment; B: Blackline Masters; C: Charts and Checklists; D: Vocabulary Strategies; E: Grades 5 to 8 Cumulative Skills Chart; F: Recommended Learning Resources; and G: Learning Experiences Resources Package

SOCIAL STUDIES IN MANITOBA—A KINDERGARTEN TO SENIOR 4 OVERVIEW

Definition

Social studies is the study of people in relation to each other and to the world in which they live. In Manitoba, social studies comprises the disciplines of history and geography, draws upon the social sciences, and integrates relevant content from the humanities. As a study of human beings in their physical, social, and cultural environments, social studies examines the past and present and looks toward the future. Social studies helps students acquire the skills, knowledge, and values necessary to become active democratic citizens and contributing members of their communities, locally, nationally, and globally.

Vision

Social studies has at its foundation the concepts of citizenship and identity in the Canadian and global contexts. Intended to reflect the many voices and stories that comprise the Canadian experience, past and present, the social studies curriculum is inclusive of Aboriginal, francophone, and diverse cultural perspectives.

Social studies engages students in the continuing debate concerning citizenship and identity in Canada and the world. Through social studies, students are encouraged to participate actively as citizens and members of communities, and to make informed and ethical choices when faced with the challenges of living in a pluralistic democratic society.

Goals of Social Studies

Social studies enables students to acquire the skills, knowledge, and values necessary to understand the world in which they live, to engage in active democratic citizenship, and to contribute to the betterment of society.

The goals of social studies learning span Kindergarten to Senior 4, and are divided into five categories:

- Canada
- The World
- The Environment
- Democracy
- General Skills and Competencies

With respect to **Canada**, social studies enables students to

- acquire knowledge and understanding of Canadian history and geography
 - appreciate the achievements of previous generations whose efforts contributed to the building of Canada
 - critically understand Canadian political structures and processes and the institutions of Canadian society
 - fulfill their responsibilities and understand their rights as Canadian citizens
- understand and respect the principles of Canadian democracy, including social justice, federalism, bilingualism, and pluralism
 - analyze Canadian public issues and take rationally and morally defensible positions
 - develop a sense of belonging to their communities and to Canadian society
 - respect Aboriginal perspectives, francophone perspectives, and the perspectives of the many cultural groups that have shaped Canada, past and present

With respect to the **world**, social studies enables students to

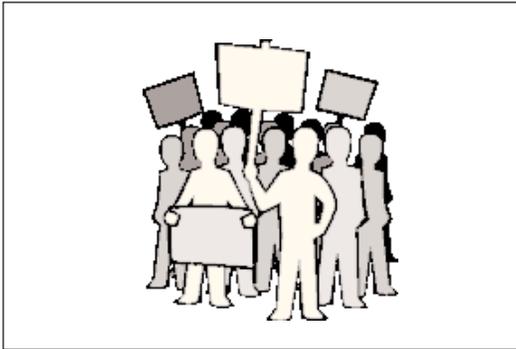

- acquire knowledge and understanding of world history and geography
 - respect the world's peoples and cultures through a commitment to human rights, equity, and the dignity of all persons
 - develop global awareness and a sense of global citizenship
 - understand and appreciate the role of international organizations
 - analyze global issues and take rationally and morally defensible positions
- develop a commitment to social justice and quality of life for all the world's peoples
 - assess questions of national self-interest and the interests of other countries and the world as a whole

With respect to the **environment**, social studies enables students to

- acquire and apply geographic skills, knowledge, and understanding
- recognize that a sustainable natural environment is essential to human life
- assess the impact of human interaction with the environment
- propose possible solutions to environmental problems
- live in ways that respect principles of environmental stewardship and sustainability

Overview

With respect to **democracy**, social studies enables students to

- critically understand the history, nature, and implications of democracy
- assess alternatives to democracy, past and present
- understand the history and foundations of parliamentary democracy in Canada
- demonstrate a commitment to democratic ideals and principles, including respect for human rights, principles of social justice, equity, freedom, dissent and differences, and willingness to take action for the public good

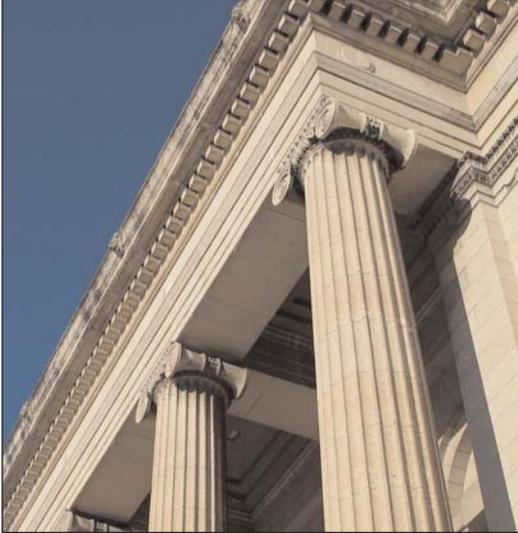

- participate in public affairs in accordance with democratic principles
- critically understand the role of various institutions in civil society
- recognize that democracy involves negotiation and that political and social problems do not always have simple solutions
- identify ways in which Canadian democracy could be improved, and work to improve it
- participate as informed citizens in the ongoing debates that characterize democracy in Canada and the world
- take a stand on matters of fundamental principle or individual conscience

With respect to **general skills and competencies**, social studies enables students to

- engage in disciplined inquiry, applying research skills, critical thinking, and decision making
- think historically and geographically
- critically analyze and research social issues, including controversial issues
- work collaboratively and effectively with others
- solve problems and address conflicts in creative, ethical, and non-violent ways

- develop openness to new ideas and think beyond the limits of conventional wisdom
- apply effective communication skills and enhance media literacy
- use and manage information and communication technologies

CITIZENSHIP AS A CORE CONCEPT IN SOCIAL STUDIES

Citizenship is the core concept that provides the learning focus for social studies at all grades. To identify the knowledge, values, and skills that students will need as active democratic citizens, social studies must take into account the society in which students live and anticipate the challenges they will face in the future. Citizenship is a fluid concept that changes over time: its meaning is often contested, and it is subject to interpretation and continuing debate.

Achievement of learning outcomes related to citizenship will prepare students to participate in the public dialogue that characterizes any democracy and that plays an important role in Canadian society. As students engage in this dialogue, they will enhance their understanding of citizenship in Canada and the world, and will be better prepared to become active participants in their communities, locally, nationally, and globally.

Rationale for Citizenship Education

Citizenship education is fundamental to living in a democratic society. The concept of citizenship takes on meaning in specific contexts and is determined by time and place. Diverse notions of citizenship have been used in the past and are being used in the present, for both good and ill. Throughout much of history, citizenship has been exclusionary, class-based, racist, and sexist. In Canada, for instance, First Nations parents were forced to send their children to residential schools in the interests of citizenship.

The concept of citizenship must be considered within the context of democracy, human rights, and public debate. Social studies provides opportunities for students to explore the complexities of citizenship in four areas:

- Active Democratic Citizenship in Canada
- Canadian Citizenship for the Future
- Citizenship in the Global Context
- Environmental Citizenship

Overview

Active Democratic Citizenship in Canada

Since citizenship issues are rooted in the past, Canadian history occupies an important place in the social studies curriculum. Canada is regionally diverse and geographically expansive. It is organized as a federal parliamentary monarchy, with a mixed, albeit largely capitalist, economy. It is a bilingual and multicultural country committed to pluralism, human rights, and democracy. Globally, Canada is regarded as a prosperous, peaceful, and democratic country, although it still has its share of economic and social injustices and inequities.

Canada is a complex country that requires special qualities in its citizens. These citizenship qualities include

- knowledge of Canadian history and geography
- understanding of the distinctive nature of Canadian society, the Canadian state, and its institutions
- the ability to approach public issues critically, rationally, and democratically
- informed involvement in public affairs
- respect for human rights and democratic ideals and principles
- a commitment to freedom, equality, and social justice
- the ability to work through conflicts and contradictions that can arise among citizens
- a willingness to live with ambiguity and uncertainty
- civility and tolerance for dissension and disagreement
- a willingness to balance the pursuit of private interests with concern for the public good
- the ability to balance personal claims of conscience and principle against the similar claims of others
- a sense of shared identity as Canadians, combined with a realization that Canadian identity is multi-faceted, open to debate, and not exclusive of other identities

Canadian Citizenship for the Future

For the foreseeable future, Canadian citizens will likely continue to face issues such as

- balancing the jurisdictional claims of the provinces, territories, and the federal government
- redressing past and present injustices inflicted on Aboriginal peoples and other groups in Canada
- coming to terms with the complexities of Quebec's place in Canada
- balancing regional and cultural diversity with national unity
- protecting Canadian identity and sovereignty
- assuring access to social services and quality of life for all
- eliminating inequalities related to race, gender, sexual orientation, age, class, and ethnicity
- protecting the environment
- ensuring the successful functioning of the economy

Citizenship in the Global Context

Canada is part of a global community that is becoming increasingly interconnected and interdependent. Many of the most serious problems facing our world must be dealt with on a global basis. The nation-state—including Canada—is under increasing challenge, externally from the forces of globalization, and internally from demands for more local or regional autonomy. The world also continues to be characterized by severe disparities between rich and poor countries. This disparity violates the basic principles of social justice and human dignity, and, at the same time, gives rise to dangerous tensions and rivalries. War, terrorism, and violence continue to be a means of addressing internal and international disputes, and, because of developments in weapons technology, are becoming ever more destructive. In these circumstances, Canadian citizens need to think and act globally as well as nationally.

Environmental Citizenship

Underlying both national and global realities, and the responsibilities they impose on citizens, is the increasing fragility of our natural environment. Quality of life depends upon the sustainability of our environment. This places a particularly important responsibility on citizens, who must ultimately balance the demands of economic growth and high living standards against respect for the environment and the needs of future generations.

Overview

General Learning Outcomes

The following six general learning outcomes provide the conceptual structure for social studies from Kindergarten through Senior 4. They are the basis for the specific learning outcomes for each grade.

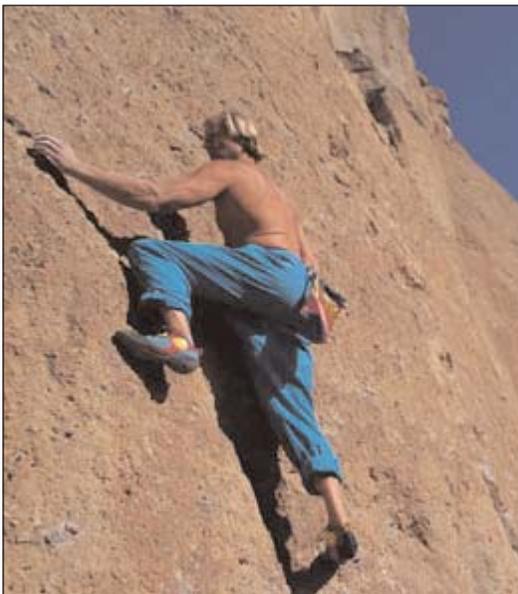

Identity, Culture, and Community

Students will explore concepts of identity, culture, and community in relation to individuals, societies, and nations.

Many factors influence identity and life in communities, including culture, language, history, and shared beliefs and values. Identity is subject to time and place, and is shaped by a multiplicity of personal, social, and economic factors. A critical consideration of identity, culture, and community provides students with

opportunities to explore the symbols and expressions of their own and others' cultural and social groups. Through a study of the ways in which people live together and express themselves in communities, societies, and nations, students enhance their understanding of diverse perspectives and develop their competencies as social beings. This process enables them to reflect upon their roles as individuals and citizens so as to become contributing members of their groups and communities.

The specific learning outcomes within Identity, Culture, and Community include concepts such as human interaction and interdependence, cultural diversity, national identities, and pluralism.

The Land: Places and People

Students will explore the dynamic relationships of people with the land, places, and environments.

People exist in dynamic relationships with the land. The exploration of people's relationships with places and environments creates an understanding of human dependence and impact upon the natural environment. Students explore how spatial and physical characteristics of the environment affect human life, cultures, and societies. They consider how connections to the land influence their identities and define their roles and responsibilities as citizens, locally, nationally, and globally.

The specific learning outcomes within The Land: Places and People focus on geographic understanding and skills, and concepts such as sustainability, stewardship, and the relationship between people and the land.

Historical Connections

Students will explore how people, events, and ideas of the past shape the present and influence the future.

The past shapes who we are. An exploration of Canadian and world history enables students to acquire knowledge and appreciation of the past, to understand the present, and to live with regard for the future. An important aspect of this process is the disciplined investigation and interpretation of history. Students learn to think historically as they explore people, events, ideas, and evidence of the past. As they reflect upon diverse perspectives, personal narratives, parallel accounts, and oral and

social histories, students develop the historical understanding that provides a foundation for active democratic citizenship.

The specific learning outcomes within Historical Connections enable students to develop an interest in the past, and focus on chronological thinking, historical understanding, and concepts such as progress, decline, continuity, and change.

Global Interdependence

Students will explore the global interdependence of people, communities, societies, nations, and environments.

People, communities, societies, nations, and environments are interdependent. An exploration of this interdependence enhances students' global consciousness and helps them develop empathy with respect to the human condition. Students critically consider diverse perspectives as they examine the connections that link local, national, and global communities. Consideration of global connections enables students to expand their knowledge of the world in which they live and to engage in active democratic citizenship.

The specific learning outcomes within Global Interdependence focus on human rights and responsibilities, diversity and commonality, quality of life and equity, globalization, international cooperation and conflict, and global environmental concerns.

Overview

Power and Authority

Students will explore the processes and structures of power and authority, and their implications for individuals, relationships, communities, and nations.

Power and authority influence all human relationships. Students critically examine the distribution, exercise, and implications of power and authority in everyday life and in formal settings. They consider diverse forms of governance and leadership, and inquire into issues of fairness and equity. This exploration helps students develop a sense of personal empowerment as active democratic citizens.

The specific learning outcomes within Power and Authority include concepts such as political structures and decision making, governance, justice, rules and laws, conflict and conflict resolution, and war and peace.

Economics and Resources

Students will explore the distribution of resources and wealth in relation to individuals, communities, and nations.

The management and distribution of resources and wealth have a direct impact on human societies and quality of life. Students explore the effects of economic interdependence on individuals, communities, and nations in the global context. They examine economic factors that affect decision making, the use of resources, and the development of technologies. As students explore diverse

perspectives regarding human needs, wants, and quality of life, they critically consider the social and environmental implications of the distribution of resources and technologies, locally, nationally, and globally.

The specific learning outcomes within Economics and Resources include concepts such as trade, commerce, and industry, access to resources, economic disparities, economic systems, and globalization.

Social Studies Skills

Social studies skills are grouped into four categories:

- Skills for Active Democratic Citizenship
- Skills for Managing Ideas and Information
- Critical and Creative Thinking Skills
- Communication Skills

Skills for Active Democratic Citizenship

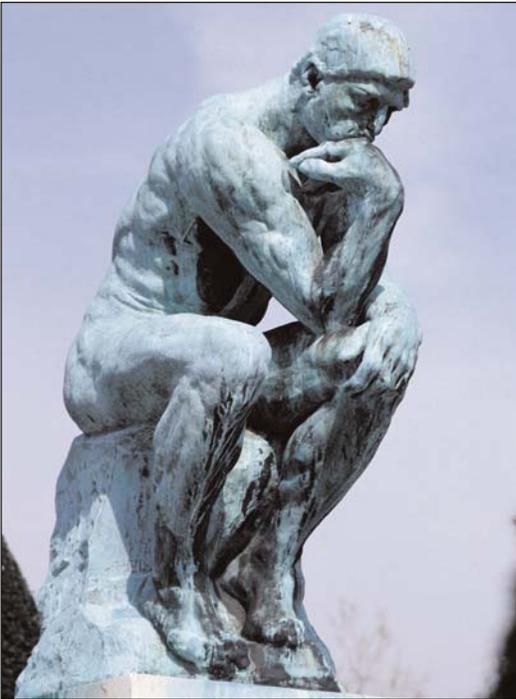

Citizenship skills enable students to develop good relations with others, to work in cooperative ways toward achieving common goals, and to collaborate with others for the well-being of their communities. These interpersonal skills focus on cooperation, conflict resolution, taking responsibility, accepting differences, building consensus, negotiation, collaborative decision making, and learning to deal with dissent and disagreement.

Skills for Managing Information and Ideas

Information-management skills enable students to access, select, organize, and record information and ideas, using a variety of sources, tools, and technologies. These skills include inquiry and research skills that enhance historical and geographical thinking.

Overview

**Critical and Creative Thinking Skills**

Critical and creative thinking skills enable students to make observations and decisions, to solve problems, and to devise forward-thinking strategies. These skills involve making connections among concepts and using a variety of tools. Critical thinking involves the use of criteria and evidence to make reasoned judgments. These judgments include distinguishing fact from opinion and interpretation, evaluating information and ideas, identifying perspectives and bias, and considering the consequences of decisions and actions. Creative thinking emphasizes divergent thinking, the generation of ideas and possibilities, and the exploration of diverse approaches to questions.

**Communication Skills**

Communication skills enable students to interpret and express ideas clearly and purposefully using a variety of media. These skills include the development of oral, visual, print, and media literacy, and the use of information and communication technologies for the exchange of information and ideas.

GUIDING PRINCIPLES FOR SOCIAL STUDIES LEARNING, TEACHING, AND ASSESSMENT

Social Studies and the Learning Process

Learning in social studies is an active process. Active learning involves the construction of meaning through the interaction of prior knowledge, motivation and purpose, and new experiences. The process of learning varies from one individual to another, and is shaped by a multitude of factors, including personal, social, and cultural influences. Social studies learning is more meaningful when students are

- encouraged to broaden their perspectives through informed and focused interaction with others
- provided with opportunities to reflect critically on their own ideas and attitudes
- valued, respected, and acknowledged as individuals, whatever their situation or background

Social studies *knowledge, values, and skills* are interdependent aspects of learning, and need to be integrated in the learning process. Meaningful learning in social studies requires both depth and breadth of understanding. This includes the incorporation of basic general knowledge, as well as opportunities for more intensive study of selected topics.

Strategies to support student inquiry and interaction:

- cooperative and peer learning
- interviews
- project-based learning
- structured controversy or debate
- teacher- and student-initiated inquiry and research
- role-play
- sharing circles

Instructional Strategies for Active Learning

Social studies learning can be enhanced by using a variety of settings both in and outside of school, flexible student groupings, and numerous other strategies. A well-balanced social studies program includes individual, collaborative, and teacher-directed learning experiences, and provides students with a variety of conceptual tools and advance organizers.

Effective social studies instruction includes the use of strategies that promote student inquiry and interaction. These strategies include cooperative and peer learning, interviews, project-based learning, structured controversy or debate, teacher- and student-initiated inquiry and research, role-play, and sharing circles. These types of strategies make learning meaningful by encouraging critical reflection, questioning, and the consideration of diverse points of view.

It is through guided inquiry and interaction—within the school and in the community—that students construct meaning from their individual experiences. Students require opportunities to engage in authentic and relevant community issues and events. It is important that these experiences be integral to social studies learning, and not be contrived.

Overview

Active learning includes

- resource-based and experiential learning
- on-the-land experiences
- field studies
- guided tours
- participation in diverse cultural activities
- integrating literature and the arts
- using information and communication technologies

Active learning is encouraged through resource-based and experiential learning. These include on-the-land experiences, field studies, guided tours, and participation in diverse cultural activities. Social studies teaching offers the ideal opportunity to integrate literature and the arts, and to use information and communication technologies.

Effective practices in social studies actively engage students in democratic processes such as consensus building, collective decision making, student government, class meetings, student-generated topics of study, and school event planning. As well, social studies provides authentic opportunities for home and community involvement.

Activities that engage students in democratic processes:

- consensus building
- collective decision making
- student government
- class meetings
- student-generated topics of study
- classroom/school event planning

Resource-Based Learning

Social studies addresses a wide range of issues and topics at every grade. It is a subject that is particularly well suited to resource-based learning, which moves beyond the single textbook approach and provides students with a variety of information sources. (See Appendix F for a list of recommended learning resources.)

There is a rich abundance of social studies resources available to teachers and students. These include primary information sources, print media, electronic media, art and artifacts, simulations and games, maps, and field trips, as well as knowledgeable individuals from the local community.

Resource-based learning is a student-centred approach that adapts to student needs, interests, abilities, learning styles, and prior knowledge. An environment that is rich in resources allows students to explore and discover as they learn, and to make personal learning choices that are relevant and meaningful.

As our society continues to evolve, so do the roles of teachers and learners. The “sage on the stage” model is giving way to a more flexible model—one in which teachers facilitate the learning process, and students make decisions and assume responsibility for their learning. A resource-based learning approach ultimately helps students manage the information overload that typifies today’s society, and teaches them how to continue their learning outside of the school setting. While the development of fundamental knowledge is still essential in social studies, the student of the 21st century needs the skills to locate, access, and evaluate pertinent information.

Resource-based learning

- primary sources
- magazines and journals
- books
- television, radio
- DVDs and CDs
- audio/video tapes
- the Internet
- computer software and databases
- art and artifacts
- simulations and games
- maps
- neighbourhood walks
- museums
- art galleries
- cultural centres
- community sites
- guest speakers
- Elders
- live performances

Role of the Social Studies Teacher

Social studies accommodates a variety of teaching styles. Given the political nature of social studies issues and topics, a teacher’s personal beliefs and convictions may influence the presentation of content, as well as the selection of teaching strategies and learning resources. Complete neutrality is not always possible, nor necessarily desirable; however, teachers need to be aware of the implications of presenting their own beliefs and perspectives as fact rather than opinion.

Social studies is rich in opportunities to detect and analyze bias through the critical exploration of diverse points of view. When a classroom climate is open and fair, teachers and students together will establish a learning culture that integrates democratic principles and encourages active citizenship. It is important to note that student-centred classrooms are not necessarily democratic classrooms. Even activities that are democratic in nature, such as cooperative learning, can be undemocratic in practice, depending upon how they are used.

Finally, it is critical that teachers be well informed about social studies content and issues, and that they be prepared to provide students with guidance in selecting reliable information sources.

Dealing with Controversial Issues

A fundamental aspect of social studies learning and teaching—at all grade levels—is the consideration of controversial issues—issues that involve ethics, principles, beliefs, and values. Teachers should not avoid controversial issues. Diversity of perspectives, beliefs and values, disagreement, and dissension are all part of living in a democratic society. Furthermore, discussion and debate concerning ethical or existential questions serve to motivate students and make learning more personally meaningful.

The following guidelines will assist teachers in dealing with controversial issues in the classroom:

- approach all issues with sensitivity
- clearly define the issues
- establish a clear purpose for discussions
- establish parameters for discussions
- ensure that the issues do not become personalized or directed at individual students
- protect the interests of individual students by finding out in advance whether any student would be personally affected by the discussion
- exercise flexibility by permitting students to choose alternative assignments
- accept that there may not be a single “right answer” to a question or issue
- respect everyone’s right to voice opinions or perspectives
- help students clarify the distinction between informed opinion and bias
- help students seek sufficient and reliable information to support the various perspectives
- allow time to present all relevant perspectives fairly and to reflect upon their validity

SOCIAL STUDIES AS A CURRICULUM OF AND FOR DIVERSITY AND EQUITY

Inclusive Social Studies Classrooms

The social studies classroom plays an important role in helping students become engaged and caring citizens, locally, nationally, and globally. To do so requires teachers to use social studies classrooms as living laboratories for a more equal and just society than the one in which we now live. Schools in general, and the social studies classroom specifically, support the continued development of the multicultural, multiracial, and pluralist democracy that is Canada—a democracy that is capable of addressing the serious social and ecological challenges that face us now, and which threaten our collective future.

The events that take place in our classrooms both shape, and are shaped by larger social currents that define who we are and where we are headed as a society. To be successful, schools, and social studies classrooms in particular, must be guided by democratic social goals and values that celebrate our human diversity and demonstrate a quest for greater equity in our institutions and in society as a whole.

Social studies curriculum and instruction must be both *visionary* and *practical*: *visionary* because we need to go beyond narrow educational goals and look toward our collective future with hope; *practical* because the work of reshaping educational practice and countering negative social forces and conditions requires daily effort.

Teaching practices, educational activism, and dedication and creativity on the part of teachers and other educational partners are all part of this process. Efforts to transform the social studies classroom need to grow from a common social and pedagogical vision that strives for an inclusive classroom focused on social justice. Curriculum and practice must reflect certain essential characteristics, which are described below.

Inclusive classrooms focused on social justice are

- multicultural, equity-focused, anti-biased in nature
- grounded in the lives of students
- culturally sensitive
- critical
- participatory and experimental
- hopeful, joyful, caring, visionary
- academically rigorous
- supportive of students as social activists and engaged citizens

1. Multicultural, equity-focused, and anti-bias in nature

A curriculum grounded in social justice and awareness of social diversity must be inclusive of every student in every classroom. With our increasingly diverse student population and nation, the social studies classroom needs to directly address issues related to race, class, gender, and other aspects of educational equity. We need to do more than simply celebrate diversity. We need to take on the “hard stuff” of exploring why some differences translate into wealth and power, while others become the basis for discrimination and injustice. Social studies classrooms exist in a multicultural and multiracial society, and need to honestly face the truth about our past and present. The often exclusionary, traditional stories of history need to be revised to include the experiences and voices of Aboriginal peoples and people of colour, women, working peoples, and other diverse groups in our society.

2. Grounded in the lives of students

Good teaching begins with respect and concern for children, their innate curiosity, and their capacity to learn. Curriculum needs to be rooted in the real lives and contexts of the students in the classroom. Creating effective learning environments requires that the lives of the students, as well as the topics they are exploring, provide the content of the classroom experience. Students need opportunities to consider and inquire how their lives connect to the broader society.

3. Culturally sensitive

Classrooms that are places for critical teaching and learning are built on the premise that teachers “don’t know it all.” Each new class presents opportunities for teachers to learn from students, and requires teachers to be good researchers and listeners. Teachers will often work with children of diverse cultural origins and ethnicities, and may need to call upon parents and others in order to understand the needs of their students. Teachers must also draw on the cultural diversity of their colleagues and community resources for insights into the communities they seek to serve.

4. Critical

The social studies curriculum should help equip students to engage in dialogue and to challenge the world. From Early Years onward, students need to develop skills and insights that allow them to pose essential questions. Who holds power and makes decisions in society? Who is left out? Who benefits and who suffers? What is fair practice? What is discriminatory or unfair practice? How is change created? Students should have opportunities to examine and question social reality through critiques of media, public policy decisions, foreign policy choices, newspapers, historical accounts, and school life itself. Wherever possible, student learning should encompass issues and problems in the world outside the classroom walls.

5. Participatory and experiential

Student involvement and initiative need to be emphasized; students should not be passive learners. Exploratory and experiential learning approaches, in which students are involved in planning and decision making, allow students to take responsibility for, and to manage, their own learning. Projects, role-plays, mock trials, and other learning activities involve students physically and cognitively. These are all essential to provoke students to develop democratic capacities: to question, to challenge, to make real decisions, and to solve problems collectively.

6. Hopeful, joyful, caring, and visionary

Classrooms in which children feel significant and cared for are at the heart of an inclusive school. Unless students feel safe—emotionally and physically—they will not reveal their true selves or their real thoughts and feelings, and discussions will be artificial and dishonest. Teachers need to design learning experiences that help students learn to trust and care for each other.

Overview

7. Academically rigorous

An inclusive classroom focused on social justice provides students with the skills they need to navigate the world, and to take action to change the world. When students create products for real audiences about significant issues, and discuss big ideas with compassion and intensity, academics come to life.

8. Supportive of students as social activists and engaged citizens

If we want students to see themselves as voices for justice and agents of change, it is important to encourage them to critique the world, and to be willing to act in ways that are meaningful. Part of the role of the social studies teacher is to reinforce the fact that ideas have real consequences and need to be acted upon. Students can draw inspiration from historical and contemporary individuals who struggled for social justice, peace, and human rights. A critical curriculum and classroom should reflect the diversity of people from all cultures and both genders who acted to make a difference, many of whom did so at great sacrifice. Students should feel connected to this legacy of resistance and social justice.

Creating inclusive and critical classrooms is not easy. It is complex and demanding work that requires vision, support, and resources. Sharing experiences with other educators, establishing support networks, and amassing diverse resources are critical components of inclusive classrooms.

Towards a Pedagogy for Social Justice

A social studies curriculum that advocates social justice is built upon the integration and exploration of issues related to inclusion, diversity and racism. This approach requires a clear and well developed understanding of multicultural/anti-racist teaching approaches. It should not be assumed that simply providing students with learning resources that are "multicultural" or that deal with issues of inequality or diversity is sufficient to create an inclusive social studies classroom. To have a positive effect, as well as an anti-racist/anti-bias impact on the classroom, multicultural materials need to be part of meaningful learning experiences that encourage students to critically explore and analyze the significance of the issues discussed or information presented, personally and collectively.

The quotation that follows illustrates the importance of anti-racism pedagogy in the use of multicultural resources in the classroom, and in the planning and implementation of learning activities. It is critical that educators be clear how a specific learning resource and related activities fit into their plan for the year and the anti-racism objectives that have been established.

It should be remembered that multicultural curriculum can be taught in a traditional and racist way. The way out of this dilemma is through the intervention of anti-racist teaching. Anti-racist teaching would incorporate 'education' which is multicultural while the 'teaching' would be anti-racist. In this context, anti-racist teaching is seen as coming about through a teacher with the 'right' attitude, the appropriate knowledge, and the necessary skills to bring about learning that that will challenge racism and change the bias of the traditional ethnocentric and biased education to which we are accustomed in Canada. (Black Learners Advisory Committee [BLAC] Report on Education, December 1994, Nova Scotia)

The Transformative Curriculum: Education for Social Justice

An anti-racist pedagogy may be conceptualized as being education for change, social justice, or action. James Banks provides a conceptual model for analyzing the level of integration of multicultural content into the curriculum, which highlights the importance of a social action approach. In his perspective, a Transformation or Social Action Approach is essential if we wish to meaningfully address issues of diversity and inequality in the social studies classroom and in our schools.

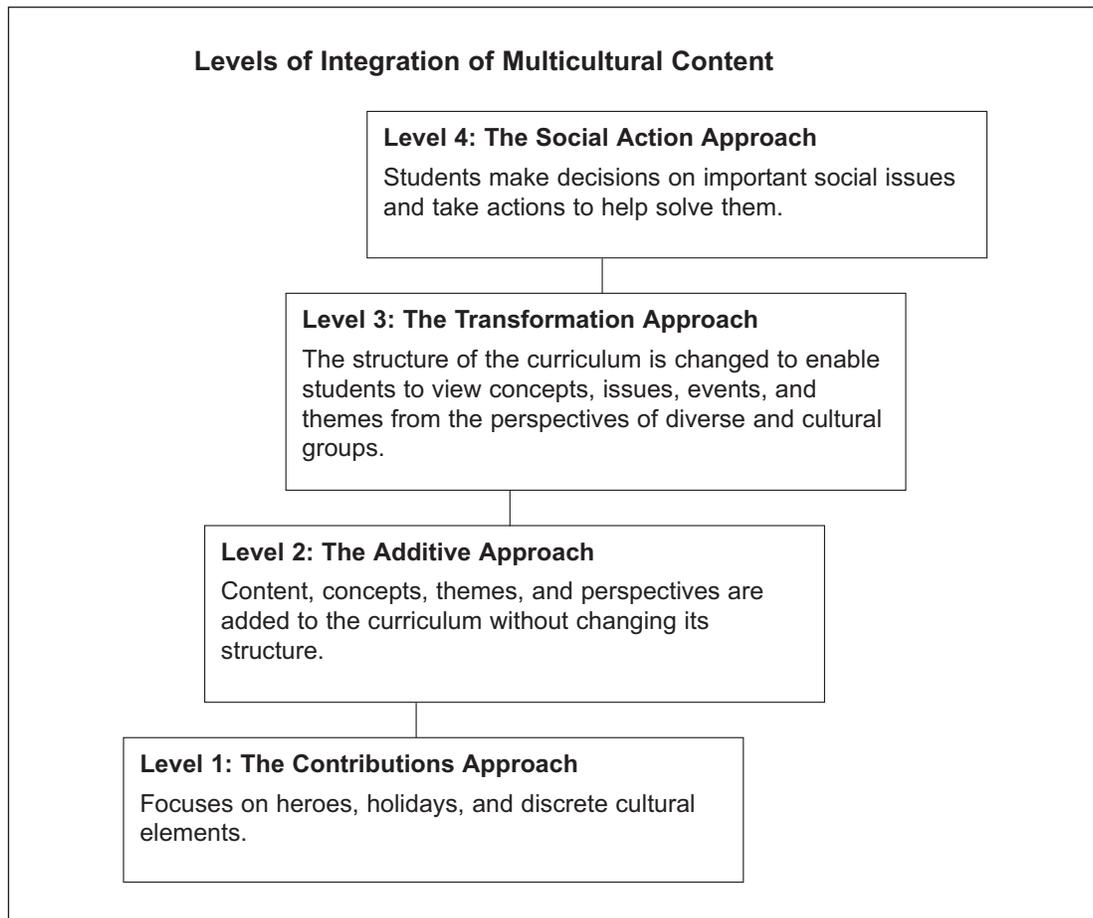

Figure 1: From “Approaches to Multicultural Curriculum Reform” by James A. Banks. In *Multicultural Education: Issues and Perspectives*, J. Banks and C. Banks (Eds.).

Diversity and Inequity: The Historical Context

It is important that educators develop an informed understanding of the historical development of Canadian society and the history of diversity and inequality. Traditional approaches to Canadian history have often excluded or marginalized the experiences and perspectives of many diverse groups. Therefore, it is critical that educators broaden their understanding of history in a Canadian and international context.

Overview

The experiences of marginalized groups in Canada share many similarities with marginalized groups in other places. It is important to explore and critically consider these parallels. Furthermore, it is important to connect historical experiences to contemporary social conditions, such as continued inequities in employment, evidence of bias in medical research, attitudes towards interracial or same-sex marriages, the prevalence of negative stereotypes in media, and so on.

Identity, Culture, and Race

Educators also need to consider the social dynamics and patterns of intercultural interaction in the classroom in developing inclusive, multicultural, and pro-social justice learning experiences. The ethnocultural identity and self-concept of students play an important role in determining their response and willingness to engage in meaningful learning experiences related to diversity. Social and ethnocultural identity is characterized by a number of factors, including the following:

- An individual's identity is complex and composed of various dimensions.
- Every individual has multiple identities, with ethnicity, class, gender, sexual orientation, language, religion, racial origins, political beliefs, and other factors defining who we are.
- Not all factors have the same impact on our identity, and their relevance may change according to personal and social conditions and social context.
- Race, while it is a socially constructed concept, forms part of our sense of identity.
- Racial identity development is the result of the racialization of society, and is a complex and dynamic phenomenon.

Theories regarding the process of achieving an anti-racist group identity are a useful tool to guide exploration of the impact of race and racism in our classrooms. These theories also serve to guide educators in defining the objectives of anti-racism education. Ideally, schools should facilitate the movement of students to the highest level of anti-racist group identity. (See below.)

Towards an Inclusive and Anti-Bias Identity

The process of undoing the profound impact of racism and other forms of discrimination and marginalization is a complex journey—a journey towards an inclusive and anti-bias identity. Psychologists researching race and identity issues have theorized that this journey may take different paths or stages of development for different groups, as members of these groups have been affected in differing ways by racism and discrimination.

Research suggests that people undergo a series of life transformations or stages of identity formation in terms of their self-concept and group identity. These stages of social identity formation are not inevitable or static, nor are they achieved for life. Life circumstances and experiences precipitate and support change either *towards* or *away* from anti-racism consciousness and behaviour. Alternatively, individuals may remain fixated at a particular stage of ethnic and group consciousness. (Derman-Sparks *et al.*, 1997)

Towards an Anti-Bias/Anti-Racist Identity

William Cross's (1991) model for the stages of Black identity development reflects the African-American experience, but is relevant in a Canadian context. His model of the *resocialization experience* has five distinct stages of identity development: Pre-encounter, Encounter, Immersion/Emersion, Internalization, and Internalization-Commitment.

In Cross's conceptual framework, individuals move from a state of unawareness of racism and discrimination to one of total awareness and social activism, known as the *Internalization-Commitment* stage. This final stage parallels Banks' idea of the *global* ethnic identity, and is a fully developed anti-racist group identity. An individual at this stage is a social activist who recognizes the need for continuous efforts to challenge inequality in society on several fronts, and seeks to collaborate with others in meaningful social action.

Helms (1990) has taken a similar and comprehensive examination of the stages of white/dominant group identity development. Helms identifies the tendency of dominant group members in society to deny that their racial identity has any significance, preferring to view themselves as individuals and, consequently, not responsible for the perpetuation of a racist system.

Helms' model of identity development is based on six distinct stages: Contact, Disintegration, Immersion/Emersion, Reintegration, Pseudo-Independent, Immersion/Emersion, and Autonomy. Individuals in this framework, like Cross's, move from a stage of total ignorance to one of total awareness and engagement in social activism. In the final stage of identity, Autonomy, individuals are self-directed and self-actualized activists who join with exploited groups to change the racist system.

Both researchers see the highest form of identity formation to be one where individuals are aware of the realities of inequities in society and the reality of racism, coupled with the desire to work with others for change and meaningful social action.

Applying Racial Identity Development Concepts in the Classroom

There is a great deal of significance to identity formation for educators involved in anti-bias/anti-racism education within the social studies classroom. First, the two models detailed above present a framework for conceptualizing learning outcomes or objectives for anti-bias/anti-racist education in a school setting. Ideally, school experiences and learning activities will stimulate sustained exploration and development of students' sense of identity, and encourage movement towards an anti-racist racial identity for all students. To achieve this, there needs to be a good

understanding of both racism and of anti-racist educational practices.

Secondly, the two models provide tools to assist teachers in planning educational experiences for students. The stages students are at in their racial identity development affect how they interact with other students, and how they respond to learning experiences dealing with diversity or racism. Teachers may wish to reflect on the cultural composition of their classrooms and individual student sense of identity when planning learning activities. This reflection will provide insight as to how students may respond to multicultural learning resources, or educational activities related to diversity issues. It may also identify potential problems that may arise as a result of students being at different stages of identity development.

Overview

Finally, the models provide a tool for self-reflection and analysis, encouraging teachers to reflect on issues of race and power. For example, teachers may ask themselves:

- What stage am I at in my personal identity formation?
- How will my stage of identity formation affect my teaching of anti-bias/anti-racist content and issues?
- What is my pattern of interaction and relationships with people of diverse origins and disadvantaged groups, and how does this relate to my current stage of identity development?

Isolation and Identity

The exploration of Canadian and world history, and issues related to discrimination may be particularly challenging for students of marginalized or minority groups. A student may find herself or himself as the only one, or one of a small group, in an otherwise relatively homogeneous classroom setting. Such students may be at different stages of social or ethnic identity, and the overall classroom attitude and awareness of racism will greatly affect the dynamics in the classroom. It is important for teachers to recognize that

- racism and other forms of discrimination adversely affect student involvement in the classroom.
- experiences with racism and other forms of discrimination affect students' lives and the lives of their family members.
- dealing with issues of race and racism and other issues of bias and discrimination is a deeply personal and emotional experience that may stimulate recall of repressed memories or emotions.
- for many students of visible minority origins, and other students of diverse origins, a sense of isolation or alienation is not uncommon.
- in such situations, even if the intent is anti-bias in nature, raising issues of racism and inequality in a classroom presents a challenge for most students. Very often students will feel as if "all eyes" are on them when racial incidents occur, racist language is expressed, or other issues related to prejudice and discrimination are discussed.
- being of visible minority origins may be an experience in diversity itself. Students are often of interracial and intercultural backgrounds. Teachers need to be sensitive to students' personal definitions of their "identity" and group membership.
- students may not be comfortable with the role of representing or "speaking for" their particular cultural group. Depending on personal circumstances and social conditions, students may just be beginning, or have yet to begin, to explore their cultural origins.

This discussion of issues related to identity illustrates the complexity of intercultural and interracial dynamics in the classroom and society. It points to the need to carefully consider these dynamics when introducing challenging learning experiences. Most importantly, it highlights the need to have a clear and well-defined anti-bias/anti-racist teaching approach. It is about education for empowerment; it is about turning dreams into reality.

Strategies to Develop Positive Attitudes towards Diversity

- Initiate educational activities and discussions to build a positive racial and/or cultural self-identity.
 - Initiate activities and discussions to develop positive attitudes toward diverse racial/cultural groups—encourage the exploration of groups different from students' own reference groups.
 - Always answer student questions about race, ethnicity, and cultures when questions are asked.
- Listen carefully and in a relaxed manner to student questions and comments. Be sure to understand what a student means and wants to know.
 - Pay attention to feelings.
 - Provide truthful information appropriate to students' level of understanding.
 - Help students recognize racial, cultural, social, and other stereotypes.
 - Encourage students to challenge racism and other forms of discrimination by being a positive role model and displaying inclusive attitudes and behaviours.
 - Cultivate understanding that racism and other forms of discrimination do not have to be a permanent condition—that people are working together for positive change.
 - Remember that learning about racial and cultural identities is a lifelong process.

(Council for Interracial Books for Children, 1980)

Points to Consider When Using Multicultural Resources in the Classroom

1. **Remember that context is important when using literature or media that deal with issues of diversity and of inequality.**
 - How does the resource fit into the yearly plan or the curriculum?
 - Is the school environment positive and open to diversity?
 - What is the classroom composition in terms of diversity? How may this affect classroom dynamics?

- Are students from the cultural backgrounds that are featured in the resource represented in the classroom? Is there a history of positive interaction between students of diverse cultural and racial origins?
- What is the relationship and pattern of interaction between the teacher and minority students in the classroom? How may this affect the use of the resource in a classroom setting?
- Is multicultural literature frequently used in the school and throughout various subject areas?

Overview

2. What was the rationale for choosing the resources to be used?

- Were parents or community group members involved in the selection of the resources?
- Has the impact of the resource on readers of different experiences and perspectives been considered?
- Have questions of voice and authenticity been considered?
- Have supplementary or complementary materials been considered?

3. Has the stage been set for the introduction of the resource, including its content and major themes?

- Is the teacher sufficiently knowledgeable about the content and the historical context of the resource?
- Are students sufficiently knowledgeable of the historical and social context addressed in the resource?
- Have students explored issues related to the use of problematic terms and references made in the resource?
- Have minority students and parents been consulted with respect to planned learning activities? Have they been given an opportunity to participate or to suggest strategies for the effective use of the resource?

4. Does the classroom experience lend itself to anti-bias/anti-racist learning?

- Are students encouraged to critically analyze the resource and its significance in a contemporary setting?
- Have arrangements been made to monitor the impact of the resource on students in the classroom, and to deal with issues as they arise?
- Do the classroom activities allow students to voice their experiences, feelings, and ideas? Are minority students' experiences, feelings, and ideas validated, or are they ignored and silenced?
- Are students encouraged to explore the significance of the resource in terms of their own lives and social action?
- Do classroom experiences provide an opportunity for students to interact and connect with the people or groups featured in the resource? Do students have a voice in the classroom?
- Are connections made to other groups and their experiences in a way that encourages students to understand similarities and differences?
- Has the use of additional resources that give a more complete picture been considered?

5. How does the resource or issue studied relate to other aspects of the curriculum and school experience?

- Have provisions been made to connect the issues and experiences explored to curricular learning outcomes?
- Is the impact of the resource on students, and on their interactions in the classroom, being monitored?
- Have students been given opportunities to reflect on learning experiences, and to share their thoughts and feelings?
- Have plans been made to provide students with opportunities to celebrate their diversity and unity with each other, their parents, and their community?

SOCIAL STUDIES AND CLASSROOM-BASED ASSESSMENT

Purpose of Assessment

The purpose of classroom-based assessment is to enhance student learning. Research continues to demonstrate that ongoing formative assessment contributes more significantly to learning than the more traditional focus on summative assessment, which is often referred to as assessment *of* learning. Formative assessment, also described as assessment *for* learning and/or assessment *as* learning, is most effective when it involves both the student and the teacher, and takes place throughout the learning process.

Each type of assessment serves a purpose and contributes to student success in social studies. Classroom-based assessment *for* learning allows students and teachers to determine what students have learned, and what they need to learn next. Students need frequent opportunities for meaningful and relevant feedback.

Descriptive or narrative feedback—that which includes analytical questions and constructive comments—provides information to students that they may use to adjust their learning processes, and is more helpful to them than a numerical or alphabetical grade. Assessment that is ongoing and meaningful provides opportunities for students to become reflective learners—to synthesize their learning, to solve problems, to apply their learning in authentic situations, and to better understand their learning processes—as well as opportunities for teachers to become reflective practitioners. Assessment *of* learning that takes place at the end of a cluster, or at the end of a year, provides important information about student progress and achievement, as well as instructional effectiveness. This information is usually shared with parents via report cards.

It is important that the purpose of assessment (*of* or *for*), as well as how assessment information will be used, is clear to both teachers and students. With a clearly understood purpose, students are encouraged to take more responsibility for their learning, and are better able to focus their efforts, while teachers can better select the instruction and assessment strategies and student learning resources that will improve student achievement.

Overview

Activating: How will students be prepared for learning?

Acquiring: What strategies facilitate learning for groups and individuals?

Applying: How will students demonstrate their understanding?

Assessment and the Stages of Learning

Much of what goes on in classrooms can be described as assessment, and assessment takes place in each of the three stages of learning: activating, acquiring, and applying. Assessment at each stage benefits students and teachers.

Assessment during the **activating** stage prepares both teachers and students for the learning process, identifying gaps and strengths in student prior knowledge, and informing future instruction.

Assessment during the **acquiring** stage provides feedback as learning takes place, and allows teachers and students to make adjustments to strategies and activities. Well-timed, meaningful feedback as they are learning helps students improve the quality of their work and reach their learning goals. Assessment at this stage also allows for the gathering of evidence of student learning.

Assessment during the **applying** stage focuses on students using new understandings in meaningful and authentic ways. Authentic tasks are those that have worthwhile purposes and replicate as closely as possible the context in which knowledge, values, or skills will be applied beyond the classroom. Ideally, students should demonstrate their learning, and the relevance and importance of their learning, for real audiences and real purposes.

Information gathered at each of the three stages of learning is useful for teacher and student reflection regarding changes and adaptations to learning strategies, and in the selection of student learning resources. (See Figure 2: *Assessment at Different Stages of Learning*.)

Assessment at Different Stages of Learning		
	Students	Teachers
Activating Stage	<p>Assessment in the activation stage helps students</p> <ul style="list-style-type: none"> • “set the stage” and to mentally plan and prepare for new learning • identify the focus of new learning • identify what they already know about a topic • gain interest in a new topic 	<p>Assessment in the activation stage helps teachers</p> <ul style="list-style-type: none"> • identify gaps, strengths, misconceptions, and faulty information in student prior knowledge • identify student interests • provide a focus for planning instructional strategies and the selection of student learning resources • determine which instructional approaches or resources need to be implemented or adapted
Acquiring Stage	<p>Assessment during the acquiring stage helps students</p> <ul style="list-style-type: none"> • become aware of the progress and the degree of understanding they are achieving • experience and adapt different approaches and strategies that facilitate their learning • identify what further learning they need to undertake • improve as they practise 	<p>Assessment during the acquiring stage helps teachers</p> <ul style="list-style-type: none"> • revise learning strategies to meet evolving student needs • monitor student growth and progress, and determine whether students are achieving specific learning outcomes (SLOs) • determine if individual students need additional support or further learning opportunities to achieve SLOs • identify which learning outcomes need to be the focus of subsequent instruction and assessment • gather evidence of student growth, which may be used for reporting
Applying Stage	<p>Assessment during the applying stage helps students</p> <ul style="list-style-type: none"> • become aware of their growth and achievement, and celebrate their successes • identify their strengths, as well as areas needing further growth • deepen their understandings as they make connections and reflect on their learning, and apply new ideas in meaningful and authentic ways 	<p>Assessment during the applying stage helps teachers</p> <ul style="list-style-type: none"> • be fully aware of student understanding and achievement of learning outcomes • identify student strengths and areas needing further learning • provide evidence of student growth and achievement for reporting to parents and administrators • reflect on their teaching practices in order to identify changes and revisions to learning strategies

Figure 2: Assessment at Different Stages of Learning

Overview

Collecting Assessment Information

Assessment of student learning is a complex and interactive process. At various times it involves teacher and/or student decision making, student self- and peer assessment, teacher observation of students, student-teacher dialogue, student reflection, and teacher reflection. Each stage of learning and assessment generates information about student needs, growth, and achievement, as well as information related to teaching and learning strategies and the appropriateness of student learning resources.

Collecting information about student learning helps build a positive learning environment and contributes to positive classroom relationships. Teachers use information they gather about their students to scaffold instruction, and to make decisions about the strategies and learning resources that will contribute to successful student learning. When assessment information is shared with students, they are better able to manage and take responsibility for their own learning—setting goals and identifying how they will achieve those goals.

Teachers learn about student progress through day-by-day observation of students in action, as well as through more formal activities, including projects, performances, tests, and examinations. Teachers cannot possibly assess all students, all the time, and should consider a number of factors when determining how to focus their assessment observations. These factors include, among others, the nature of the learning outcomes; the structure of the learning activity (e.g., individual, small group, whole class); the time of year; and the stage of student development. Teachers may choose to focus assessment observation on one or two students or on a small group at any one time to monitor their growth and progress at different stages of their learning.

No matter what the type, every assessment activity should be based on criteria that are shared with students *before* they engage in learning. As well, having students participate in constructing assessment criteria further contributes to their success. When students know in advance what is to be assessed, and when their performances are compared to predetermined criteria (and to their prior performances), students are better able to concentrate their efforts and focus their learning.

Additionally, students need to be aware of what success looks like. Providing students with exemplars from previous years provides them with a model to strive toward, and assists them in reaching their learning goals.

Assessment Tools and Strategies

Just as diverse instructional strategies are important, so too are a variety of assessment tools and strategies. There are three types of learning outcomes in social studies—knowledge, values, and skills—and assessment needs to be congruent with each type of learning.

- **Assessing Knowledge:** Social studies places significant emphasis on the acquisition of knowledge. True understanding and appreciation of social studies issues does not occur if students simply memorize and recall information. Rather, students are encouraged to use the knowledge they acquire to synthesize and apply new understandings, and to demonstrate evidence of their learning.
- **Assessing Skills:** The assessment of social studies skills and processes requires different strategies than the assessment of knowledge. Since skill development is ongoing, students continue to practise skills from cluster to cluster and throughout the year. Skills are best assessed by observing students in action, by discussing their learning strategies during conferences and interviews, and by gathering data from student reflections and self-assessments.

- **Assessing Values:** Values are implicit in what students say and do, and are not always measurable in the same way that knowledge outcomes are measurable. Similar to skills, values are best assessed by observing students in action, looking for behavioural indicators as expressions of student values, and engaging students in critical dialogue.

A significant aspect of social studies is the development of values related to active democratic citizenship. The values related to citizenship do not apply solely within the confines of the classroom; a number of social studies learning outcomes refer to student attitudes and behaviours in groups and communities beyond the school. In those cases, assessment will include not only student self-assessment, but self-reporting.

In general, there are three main sources for teachers to gather student assessment evidence:

- observations of student learning (including students' interactions with peers)
- observation and evaluation of student products and performances
- one-to-one conversations with students about their learning, including information gathered from self- and peer assessment

Assessment tools and strategies:

- student portfolios
- interviews
- individual and group inquiry and research
- journals
- role-play
- oral presentations
- tests
- hands-on projects
- teacher observation checklists
- peer assessment
- self-assessment

A broad range of tools and strategies are available to teachers to assess social studies learning. These include student portfolios, interviews, individual and group inquiry and research, journals, role-play and oral presentations, tests, hands-on projects, teacher observation checklists, peer assessment, and self-assessment. The most important aspect of each of these strategies is regular dialogue with students about their learning: asking them questions about their observations and conclusions *as they learn*, and stimulating and prompting them to higher levels of thinking and learning.

When teachers use a variety of assessment tools and strategies over a period of time, student learning patterns begin to emerge. Observation and knowledge of these patterns is necessary for planning effective instruction and for successful learning.

Student portfolios are a particularly useful approach in the assessment of social studies learning. Portfolios help teachers determine the degree to which students have mastered learning. The contents of student portfolios represent student growth and progress, and, when they are accompanied by interviews with students about their learning, provide valuable assessment information for communication to students, parents, and administrators.

Assessment *of* learning is also important. However, it must be noted that assessment information that is gathered at the end of a cluster will not always be completely summative in nature. Social studies learning outcomes—particularly skills outcomes that continue to develop through the year—are often interconnected, practised, and reinforced throughout every cluster. Therefore, the level of growth that students demonstrate at various times during the year may not adequately reflect their progress at the end of the year. Student achievement may need to be reviewed at year's end, and “summative” assessments that were made earlier may need to be revised.

Overview

Teachers may wish to consider end-of-cluster assessments as *progress reports* rather than final assessments, and decide to provide students with additional opportunities to demonstrate their learning. End-of-year assessment, similar to assessment that takes place at the end of every cluster, should allow students to make connections in their learnings and to reflect on the applications of this new knowledge and understanding in their lives.

Self-Assessment and Reflection

Classroom-based assessment provides opportunities for both students and teachers to reflect on, and to enhance, the learning process.

When students are empowered to engage in self-assessment and reflection, they make better choices and assume more responsibility for their learning. Self-assessment significantly increases learning by promoting critical thinking and by allowing students to take ownership of their learning. They are better able to observe and analyze patterns in their thinking, to appraise their strengths, and to set realistic goals for themselves.

Student autonomy and responsibility is enhanced when students

- identify their learning goals
- help create assessment criteria
- select products and performances for their portfolios to demonstrate their learning
- engage in peer assessment
- are provided with self-assessment tools (e.g., checklists, learning logs, reflection journals, portfolios)

Language to encourage self-assessment

Students

- I think I need to...
- I also want to...
- I was thinking that...
- I wonder...
- Next time I would...

Teachers

- Why did you choose to...?
- What options did you consider...?
- What changed in your thinking?

As teachers engage in regular conversations with students about their learning, teachers gain essential information to plan for the needs of individual learners.

Assessment, including student self-assessment, is facilitated when students are made to feel safe, secure, involved, and that their individual learning needs are being met. When assessment is equitable (i.e., focused on student growth and progress instead of student deficits, and **not** used for discipline or classroom control), student autonomy, responsibility, and motivation greatly increase. Students need to be encouraged to do their best as they learn, but also to take risks and not to be afraid of making mistakes.

Self-assessment depends on student empowerment. Empowerment needs to begin before any actual learning takes place, and continue through to the summative assessment stage.

Students who are empowered and autonomous learners are involved in the initial decision making about learning, expressing ideas about what and how they will learn. They plan their personal learning goals, decide how they will demonstrate their learning, and select products and performances for their portfolios, all in collaboration with their peers and/or teachers. Throughout the process, teachers engage students in critical dialogue about their decisions and their progress. Figure 3: *Student Empowerment in the Learning Process* illustrates this critical dialogue.

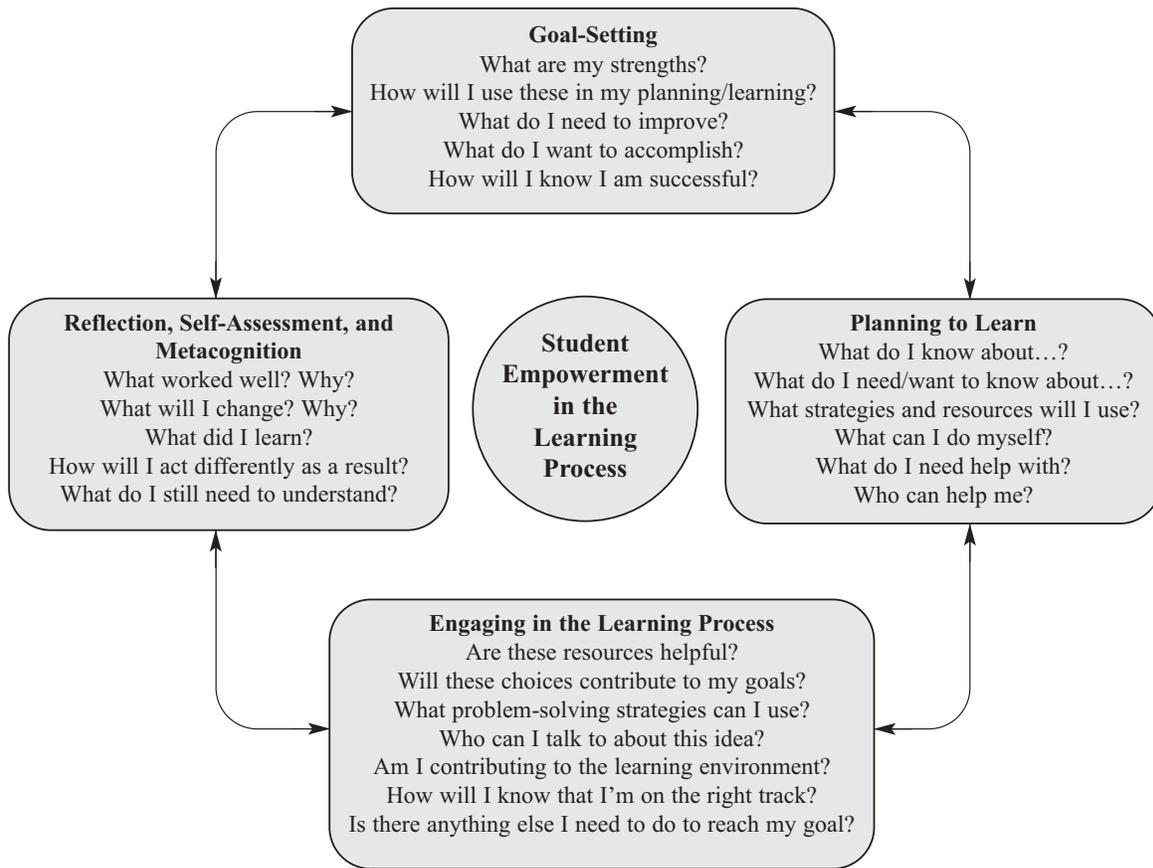

Figure 3: Student Empowerment in the Learning Process

Teacher Reflection

Teacher reflection is also essential to effective pedagogy, and there is no teaching tool or strategy more important than critical consciousness. As teachers assess and reflect on their instructional practices, and as they engage students in dialogue about learning, they become aware of student needs and are better able to adjust planning and teaching—before, during, and after learning.

Before learning begins, teachers engage students in strategies to activate learning. This provides opportunities for teachers to observe students, to assess their prior knowledge, and to make initial adjustments to the learning process that is about to begin.

Once learning is underway, teachers continuously observe students and engage them in dialogue about their learning. They are aware of changing student needs, and adapt and adjust learning strategies as needed.

Teacher as reflective practitioner

- Which strategies best met the needs of the group? Of individuals?
- How did the students respond?
- What will I change? add? delete?

Finally, *when all of the learning and assessing activities have been completed*, teachers critically reflect on the whole learning process, evaluating their strategies and approaches, and deciding what changes need to be made for next time.

A Social Studies Model for Classroom-Based Assessment

The assessment model presented in this document provides a series of processes and tools to facilitate classroom-based assessment.

In each grade, the knowledge, values, and skills learning outcomes have been organized into thematic groups referred to as **clusters**; there are three to five clusters in each grade. Each cluster is further divided into **learning experiences**, where a small number of related learning outcomes are grouped together. Each learning experience provides a series of activating, acquiring, and applying strategies.

In this model, assessment tools and strategies have been created for use

- at the **beginning** of each cluster
- **within** each learning experience
- at the **end** of each cluster

The following assessment strategies and tools are referenced at the **beginning of each cluster**. The reproducible charts are found in Appendix C.

- **Skills Progress Chart:** This teacher tool lists every skills learning outcome for a particular grade. It is intended to monitor individual student progress related to skills in each cluster and throughout the grade. (Appendix C)
- **Student Portfolio Tracking Chart:** This chart is intended for student use, and lists the titles of each learning experience within a cluster. Students use the chart to track the portfolio selections from each learning experience they will use to demonstrate their learning at the end of the cluster. (Appendix C)
- **Engaging Students in the Cluster:** This section provides suggestions to teachers to activate a cluster, prior to engaging students in learning experiences. These activities are intended to stimulate student interest, and to provide opportunities for teachers to assess student prior knowledge.

The following assessment tools are included **within every learning experience**:

-  **Skills Set:** This icon is attached to every strategy in a learning experience, and includes an appendix reference. Appendix A lists the skills learning outcomes that may be targeted for assessment, and provides assessment suggestions.
-  **Suggested Portfolio Selections:** Selected strategies in each learning experience are identified with this icon, indicating that the strategy may result in the creation of products, processes, or performances for inclusion in student portfolios. (See the description of **Student Portfolio Tracking Chart** above.)

A portfolio is a purposeful collection of work over time that shows the evidence of a student's knowledge and understanding. Selection is made with regard to student learning goals and/or criteria, and involves self-assessment and reflection. Portfolios show growth and the achievement of learning outcomes.

The following assessment tool appears at the **end of every cluster**:

- **Connecting and Reflecting:** Every cluster ends with an assessment activity entitled *Connecting and Reflecting*. During this activity, students review their cluster portfolio selections to synthesize their learnings throughout the cluster, and reflect on the implications of those learnings in their daily lives as citizens of their school, their local community, of Canada, or the world. This end-of-cluster activity is an important culminating step. It provides information to both teachers and students about student achievement regarding the essential ideas and understandings of the cluster.

DOCUMENT COMPONENTS AND STRUCTURE

Conceptual Map

The student learning outcomes presented in this document address the four foundation skill areas and nine essential elements common to all Manitoba curricula. The following conceptual map illustrates the foundation skill areas, essential elements, and other key components upon which the Manitoba social studies curriculum is based.

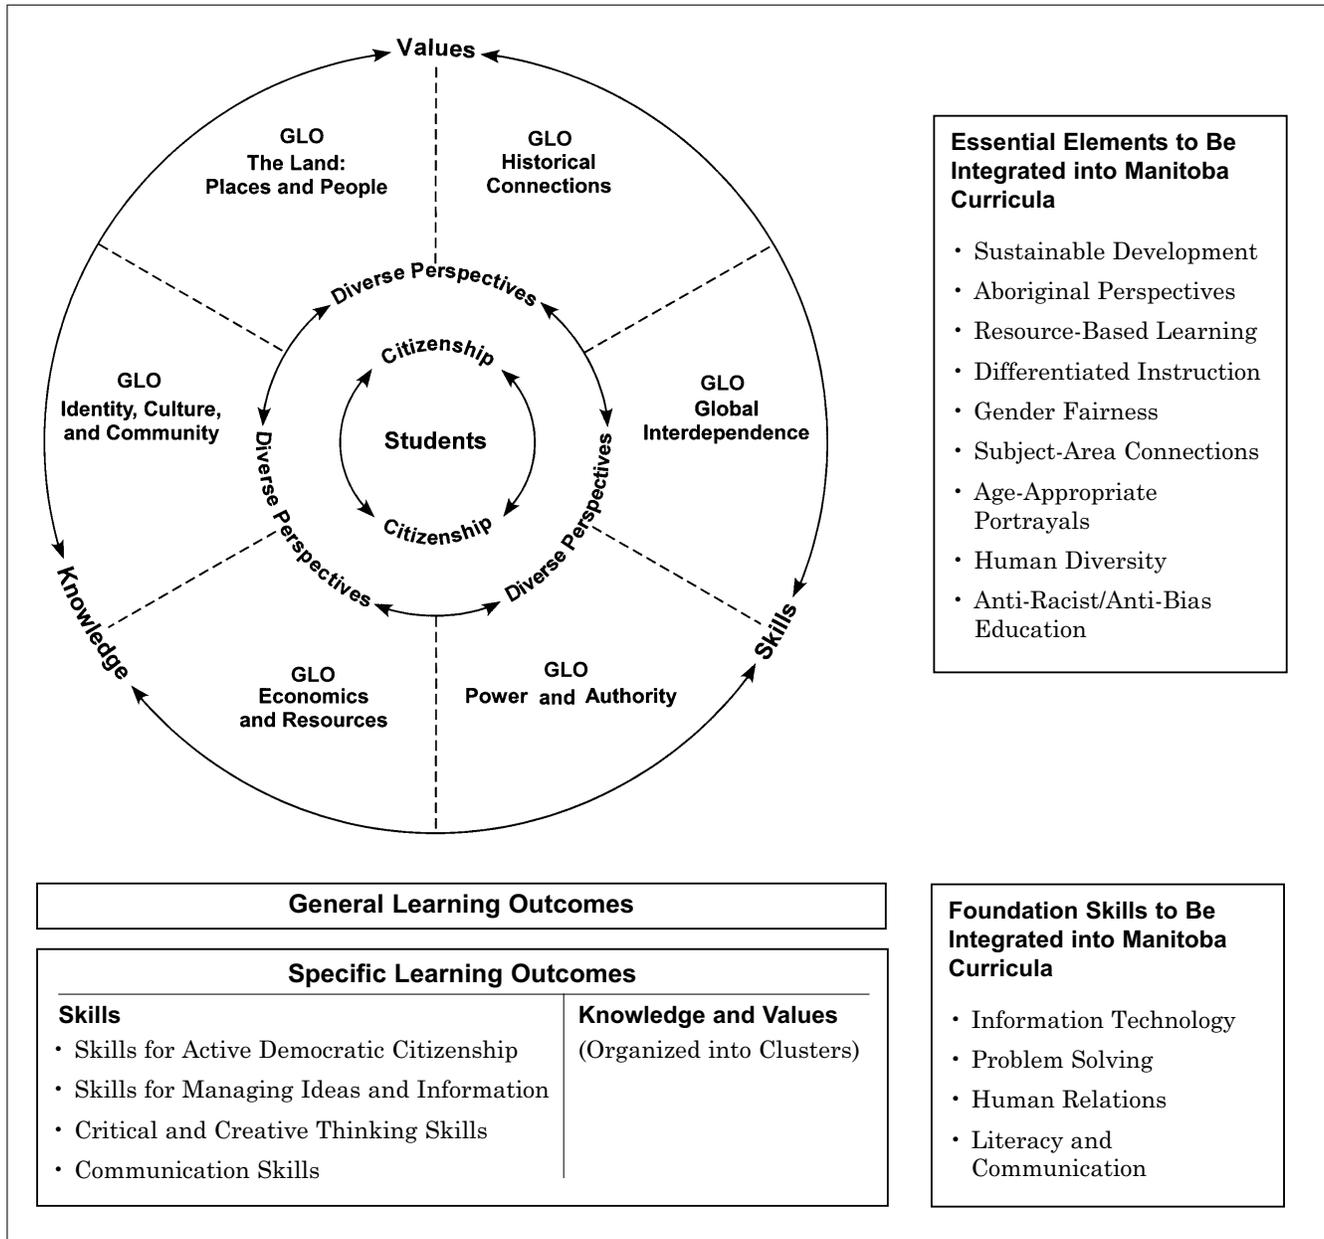

Figure 4: Conceptual Map

Overview

DOCUMENT COMPONENTS

Core Concept

As illustrated in the preceding Conceptual Map, the core concept of citizenship provides a focus for social studies learning at all grades. Citizenship knowledge, values, and skills learning outcomes are included in each grade. (See page 6.)

Diverse Perspectives

The concept of diversity is integrated throughout the social studies curriculum. Knowledge and values learning outcomes are inclusive of diverse perspectives, and encourage critical consideration of differing viewpoints as students engage in purposeful dialogue with others.

General and Specific Learning Outcomes

This document contains both general and specific learning outcomes. The **general learning outcomes** are broad statements that provide a conceptual structure for social studies, and are the basis for the specific learning outcomes in each grade. **Specific learning outcomes** are statements that describe the **skills, knowledge, and values** that students are expected to achieve in each grade. These three types of specific learning outcomes are interdependent and are intended to be integrated throughout the social studies learning process.

The six general learning outcomes (see page 9), which are the basis for the specific learning outcomes in each grade, are:

- **Identity, Culture, and Community:** Students will explore concepts of identity, culture, and community in relation to individuals, societies, and nations.
- **The Land: Places and People:** Students will explore the dynamic relationships of people with the land, places, and environments.
- **Historical Connections:** Students will explore how people, events, and ideas of the past shape the present and influence the future.
- **Global Interdependence:** Students will explore the global interdependence of people, communities, societies, nations, and environments.
- **Power and Authority:** Students will explore the processes and structures of power and authority, and their implications for individuals, relationships, communities, and nations.
- **Economics and Resources:** Students will explore the distribution of resources and wealth in relation to individuals, communities, and nations.

Skills Learning Outcomes

Social studies involves the development of discipline-related skills, including inquiry and research skills and methods, historical thinking, and geographic thinking. Social studies provides students with opportunities to refine the skills and competencies developed in other subject areas, such as skills in communication and media literacy, collaboration and cooperation, critical and creative thinking, problem solving, and decision making. As students apply these skills to complex social studies problems that may or may not have solutions, they develop competencies integral to active democratic citizenship.

Skills learning outcomes (see page 12) are organized into four categories:

- Skills for Active Democratic Citizenship
- Skills for Managing Information and Ideas
- Critical and Creative Thinking Skills
- Communication Skills

In this document, a list of grade-specific skills appears at the beginning of the grade description. The skills are also integrated in each learning activity in every grade.

A continuum of social studies skills for Grades 5 to 8 is found in Appendix E.

Knowledge and Values Learning Outcomes

Knowledge learning outcomes and values learning outcomes are intended to complement one another. Both are presented under each of the six general learning outcomes at the beginning of a grade, and are also grouped according to essential ideas within the learning experiences.

Distinctive Learning Outcomes

Some specific learning outcomes are designated as distinctive learning outcomes for Aboriginal (First Nations, Inuit, and Métis) or francophone students. Distinctive learning outcomes complement the specific learning outcomes. They are intended to enhance the development of language, identity, culture, and community for Aboriginal and francophone students.

- Distinctive learning outcomes for **Aboriginal students** are intended for First Nations, Inuit, or Métis students in educational settings that include locally controlled First Nations schools, or settings where there are Aboriginal students, and where the school or school division has agreed that the distinctive learning outcomes be addressed. It is advisable that teachers selected to address the distinctive learning outcomes have a background in Aboriginal culture.
- Distinctive learning outcomes for **francophone students** are intended for students enrolled in schools where francophone programming has been developed within the context of Section 23 of the *Charter of Rights and Freedoms*.

DOCUMENT STRUCTURE

This document contains the following components:

- **Grade Overview:** A brief description of the content and focus of the grade is presented in the grade overview.
- **Cluster Descriptions:** The knowledge and values learning outcomes are organized into thematic groups referred to as clusters. The focus of each cluster is briefly described in the cluster descriptor.
- **General and Specific Learning Outcomes:** Skills, knowledge, and values specific learning outcomes are presented in the following order:
 - **Skills:** The skills learning outcomes are organized in four categories, and are intended to be integrated through each cluster.

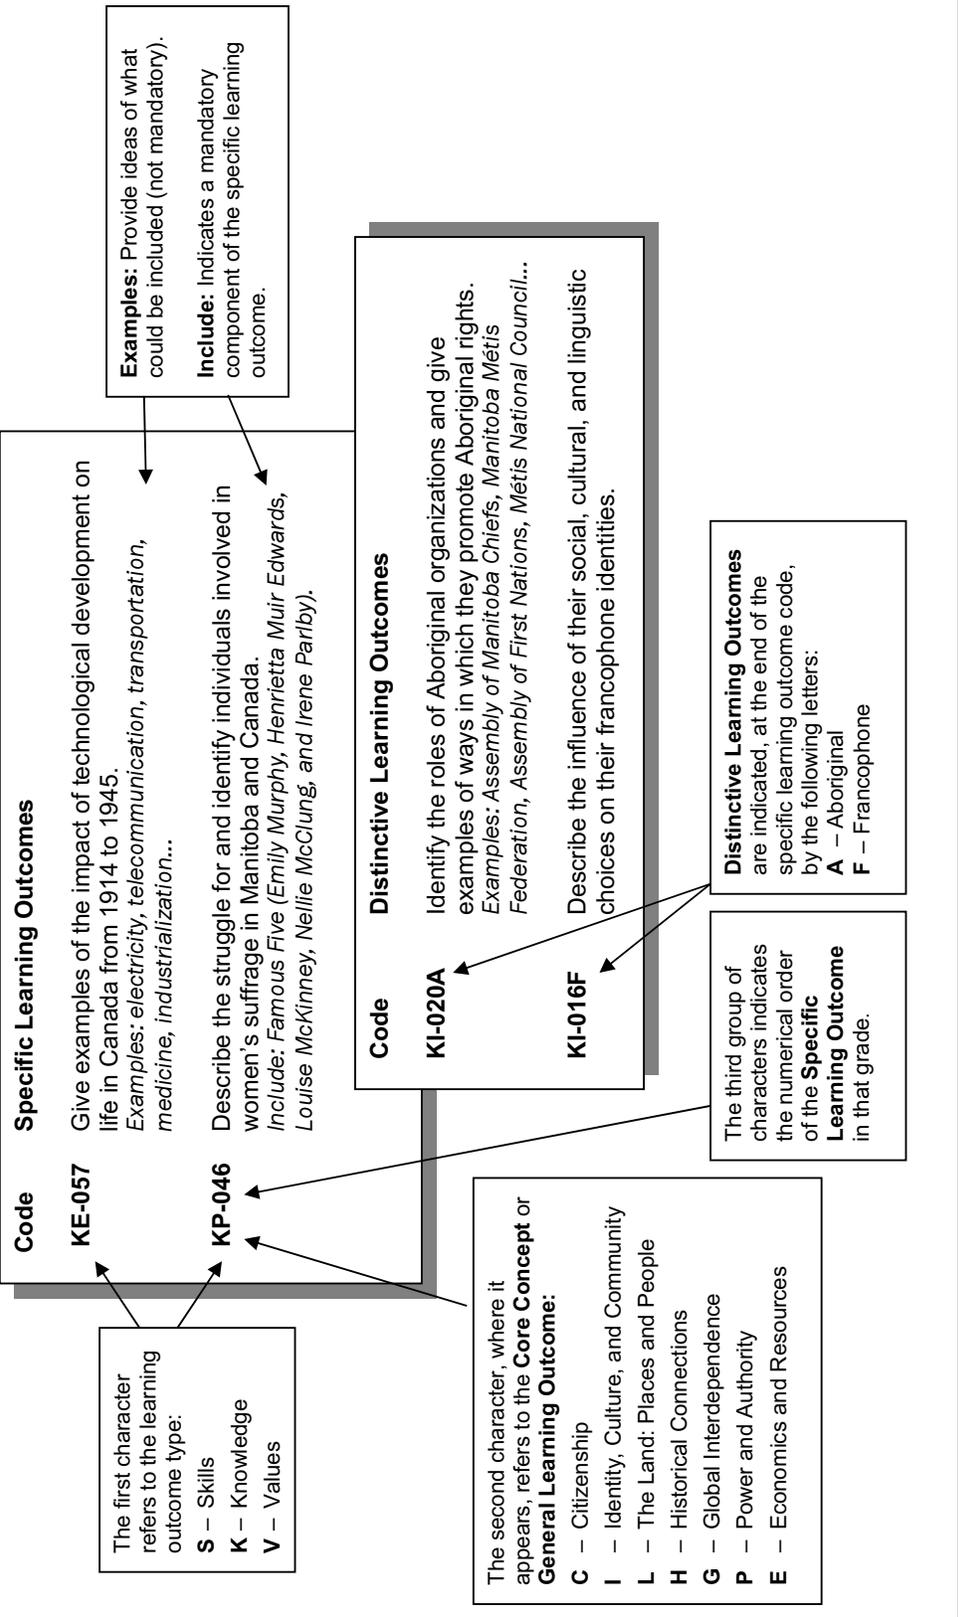

Overview

- **Knowledge and Values:** The knowledge- and values-specific learning outcomes are presented under the Core Concept Citizenship, and under each of the six general learning outcomes.
- **Cluster/Learning Experiences Overview:** The knowledge and values learning outcomes within each cluster have been divided into smaller groups of related outcomes, referred to as learning experiences. The overview page presents each learning experience with the related knowledge and values learning outcomes.
- **Learning Experiences:** Each learning experience provides a series of activating, acquiring, and applying strategies to address related knowledge and values learning outcomes, and contains the following components:
 - **Skills Progress Chart** (teacher tracking tool)
 - **Student Portfolio Tracking Chart** (student tool)
 - **Engaging Students in the Cluster** (strategies to activate the cluster)
 - **Skills Set** (an icon indicating the skills targeted in the learning activity)
 - **Suggested Student Portfolio Selections** (an icon indicating that a strategy may result in the creation of products, processes, or performances for inclusion in student portfolios)
 - **Knowledge and Values Learning Outcomes** (targeted outcomes)
 - **Description of the Learning Experience**
 - **Vocabulary List**
 - **Connecting and Reflecting** (end-of-cluster summative assessment activity)

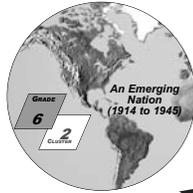

Kindergarten to Grade 8 Social Studies: Skill Categories and Cluster Titles

Grade	Kindergarten	Grade 1	Grade 2	Grade 3	Grade 4	Grade 5	Grade 6	Grade 7	Grade 8
	<i>Being Together</i>	<i>Connecting and Belonging</i>	<i>Communities in Canada</i>	<i>Communities of the World</i>	<i>Manitoba, Canada, and the North: Places and Stories</i>	<i>Peoples and Stories of Canada to 1867</i>	<i>Canada: A Country of Change (1867 to Present)</i>	<i>People and Places in the World</i>	<i>World History: Societies of the Past</i>
Skills Outcomes	Active Democratic Citizenship		Managing Information and Ideas			Critical and Creative Thinking			
Knowledge and Values Outcomes	Organized by Clusters Include the Core Concept Citizenship								
Cluster 1	Me	I Belong	Our Local Community	Connecting with Canadians	Geography of Canada	First Peoples	Building a Nation (1867-1914)	World Geography	Understanding Societies Past and Present
Cluster 2	The People around Me	My Environment	Communities in Canada	Exploring the World	Living in Canada	Early European Colonization (1600 to 1763)	An Emerging Nation (1914 to 1945)	Global Quality of Life	Early Societies of Mesopotamia, Egypt, or the Indus Valley
Cluster 3	The World around Me	Connecting with Others	The Canadian Community	Communities of the World	Living in Manitoba	Fur Trade	Shaping Contemporary Canada (1945 to Present)	Ways of Life in Asia, Africa, or Australasia	Ancient Societies of Greece and Rome
Cluster 4				Exploring an Ancient Society	History of Manitoba	From British Colony to Confederation (1763 to 1867)	Canada Today: Democracy, Diversity, and the Influence of the Past	Human Impact in Europe or the Americas	Transition to the Modern World (Circa 500 to 1400)
Cluster 5					Canada's North				Shaping the Modern World (Circa 1400 to 1850)

Guide to Reading the Learning Outcome Code

**Canada: A Country of Change (1867 to Present)
An Emerging Nation (1914 to 1945)**

Learning Experience: 6.2.1 World War I

- KC-003 Recognize Remembrance Day as a commemoration of Canadian participation in world conflicts.
- KH-036 Identify the prime ministers of Canada from 1914 to 1945 and give examples of their achievements.
- KG-039 Identify major causes and events of the First World War.
- KG-040 Describe Canada's involvement in the First World War and identify its impact on Canadian individuals and communities.
Include: internment of ethnocultural groups.

Title of the learning experience

Targeted specific learning outcomes

Description of the Learning Experience

International competition for power and military strength among European empires led to World War I, in which Canada was involved as both an ally and colony of Great Britain.

Students read and consult primary and secondary sources to develop an understanding of the main causes, events, and consequences of the First World War, focusing on Canada's role in supporting the Allied Powers.

Vocabulary: escalation, military alliances, imperialism, nationalism, conscription, internment, ethnocultural (See Appendix D for Vocabulary Strategies.)

A description of the focus of the learning experience

6.2.1 World War I

Assessment	Outcomes	Strategies

**CANADA: A COUNTRY OF CHANGE
(1867 TO PRESENT)**

**GRADE
6**

Grade Overview 42

Cluster Descriptions 43

Grade 6 Skills 44

Core Concept 48

General and Specific Learning Outcomes 49

Clusters:

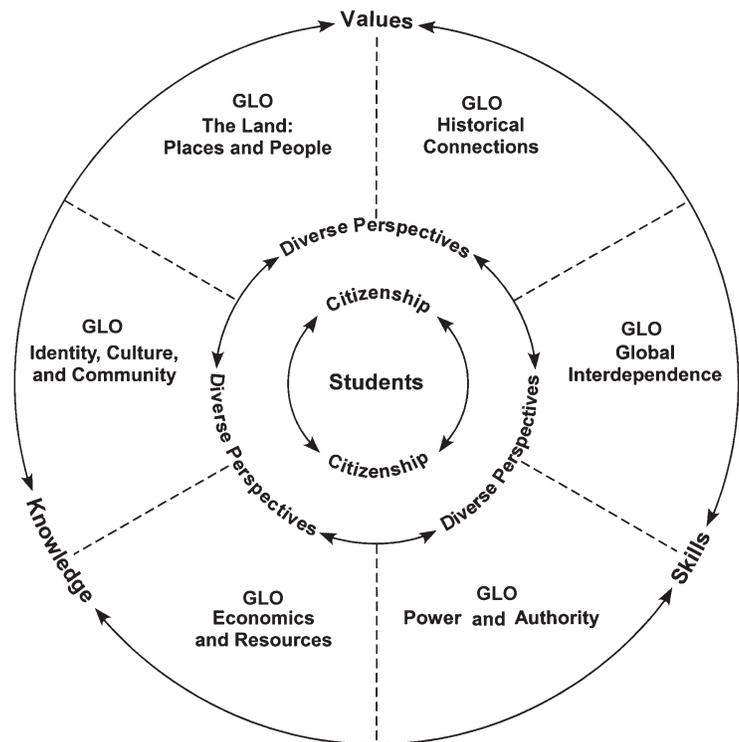

Cluster 1: Building a Nation (1867 to 1914) 55

Cluster 2: An Emerging Nation (1914 to 1945) 117

Cluster 3: Shaping Contemporary Canada (1945 to Present) 161

Cluster 4: Canada Today: Democracy, Diversity, and the Influence of the Past 193

GRADE 6 students focus on people and events in Canada from Confederation to the present. They explore the changing character of this country as they examine territorial expansion, the role of immigration, and the evolving relationships between First Nations, Inuit, and Métis peoples and the Canadian government. Students learn about democratic processes and study the emergence of Canada as a culturally diverse, bilingual, and democratic society. They focus on Canadian questions regarding the environment, citizenship, identity, and diversity. Students also consider contemporary world events that have shaped Canadian society. As they explore Canada’s past and present, they enhance their awareness of democratic ideals and their understanding of Canadian citizenship.

Cluster Descriptions

Cluster 1: Building a Nation (1867 to 1914)

Students examine life in post-Confederation Canada. They explore the expansion of Canada through the addition of new provinces and territories, including the influence of individuals and events of this time. Students focus on the entry of Manitoba into Confederation, establishment of treaties and reserves, building of railroads, role of the North West Mounted Police, the 1885 Northwest Resistance, and the gold rushes. Students consider the impact of immigration and hardships faced by new settlers. They also study cultural diversity, including the evolving relationships between First Nations, Inuit, and Métis peoples and the Canadian government, and relationships between anglophones and francophones.

Cluster 3: Shaping Contemporary Canada (1945 to Present)

Students explore factors that have shaped contemporary Canadian life. This study includes a focus on the impact of global events and forces, Canadian involvement in international organizations and world conflicts, and the impact of technological and industrial advancements. Students also study developments regarding Aboriginal rights and the evolution of Canada as a bilingual and multicultural nation.

Cluster 2: An Emerging Nation (1914 to 1945)

Students examine Canada as a newly emerging nation. This study includes a focus on the Winnipeg General Strike, the Depression, the causes and events of the two World Wars, and Canada's involvement in these wars. Students explore social, political, and economic changes that occurred during this period, such as women's suffrage, urbanization, and technological developments.

Cluster 4: Canada Today: Democracy, Diversity, and the Influence of the Past

Students explore Canadian governance, citizenship, and identity, and the ideals, responsibilities, and rights of democracy. This study includes a focus on electoral processes, as well as federal, provincial, First Nations, and municipal governments, and the responsibilities of elected representatives. Students examine issues related to the protection and expression of culture and identity and the role of various groups and organizations in the promotion of identity and democratic rights. Students also consider the influence of the natural environment, as well as the contributions of past generations in shaping modern-day Canada.

Active Democratic Citizenship

Citizenship skills enable students to develop good relations with others, to work in cooperative ways toward achieving common goals, and to collaborate with others for the well-being of their communities. These interpersonal skills focus on cooperation, conflict resolution, taking responsibility, accepting differences, building consensus, negotiation, collaborative decision making, and learning to deal with dissent and disagreement.

Students will...

S-100	Collaborate with others to establish and carry out group goals and responsibilities.	S-104	Negotiate constructively with others to build consensus and solve problems.
S-101	Use a variety of strategies to resolve conflicts peacefully and fairly. <i>Examples: clarification, negotiation, compromise...</i>	S-105	Recognize bias and discrimination and propose solutions.
S-102	Make decisions that reflect fairness and equality in their interactions with others.	S-106	Treat places and objects of historical significance with respect. <i>Examples: burial grounds, memorials, artifacts...</i>
S-103	Make decisions that reflect care, concern, and responsibility for the environment.		

Managing Information and Ideas

Information-management skills enable students to access, select, organize, and record information and ideas using a variety of sources, tools, and technologies. These skills include inquiry and research skills that enhance historical and geographical thinking.

Students will...

S-200	Select information from oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>	S-204	Create timelines and other visual organizers to sequence and represent historical figures, relationships, or chronological events.
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>	S-205	Construct maps that include a title, legend, compass rose, scale, and latitude and longitude.
S-202	Distinguish between primary and secondary information sources for research.	S-206	Select and interpret various types of maps for specific purposes.
S-203	Select and use appropriate tools and technologies to accomplish tasks.	S-207	Use latitude and longitude to locate and describe places on maps and globes.
		S-207A	Use traditional knowledge to read the land.
		S-208	Orient themselves by observing the landscape, using traditional knowledge, or using a compass or other tools and technologies.

Critical and Creative Thinking

Critical and creative thinking skills enable students to make observations and decisions, to solve problems, and to devise forward-thinking strategies. These skills involve making connections among concepts and applying a variety of tools. Critical thinking involves the use of criteria and evidence to make reasoned judgements. These judgements include distinguishing fact from opinion and interpretation, evaluating information and ideas, identifying perspectives and bias, and considering the consequences of decisions and actions. Creative thinking emphasizes divergent thinking, the generation of ideas and possibilities, and the exploration of diverse approaches to questions.

Students will...

S-300	Plan topics, goals, and methods for historical inquiry and research.	S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>
S-301	Evaluate the advantages and disadvantages of solutions to a problem.	S-307	Compare differing accounts of historical events.
S-302	Draw conclusions based on research and evidence.	S-308	Compare diverse perspectives in a variety of information sources.
S-303	Evaluate personal assumptions based on new information and ideas.	S-309	Interpret information and ideas in a variety of media. <i>Examples: art, music, historical fiction, drama, primary sources...</i>
S-304	Distinguish fact from opinion and interpretation.	S-310	Recognize that interpretations of history are subject to change as new information is uncovered or acknowledged.
S-305	Observe and analyze material and visual evidence for research. <i>Examples: artifacts, photographs, works of art...</i>		

Communication

Communication skills enable students to interpret and express ideas clearly and purposefully using a variety of media. These skills include the development of oral, visual, print, and media literacy, and the use of information and communication technologies for the exchange of information and ideas.

Students will...

S-400	Listen to others to understand their perspectives.	S-403	Present information and ideas orally, visually, concretely, or electronically.
S-401	Use language that is respectful of human diversity.	S-404	Elicit and clarify questions and ideas in discussions.
S-402	Persuasively express differing viewpoints regarding an issue.	S-405	Articulate their beliefs and perspectives on issues.

Core Concept: Citizenship

Students will develop the knowledge, skills, and values necessary to become responsible democratic citizens who are actively engaged in their local, national, and global communities.

Citizenship education is fundamental to living in a democratic society. A critical consideration of citizenship provides students with opportunities to explore democratic values, and to determine their responsibilities and rights as participants in civil society. Students explore the complexities of citizenship in Canada and in the global context, as well as environmental citizenship, and citizenship for the future.

This exploration of citizenship helps students develop the knowledge and skills they need to live with others, to understand social change, and to support and promote social well-being. As they engage in public dialogue and debate, students enhance their understanding of citizenship, and are empowered to be active democratic citizens who contribute to the local, national, and global communities to which they belong.

Students will...

KC-001	<p>Explain the significance of the British North America Act. <i>Examples: federal system of government, constitutional monarchy, British-style parliament...</i></p>	KC-004	<p>Identify the ideals of democracy and describe the influence of democracy on quality of life for Canadians.</p>
KC-002	<p>Compare responsibilities and rights of citizens of Canada at the time of Confederation to those of today. <i>Include: Aboriginal peoples, francophones, women.</i></p>	KC-005	<p>Identify rights and freedoms described in the 1982 Canadian Charter of Rights and Freedoms and explain why they are important.</p>
KC-003	<p>Recognize Remembrance Day as a commemoration of Canadian participation in world conflicts.</p>	KC-006	<p>Identify current issues related to citizenship in Canada.</p>

General and Specific Learning Outcomes

Identity, Culture, and Community

Students will explore the influence of culture and community on individuals and societies.

Many factors influence identity and life in communities, including culture, language, history, and shared beliefs and values. Identity is subject to time and place, and is shaped by a multiplicity of personal, social, and economic factors. A critical consideration of identity, culture, and community provides students with opportunities to explore the symbols and expressions of their own and others' cultural and social groups. Through a study of the ways in which people live together and express themselves in communities, societies, and nations, students enhance their understanding of diverse perspectives and develop their competencies as social beings. This process enables them to reflect upon their roles as individuals and citizens so as to become contributing members of their groups and communities.

The specific learning outcomes within Identity, Culture, and Community include concepts such as human interaction and interdependence, cultural diversity, national identities, and pluralism.

Students will...

KI-007	Give reasons for the establishment of treaties and reserves and describe their impact on individuals, families, and communities. <i>Examples: indigenous rights, no right to vote, permission needed to leave a reserve...</i>	KI-015F	Identify events surrounding the creation of the Division scolaire franco-manitobaine (DSFM). <i>Examples: Manitoba Schools Question, Bill 113, Article 23 of the Canadian Charter of Rights and Freedoms, the Mahé Ruling, the Manitoba Referral...</i>
KI-008	Identify various groups that immigrated to Canada in the late nineteenth and early twentieth centuries and give reasons for their emigration. <i>Examples: African-Americans, Asians, British, Central and Eastern Europeans, Icelanders...</i>	KI-016	Describe factors that shape personal and national identities and explain how they may coexist. <i>Examples: social, cultural, linguistic...</i>
KI-009	Describe ways in which immigration was encouraged by and important to the Canadian government from 1867 to 1914.	KI-016F	Describe the influence of their social, cultural, and linguistic choices on their francophone identities.
KI-010	Describe various challenges faced by new immigrants to Canada. <i>Examples: language, climate and environment, differing laws and customs, discrimination, physical and cultural isolation...</i>	KI-0017	Describe characteristics that define Canada as a country. <i>Examples: multicultural, bilingual, northern...</i>
KI-011	Describe daily life on a prairie homestead between 1890 and 1914. <i>Examples: survey system, role of women, challenges facing early settlers, education...</i>	KI-018	Give examples of ways in which the government helps protect Canadian identity. <i>Examples: Canadian content rules in the media; support for the Canadian Broadcasting Corporation and the arts...</i>
KI-012	Identify contributions of First Nations, Inuit, and Métis peoples to Canada's war efforts.	KI-019	Give examples from the arts and media that are expressions of Canadian culture and/or identity.
KI-013	Identify historical reasons for bilingual and multicultural policies in Canada.	KI-020	Identify various groups and organizations that may contribute to personal identity.
KI-013F	Describe the impact of the Affaire Forest on the linguistic rights of Franco-manitobains.	KI-020A	Identify the roles of Aboriginal organizations and give examples of ways in which they promote Aboriginal rights. <i>Examples: Assembly of Manitoba Chiefs, Manitoba Métis Federation, Assembly of First Nations, Métis National Council...</i>
KI-014	Identify changes and developments regarding Aboriginal rights in Canada from 1867 to the present. <i>Examples: suffrage, changes to Status and entitlement, self-governance, land claims, new treaties...</i>	KI-020F	Describe the role of francophone organizations and identify ways in which they promote francophone rights. <i>Examples: Société franco-manitobaine, Pluri-Elles...</i>
KI-015	Give examples of changes to francophone populations in Canada since Confederation. <i>Examples: characteristics, distribution...</i>	KI-021	Identify various individuals from Canada's past and present, and describe their achievements.

The Land: Places and People

Students will explore the dynamic relationships of people with the land, places, and environments.

People exist in dynamic relationships with the land. The exploration of people's relationships with places and environments creates an understanding of human dependence and impact upon the natural environment. Students explore how spatial and physical characteristics of the environment affect human life, cultures, and societies. They consider how connections to the land influence their identities and define their roles and responsibilities as citizens, locally, nationally, and globally.

The specific learning outcomes within The Land: Places and People focus on geographic understanding and skills, and concepts such as sustainability, stewardship, and the relationship between people and the land.

Students will...

KL-022 Locate on a map of Canada the major landforms and bodies of water.

KL-023 Locate on a map the major settlements of Rupert's Land and the original provinces of Canada in 1867.

KL-024 Give examples of the influence of the natural environment on daily life for various groups during the Depression.

KL-025 Locate on a map of Canada the provinces, territories, and capital cities.

KL-026 Describe the influence of the natural environment on life in Canada.

KL-026A Describe the influence of the land on their First Nation, Inuit, or Métis identity.
Examples: values, beliefs, traditions, customs, art, clothing...

General and Specific Learning Outcomes

Historical Connections

Students will explore how people, relationships, events, and ideas of the past shape the present and influence the future.

The past shapes who we are. An exploration of Canadian and world history enables students to acquire knowledge and appreciation of the past, to understand the present, and to live with regard for the future. An important aspect of this process is the disciplined investigation and interpretation of history. Students learn to think historically as they explore people, events, ideas, and evidence of the past. As they reflect upon diverse perspectives, personal narratives, parallel accounts, and oral and social histories, students develop the historical understanding that provides a foundation for active democratic citizenship.

The specific learning outcomes within Historical Connections enable students to develop an interest in the past, and to focus on chronological thinking, historical understanding, and concepts such as progress, decline, continuity, and change.

Students will...

KH-027	Identify individuals and events connected with Manitoba's entry into Confederation. <i>Include: Louis Riel, Red River Resistance, Métis Bill of Rights, provisional government.</i>	KH-033	Identify factors leading to the entry into Confederation of Manitoba, Northwest Territories, British Columbia, Prince Edward Island, Yukon, Saskatchewan, Alberta, Newfoundland and Labrador, and Nunavut, and specify the year of entry.
KH-027F	Identify the roles of Father Noël-Joseph Ritchot and Archbishop Alexandre-Antonin Taché in Manitoba's entry into Confederation.	KH-034	Identify the prime ministers of Canada from 1867 to 1914 and give examples of their achievements.
KH-028	Identify causes, events, individuals, and consequences of the 1885 Resistance.	KH-035	Describe the causes, main events, and results of the 1919 Winnipeg General Strike.
KH-029	Describe the role of the North West Mounted Police.	KH-036	Identify the prime ministers of Canada from 1914 to 1945 and give examples of their achievements.
KH-030	Relate stories about the gold rushes and describe the impact of the gold rushes on individuals and communities. <i>Examples: Fraser River, Cariboo, Klondike...</i>	KH-037	Describe changing roles for women in Canada from 1914 to 1945.
KH-031	Identify events and issues related to the construction of the Canadian Pacific Railway. <i>Examples: workers and working conditions, Chinese labourers, construction difficulties, mapping Canada...</i>	KH-038	Identify the prime ministers of Canada from 1945 to the present and give examples of their achievements.
KH-032	Identify contributions of Aboriginal leaders from 1867 to 1914. <i>Examples: Gabriel Dumont, Mistahimaskwa (Big Bear), Pitikwahanapiwiyin (Poundmaker), Isapomuxika (Crowfoot)...</i>		

Global Interdependence

Students will explore the global interdependence of people, communities, societies, nations, and environments.

People, communities, societies, nations, and environments are interdependent. An exploration of this interdependence enhances students' global consciousness and helps them develop empathy with respect to the human condition. Students critically consider diverse perspectives as they examine the connections that link local, national, and global communities. Consideration of global connections enables students to expand their knowledge of the world in which they live and to engage in active democratic citizenship.

The specific learning outcomes within Global Interdependence focus on human rights and responsibilities, diversity and commonality, quality of life and equity, globalization, international cooperation and conflict, and global environmental concerns.

Students will...

KG-039	Identify major causes and events of the First World War.	KG-044	Give examples of global events and forces that have affected Canadians from 1945 to the present. <i>Examples: international cooperation, relief efforts, disease, environmental changes, famine, refugee movement...</i>
KG-040	Describe Canada's involvement in the First World War and identify its impact on Canadian individuals and communities. <i>Include: internment of ethnocultural groups.</i>	KG-045	Give examples of Canada's participation in the United Nations and other international organizations. <i>Examples: the Commonwealth, La Francophonie, Organization of American States...</i>
KG-041	Identify major causes and events of the Second World War.	KG-047	Give examples of Canada's connections to other regions of the world. <i>Examples: environmental, social, political, economic...</i>
KG-042	Describe Canada's involvement in the Second World War and identify its impact on Canadian individuals and communities. <i>Include: internment of ethnocultural groups; the Holocaust.</i>		
KG-043	Give examples of Canada's involvement in world conflicts since 1945. <i>Examples: Korean War, Cold War, Gulf War, Bosnia, Afghanistan, international peacekeeping...</i>		

General and Specific Learning Outcomes

Power and Authority

Students will explore the processes and structures of power and authority, and their implications for individuals, relationships, communities, and nations.

Power and authority influence all human relationships. Students critically examine the distribution, exercise, and implications of power and authority in everyday life and in formal settings. They consider diverse forms of governance and leadership, and inquire into issues of fairness and equity. This exploration helps students develop a sense of personal empowerment as active democratic citizens.

The specific learning outcomes within Power and Authority include concepts such as political structures and decision making, governance, justice, rules and laws, conflict and conflict resolution, and war and peace.

Students will...

KP-046	Describe the struggle for and identify individuals involved in women’s suffrage in Manitoba and Canada. <i>Include: Famous Five (Emily Murphy, Henrietta Muir Edwards, Louise McKinney, Nellie McClung, and Irene Parlby).</i>	KP-052	Identify the main responsibilities of municipal, provincial, First Nations, and federal governments in Canada.
KP-048	Identify First Nations, Inuit, and Métis perspectives regarding self-determination. <i>Examples: resource use, land claims, treaties, government...</i>	KP-053	Identify elected or appointed municipal, provincial, and federal government representatives and describe their main responsibilities. <i>Include: Governor General, Manitoba Lieutenant-Governor.</i>
KP-049	Describe the main features of the Canadian government. <i>Include: parliamentary system, federal democracy.</i>	KP-053A	Identify and describe the main responsibilities of elected representatives of their Aboriginal community.
KP-050	Define the term political party and identify political parties and their leaders in Canada.	KP-054	Identify factors that contribute to inequities in Canada and propose solutions. <i>Examples: poverty, racism, sexism...</i>
KP-051	Describe characteristics of the electoral processes in Canada.		

Economic and Resources

Students will explore the distribution of resources and wealth in relation to individuals, communities, nations, and the natural environment.

The management and distribution of resources and wealth have a direct impact on human societies and quality of life. Students explore the effects of economic interdependence on individuals, communities, and nations in the global context. They examine economic factors that affect decision making, the use of resources, and the development of technologies. As students explore diverse perspectives regarding human needs, wants, and quality of life, they critically consider the social and environmental implications of the distribution of resources and technologies, locally, nationally, and globally.

The specific learning outcomes within Economics and Resources include concepts such as trade, commerce, and industry, access to resources, economic disparities, economic systems, and globalization.

Students will...

KE-055	Explain the importance of agriculture in the development of Canada from 1867 to 1914.	KE-058	Give examples of ways in which industry and technology have changed life in Canada since 1945. <i>Examples: urbanization, transportation, communication, education...</i>
KE-056	Relate stories of the Depression and describe its impact on Canada. <i>Examples: changes in agricultural practices, development of the social safety net, new political parties...</i>	KE-059	Give examples of inventions and technologies created in Canada. <i>Examples: kayaks, snowmobiles, Canadarm, insulin, canola...</i>
KE-057	Give examples of the impact of technological development on life in Canada from 1914 to 1945. <i>Examples: electricity, telecommunication, transportation, medicine, industrialization...</i>		

Canada: A Country of Change (1867 to Present)

Building a Nation (1867 to 1914)

1
CLUSTER

GRADE
6

Cluster 1

Learning Experiences: Overview

6.1.1 A New Nation

KC-001 Explain the significance of the British North America Act.

Examples: federal system of government, constitutional monarchy, British-style parliament...

KC-002 Compare responsibilities and rights of citizens of Canada at the time of Confederation to those of today.

Include: Aboriginal peoples, francophones, women.

KL-022 Locate on a map of Canada the major landforms and bodies of water.

KL-023 Locate on a map the major settlements of Rupert's Land and the original provinces of Canada in 1867.

VC-001 Appreciate the rights afforded by Canadian citizenship.

6.1.2 Manitoba Enters Confederation

KH-027 Identify individuals and events connected with Manitoba's entry into Confederation.

Include: Louis Riel, Red River Resistance, Métis Bill of Rights, provisional government.

KH-027F Identify the roles of Father Noël-Joseph Ritchot and Archbishop Alexandre-Antonin Taché in Manitoba's entry into Confederation.

KH-033 Identify factors leading to the entry into Confederation of Manitoba, Northwest Territories, British Columbia, Prince Edward Island, Yukon, Saskatchewan, Alberta, Newfoundland and Labrador, and Nunavut, and specify the year of entry.

VH-012 Value the diverse stories and perspectives that comprise the history of Canada.

6.1.3 “A mari usque ad mare” [From Sea to Sea]

KH-029 Describe the role of the North West Mounted Police.

KH-030 Relate stories about the gold rushes and describe the impact of the gold rushes on individuals and communities.

Examples: Fraser River, Cariboo, Klondike...

KH-031 Identify events and issues related to the construction of the Canadian Pacific Railway.

Examples: workers and working conditions, Chinese labourers, construction difficulties, mapping Canada...

KH-033 Identify factors leading to the entry into Confederation of Manitoba, Northwest Territories, British Columbia, Prince Edward Island, Yukon, Saskatchewan, Alberta, Newfoundland and Labrador, and Nunavut, and specify the year of entry.

KH-034 Identify the prime ministers of Canada from 1867 to 1914 and give examples of their achievements.

6.1.4 Aboriginal Peoples and the Growing Nation of Canada

KI-007 Give reasons for the establishment of treaties and reserves and describe their impact on individuals, families, and communities.

Examples: indigenous rights, no right to vote, permission needed to leave a reserve...

KH-028 Identify causes, events, individuals, and consequences of the 1885 Resistance.

KH-032 Identify contributions of Aboriginal leaders from 1867 to 1914.

Examples: Gabriel Dumont, Mistahimaskwa (Big Bear), Pitikwahanapiwiyyin (Poundmaker), Isapomuxika (Crowfoot)...

6.1.5 Immigration

KI-008 Identify various groups that immigrated to Canada in the late nineteenth and early twentieth centuries and give reasons for their emigration.

Examples: African-Americans, Asians, British, Central and Eastern Europeans, Icelanders...

KI-009 Describe ways in which immigration was encouraged by and important to the Canadian government from 1867 to 1914.

KI-010 Describe various challenges faced by new immigrants to Canada.

Examples: language, climate and environment, differing laws and customs, discrimination, physical and cultural isolation...

KH-034 Identify the prime ministers of Canada from 1867 to 1914 and give examples of their achievements.

VI-005 Appreciate the importance of immigration in the development of Canada.

6.1.6 Farming the Land

KI-011 Describe daily life on a prairie homestead between 1890 and 1914.

Examples: survey system, role of women, challenges facing early settlers, education...

KE-055 Explain the importance of agriculture in the development of Canada from 1867 to 1914.

VL-010 Appreciate the efforts of people in early Canada to overcome environmental hardships.

VE-018 Appreciate the importance of agriculture in the development of Canada.

Cluster Assessment: Tools and Processes

- **Engaging Students in the Cluster:** suggested strategies to activate the cluster and help teachers assess student prior knowledge.
-  **Suggested Portfolio Selections:** this icon is attached to strategies that may result in products, processes, or performances for inclusion in student portfolios.
- **Student Portfolio Tracking Chart:** this chart is designed for students to track their portfolio selections throughout the cluster. It is located in Appendix D.
-  **Skills Set:** this icon identifies the skills that may be targeted for assessment during each strategy, and provides suggestions for that assessment.
- **Skills Checklist:** this teacher tool lists every skill outcome for a particular grade. It is intended to track individual student progress related to skills in each cluster and throughout the grade. It is located in Appendix D.
- **Connecting and Reflecting:** the end-of-cluster summative assessment activity.

Cluster Description

Students examine life in post-Confederation Canada. They explore the expansion of Canada through the addition of new provinces and territories, including the influence of individuals and events of this time. Students focus on the entry of Manitoba into Confederation, establishment of treaties and reserves, building of railroads, role of the North West Mounted Police, the 1885 Resistance, and the gold rushes. Students consider the impact of immigration and hardships faced by new settlers. They also study cultural diversity, including the evolving relationships between First Nations, Inuit, and Métis peoples and the Canadian government, and relationships between anglophones and francophones.

Engaging Students in the Cluster

- Create a mapping centre showing what Canada looked like in 1867, 1914, and the present.
- Post a timeline on one wall of the classroom that will be completed as the cluster (and year) progresses.
- Create a bulletin board Word Splash with words and/or pictures of ideas that will be studied in this cluster (e.g., gold rush, North West Mounted Police, First Nations treaties...).
- Create a book display with stories and information about Confederation.
- View videos that depict the time of Confederation, the 1885 Resistance, the gold rush, and other important events.
- Simulate a treasure hunt or “Gold Rush Expedition” to stimulate student thinking about the life and times of people in the gold rush.
- Designate a day for students to dress in pioneer clothing.
- Students listen to or read stories of hardships faced by the immigrants.
- Invite an Aboriginal Elder or a new immigrant to the class to share his or her stories.
- Create a bulletin board display with samples of treaties, as well as maps of the areas that the treaties covered.
- Create a visual display of images of First Nations, Inuit, and Métis people alongside a display of images of European immigrants to show diversity of the different cultural groups.

Description of the Learning Experience

Students review the 1867 map of Canada and consider what government and citizenship were like in the new nation as compared to today. This is a transitional learning experience that reviews Canadian geography, the history of Confederation, and citizenship concepts that were studied in Grade 5.

Vocabulary: constitutional monarchy, federal system, parliament, BNA Act, responsibilities and rights, citizenship, geography (See Appendix D for Vocabulary Strategies.)

Note: In this document, the expression “rights and responsibilities” has deliberately been reordered to read “responsibilities and rights.” This has been done for several reasons:

- Firstly, to emphasize that human rights within a particular society or polity can only be meaningful and powerful if there is a social contract that promotes an understanding of the principles of reciprocity and inclusion, and if there is a willingness for all individuals to comply with both the spirit and intent of human rights legislation. Human rights legislation and protections become powerful when all members of a society collectively accept the responsibility to implement rights, and behave in ways that are informed by an awareness of the universality of human rights.
- Secondly, the application of human rights to everyday life, within organizations and the political/legal system, is a complex process that often requires a balancing of the rights of different groups. Often, there is a need to balance the rights of one individual with those of other individuals, or to balance individual rights with group rights, or to balance the rights of a particular group with other groups. It is important, therefore, to consider the rights of an individual or a particular group with the countervailing rights of other individuals and/or groups. For example, an individual's right to free speech and freedom of expression may need to be restrained when the speech or expression impinges on the rights of other individuals to be protected from racial discrimination and harassment.
- Lastly, the change in word order is intended to place more emphasis on the idea of human rights as an essential part of responsible citizenship. Every member of a democratic society has an individual and a collective responsibility to interact and behave towards others in ways that demonstrate understanding and commitment to the protection of human rights for every member of that society. All too often there is a tendency, particularly in adolescents living in a litigious society, to consider human rights from an egocentric or self-centred perspective (that is, as a personal entitlement rather than a concern for the well-being of all citizens). Numerous examples exist in everyday life and in the courts where individuals demand that their rights be recognized and yet fail to respect and protect the rights of other individuals or groups. Human rights exist to protect individual rights; however, they exist within a social context and have the attendant responsibility of considering and protecting the rights of others.

6.1.1 A New Nation

Assessment	Outcomes	Strategies
	KC-001 KC-002 VC-001	<p>Activate</p> <p>Using a Word Sort, collaborative groups of students review the structure of government following Confederation. Students use arrows, symbols, descriptions, and links to describe relationships between the key features of government under the British North America (BNA) Act (e.g., British parliamentary model, federal system, constitutional monarchy...). Students share completed Word Sorts with peers.</p> <p>NOTE: Students were introduced to the concept of federal government and the parliamentary system at the end of Grade 5. Students may revisit their Word Sorts throughout this learning experience to clarify misconceptions and add detail.</p> <p> BLM: Government in 1867</p>
		<p>or</p>
	KC-001 KL-022 KL-023	<p>Students view a series of maps of the Canadian territory from 1791 to 1999. Students record their observations of changes in the territory and discuss factors that influenced these changes over time.</p> <p>TIP: It may be useful to review what the students recall about Confederation, which they studied in Grade 5. Encourage them to view Confederation as an ongoing process of union rather than as a one-time event in history. The Library and Archives Canada website “Confederation for Kids” has 14 maps of Canada that span the time period from 1791 to 1999.</p> <p> Supporting websites can be found at <http://www3.edu.gov.mb.ca/cn/links/ss></p>
		<p>or</p>
	KC-001 KC-002 KL-022 KL-023 VC-001	<p>Students listen to the song “Canadian Railroad Trilogy” by Gordon Lightfoot, and record references to the land and the challenges of building the railroad. Students discuss the influence of the land on the dream of a nation extending from sea to sea.</p> <p> Supporting websites can be found at <http://www3.edu.gov.mb.ca/cn/links/ss></p> <p> BLM: Canadian Railroad Trilogy (2 pages)</p>

Students include images and maps to illustrate the changing nature of Canada.</p>
Teacher Reflections		

Learning Experience: 6.1.2 Manitoba Enters Confederation

- KH-027 Identify individuals and events connected with Manitoba's entry into Confederation.
Include: Louis Riel, Red River Resistance, Métis Bill of Rights, provisional government.

- KH-027F Identify the roles of Father Noël-Joseph Ritchot and Archbishop Alexandre-Antonin Taché in Manitoba's entry into Confederation.

- KH-033 Identify factors leading to the entry into Confederation of Manitoba, Northwest Territories, British Columbia, Prince Edward Island, Yukon, Saskatchewan, Alberta, Newfoundland and Labrador, and Nunavut, and specify the year of entry.

- VH-012 Value the diverse stories and perspectives that comprise the history of Canada.
Note: Aboriginal and francophone learning outcomes are not intended for all students (see page 36 of the overview).

Description of the Learning Experience

Manitoba, initially formed as a provisional government of the people in the Red River Settlement under Louis Riel, negotiated to enter Confederation as a province in 1870.

Students research and discuss events leading to Manitoba's entry into Confederation, considering diverse points of view about Canadian expansion and its effects on the people living in the Northwest.

Vocabulary: resistance, provisional government, Bill of Rights, amnesty, Confederation (See Appendix D for Vocabulary Strategies.)

6.1.2 Manitoba Enters Confederation

Assessment	Outcomes	Strategies
	KH-027 KH-033 VH-012	<p>Activate</p> <p>Students brainstorm individuals, events, and factors connected with Manitoba's entry into Confederation. Students discuss additional questions they have and record these on chart paper.</p> <p>NOTE: Students were introduced to the history of Manitoba in Grade 4, Cluster 4 (Louis Riel, Selkirk settlers). In Grade 5 they explored the fur trade, the rise of the Métis nation, and conflict between agricultural settlers and fur traders. This activity will help make connections to what they already know, and offers an opportunity to clear up misconceptions.</p> <p style="text-align: right;"><i>(continued)</i></p>

Building a Nation (1867 to 1914)

6.1.2 Manitoba Enters Confederation

Assessment	Outcomes	Strategies
Activate <i>(continued)</i>		
— or —		
	KH-027 KH-033 VH-012	<p>Collaborative groups of students read the Métis Bill of Rights of 1870. Students discuss its key points and speculate why they were important to the Métis people, and what the bill tells us about the population and life in the Red River Settlement at the time of Confederation.</p> <p>NOTE: In the course of the negotiations to enter Confederation, there were four different drafts prepared of this list of rights. The version cited here is the initial draft. The main purposes of each draft were similar: responsible government; representation in Ottawa; protection of language, religion, and culture; and security of Métis land rights and river lots. A later version also included a request for amnesty for all participants in the Resistance, but this pardon was not granted.</p> <p> Supporting websites can be found at <http://www3.edu.gov.mb.ca/cn/links/ss></p> <p> BLM: Métis Bill of Rights</p>
— or —		
	KH-027 KH-033 VH-012	<p>Students view a map of Canada in 1867 and in 1870, after Manitoba’s entry into Confederation, and share their observations (e.g., the size and location of the territory, who lived there at that time, what happened to Rupert’s Land...). Students discuss why Manitoba entered Confederation at that time and why the map of Manitoba looked different than our present-day map.</p> <p>TIP: Encourage students to recall some of the factors that motivated Confederation in 1867 (i.e., fear of American expansion into the Northwest, a vision of a railway connecting the east and west coasts...). Students should also bring to mind their knowledge of the issues being faced by the Métis nation in the West (i.e., changes to traditional lifestyle due to the depletion of the buffalo, increased reliance on agriculture and permanent settlement, and fear of loss of culture and language due to the influx of English-speaking immigrants).</p> <p> Supporting websites can be found at <http://www3.edu.gov.mb.ca/cn/links/ss></p>

6.1.2 Manitoba Enters Confederation

Assessment	Outcomes	Strategies
Apply <i>(continued)</i>		
— or —		
 	KH-027 KH-033 VH-012	Students view a <i>Heritage Minute</i> about Louis Riel on the gallows and write a journal response to the video describing Riel’s values and beliefs and how he helped Manitoba enter the Canadian Confederation. NOTE: In a later learning experience, students will be studying in greater detail Riel’s involvement in the Northwest Resistance at Batoche and his trial.  Supporting websites can be found at < http://www3.edu.gov.mb.ca/cn/links/ss >
— or —		
	KH-027 KH-033 VH-012	Students assume the role of an individual connected with Manitoba’s entry into Confederation (e.g., Louis Riel, John A. Macdonald, Honourable George-Étienne Cartier, Father Noël-Joseph Ritchot, Selkirk settler...), and prepare and present a persuasive speech presenting their point of view. Students include details related to the actions of the Métis, the Government of Canada, and immigrants living in the Selkirk settlement, and describe, from their chosen perspective, how they feel about Manitoba’s entry into Confederation.
— or —		
	KH-027 KH-033 VH-012	Students create annotated illustrations to post on the class timeline, illustrating significant individuals and events from this period in Canadian history (e.g., Confederation, Sir John A. Macdonald becomes Prime Minister, sale of Rupert’s Land to Canada, provisional government in Manitoba, Manitoba becomes a province...). Students may add maps to the timeline illustrating the addition of new provinces and territories to the Canadian Confederation. TIP: Timelines help students imagine and visualize events of the past, and to better understand abstract concepts related to history and chronology. Consider devoting one section of a full wall to the creation of a class timeline, which will continue to grow throughout the year as students add annotated illustrations of the events as they are studied (or at the end of each cluster). Mount a strip of large roll paper and mark off increments of 10 years from 1876 to the present. Design a template or model (which may be developed by the class) to use throughout the year for illustrating key events. The class timeline should be used as a continuous visual reference to which all students should contribute. Encourage students to be creative but emphasize the need to plan before posting events so that the display remains clear and easy to use.

	KH-027 KH-033 VH-012	Collaborative groups of students create a multimedia presentation illustrating factors leading to the entry into Confederation of provinces and territories after 1870. Students include images and descriptions of key individuals, stories, and events, and the specific years of entry into Confederation. Compile group presentations in a class presentation.
Teacher Reflections		

Learning Experience: 6.1.3 “A mari usque ad mare” [From Sea to Sea]

- KH-029 Describe the role of the North West Mounted Police.

- KH-030 Relate stories about the gold rushes and describe the impact of the gold rushes on individuals and communities.
Examples: Fraser River, Cariboo, Klondike...

- KH-031 Identify events and issues related to the construction of the Canadian Pacific Railway.
Examples: workers and working conditions, Chinese labourers, construction difficulties, mapping Canada...

- KH-033 Identify factors leading to the entry into Confederation of Manitoba, Northwest Territories, British Columbia, Prince Edward Island, Yukon, Saskatchewan, Alberta, Newfoundland and Labrador, and Nunavut, and specify the year of entry.

- KH-034 Identify the prime ministers of Canada from 1867 to 1914 and give examples of their achievements.

Description of the Learning Experience

John A. Macdonald’s dream of a country extending from sea to sea, joined by a railway, shaped Canada’s expansion and continues to influence our vision of Canada.

Students gather and share information about the gold rushes, the building of the Canadian Pacific Railway, and the establishment of Canadian authority in the provinces of northwestern Canada in the late 1800s. They reflect on the factors that shaped national expansion and examine the successive phases of Confederation.

Vocabulary: tariffs, annexation, national policy, NWMP/RCMP (See Appendix D for Vocabulary Strategies.)

Teacher Reflections		

Learning Experience: 6.1.4 Aboriginal Peoples and the Growing Nation of Canada

- KI-007 Give reasons for the establishment of treaties and reserves, and describe their impact on individuals, families, and communities.
Examples: indigenous rights, no right to vote, permission needed to leave a reserve...

- KH-028 Identify causes, events, individuals, and consequences of the 1885 Northwest Resistance.

- KH-032 Identify contributions of Aboriginal leaders from 1867 to 1914.
Examples: Gabriel Dumont, Mistahimaskwa (Big Bear), Pitikwahanapiwiyin (Poundmaker), Isapomuxika (Crowfoot)...

Description of the Learning Experience

As Canada expanded and colonized farther west and north, Aboriginal peoples were displaced and their ways of life were disrupted and transformed.

Students consider the consequences of Canadian expansion on Aboriginal people, including treaties and reserves. They conduct research into the lives and contributions of Aboriginal leaders from 1867 to 1914, and examine the causes and consequences of the Northwest Resistance of 1885.

Vocabulary: treaties, reserves, assimilation (See Appendix D for Vocabulary Strategies.)

6.1.4 Aboriginal Peoples and the Growing Nation of Canada

Assessment	Outcomes	Strategies
	KI-007	<p>Activate</p> <p>Students brainstorm examples of everyday encounters involving agreements and promises, and give examples of instances they have been involved in when there was a misunderstanding about what had been promised. Students generate explanations as to how and why misunderstandings can arise, and potential consequences. Students apply these ideas to the question of First Nations treaties, and brainstorm misunderstandings that might have arisen in the signing of treaties.</p> <p style="text-align: right;"><i>(continued)</i></p>

Teacher Reflections

Learning Experience: 6.1.5 Immigration

- KI-008 Identify various groups that immigrated to Canada in the late 19th and early 20th centuries, and give reasons for their emigration.
Examples: African-Americans, Asians, British, Central and Eastern Europeans, Icelanders...

- KI-009 Describe ways in which immigration was encouraged by and important to the Canadian government from 1867 to 1914.

- KI-010 Describe various challenges faced by new immigrants to Canada.
Examples: language, climate and environment, differing laws and customs, discrimination, physical and cultural isolation...

- KH-034 Identify the prime ministers of Canada from 1867 to 1914 and give examples of their achievements.

- VI-005 Appreciate the importance of immigration in the development of Canada.

Description of the Learning Experience

Canadian society was radically transformed by the arrival of large numbers of immigrants of various ethnic groups in western Canada in the late 19th and early 20th centuries.

Using primary and secondary sources, videos, statistics, and information about Canadian government policies, students gather information about various groups who immigrated to Canada in the late 19th and early 20th centuries. They share their information through a variety of simulations, role-plays, and discussions.

Vocabulary: immigration policy, push and pull factors, discrimination (See Appendix D for Vocabulary Strategies.)

6.1.5 Immigration

Assessment	Outcomes	Strategies
	KI-008	<p>Activate</p> <p>Students brainstorm a list of reasons why people may choose to move to and settle in another country. The reasons are recorded on chart paper, and sorted as “pull factors” (i.e., the factors that attract people to a given country), and “push factors” (i.e., the reasons that motivate people to leave their country of origin). Students discuss what they believe to be the most significant of each type of factor, compiling a collective list.</p> <p style="text-align: right;"><i>(continued)</i></p>

Student brochures should reflect the approach to immigration used by the federal government at that time.</p> <p>TIP: Develop with the class a list of criteria before they develop their brochures. Although the materials must include some factual information, students may also be given some licence here, as was done in the historical campaign, for promotional purposes. Students may afterward analyze the works of their peers, distinguishing “fact” (e.g., <i>after three years, the land is yours, if you develop and farm it</i>) from marketing tactics (e.g., <i>come to the land of guaranteed crops</i>).</p>
— or —		
 	KI-008 KI-009 KI-010 VI-005	<p>Collaborative groups of students prepare and present a short dramatic re-enactment of the voyage of a group of immigrants by ship and then by train to a homestead in western Canada.</p> <p>TIP: Caution students to avoid cultural stereotyping, and to instead focus on the various challenges faced by new immigrants, including weather, scarcity of amenities they would have had in their home countries, and the (possible) unwelcoming reception by Canadians who may have been opposed to this influx of immigrants who did not speak English and did not know the customs of the land.</p>
Teacher Reflections		

Learning Experience: 6.1.6 Farming the Land

- KI-011 Describe daily life on a prairie homestead between 1890 and 1914.
Examples: survey system, role of women, challenges facing early settlers, education...

- KE-055 Explain the importance of agriculture in the development of Canada from 1867 to 1914.

- VE-018 Appreciate the importance of agriculture in the development of Canada.

- VL-010 Appreciate the efforts of people in early Canada to overcome environmental hardships.

Description of the Learning Experience

Agriculture has played an important role in Canadian history and has defined the experiences and ways of life of many Canadians.

Students research prairie homesteads and the role of agriculture in Canada, using a variety of primary and secondary sources including images and literature. Through role-plays, creative writing, and the creation of simulations and models, they share their learning with each other.

Vocabulary: homestead

VL-010

Collaborative groups of students read aloud a poem or a literary extract about daily life on a prairie homestead. They highlight the words in the poem that describe daily life and the hardships encountered by homesteaders.

SUGGESTED POEMS:

- See BLM 6.1.6c: Prairie Verses for an early prairie poem.
- “The Alberta Homesteader,” as recorded on page 115 of the Teachers’ Resource Book *My Country, Our History*.
- Students may also read a selection from Nellie McClung’s autobiography (1873–1951) *Clearing in the West: My Own Story*. McClung was born in Ontario, and her family moved to Manitou, Manitoba as pioneer homesteaders in 1880. She worked as a teacher in Manitoba before becoming involved in the suffrage movement and political life.
- Students may also select a passage from one of the books of Laura Ingalls Wilder’s *Little House on the Prairie* series. Although the author was American, the time frame and natural environment (i.e., the Midwestern prairie) are fitting, and the historical details are considered to be very authentic.

Cluster 2

Learning Experiences: Overview

6.2.1 World War I

KC-003 Recognize Remembrance Day as a commemoration of Canadian participation in world conflicts.

KH-036 Identify the prime ministers of Canada from 1914 to 1945 and give examples of their achievements.

KG-039 Identify major causes and events of the First World War.

KG-040 Describe Canada's involvement in the First World War and identify its impact on Canadian individuals and communities.
Include: internment of ethnocultural groups.

6.2.2 Social Change

KH-035 Describe the causes, main events, and results of the 1919 Winnipeg General Strike.

KH-037 Describe changing roles for women in Canada from 1914 to 1945.

KP-046 Describe the struggle for and identify individuals involved in women's suffrage in Manitoba and Canada.

Include: Famous Five (Emily Murphy, Henrietta Muir Edwards, Louise McKinney, Nellie McClung, and Irene Parlby).

KE-057 Give examples of the impact of technological development on life in Canada from 1914 to 1945.

Examples: electricity, telecommunication, transportation, medicine, industrialization...

VI-006 Value the contributions of various groups to the development of Canada.

Examples: suffragettes, trade unions...

VH-013 Appreciate the struggles of past generations in achieving the rights that people in Canada enjoy today.

6.2.3 Depression

KL-024 Give examples of the influence of the natural environment on daily life for various groups during the Depression.

KH-036 Identify the prime ministers of Canada from 1914 to 1945 and give examples of their achievements.

KE-056 Relate stories of the Depression and describe its impact on Canada.

Examples: changes in agricultural practices, development of the social safety net, new political parties...

6.2.4 World War II

KI-012 Identify contributions of First Nations, Inuit, and Métis peoples to Canada's war efforts.

KH-036 Identify the prime ministers of Canada from 1914 to 1945 and give examples of their achievements.

KG-041 Identify major causes and events of the Second World War.

KG-042 Describe Canada's involvement in the Second World War and identify its impact on Canadian individuals and communities.

Include: internment of ethnocultural groups; the Holocaust.

VG-014 Appreciate the sacrifices that soldiers and other Canadians made during the World Wars.

Cluster Assessment: Tools and Processes

-  **Suggested Portfolio Selections:** this icon is attached to strategies that may result in products, processes, or performances for inclusion in student portfolios.
- **Student Portfolio Tracking Chart:** this chart is designed for students to track their portfolio selections throughout the cluster. It is located in Appendix D.
-  **Skills Set:** this icon identifies the skills that may be targeted for assessment during each strategy, and provides suggestions for that assessment.
- **Skills Checklist:** this teacher tool lists every skill outcome for a particular grade. It is intended to track individual student progress related to skills in each cluster and throughout the grade. It is located in Appendix D.
- **Connecting and Reflecting:** the end-of-cluster summative assessment activity.

Cluster Description

Students examine Canada as a newly emerging nation. This study includes a focus on the Winnipeg General Strike, the Depression, the causes and events of the two World Wars, and Canada's involvement in these wars. Students explore social, political, and economic changes that occurred during this period, such as women's suffrage, urbanization, and technological developments.

Engaging Students in the Cluster

- Create a visual display of images from the Winnipeg General Strike.
- Take students on a walking tour of the Exchange District, highlighting areas pertinent to the strike.
- Create a book display illustrating the Winnipeg General Strike, World War I, the Great Depression, World War II, or women’s suffrage.
- Have students listen to songs or poems by artists from the period that included World War I, the Great Depression, and World War II.
- Have students read stories depicting life and times of people during the Great Depression, World War I, and World War II.
- Create a bulletin board display including the Great Depression, World War I, and World War II.
- Invite a veteran of the Canadian military to speak to the class
- Post slogans around the classroom to promote “the vote” for women.
- Create a display of technological inventions from the period of 1914 to 1945.

Learning Experiences Summary

6.2.1 World War I

6.2.2 Social Change

6.2.3 Depression

6.2.4 World War II

Learning Experience: 6.2.1 World War I

- KC-003 Recognize Remembrance Day as a commemoration of Canadian participation in world conflicts.

- KH-036 Identify the prime ministers of Canada from 1914 to 1945 and give examples of their achievements.

- KG-039 Identify major causes and events of the First World War.

- KG-040 Describe Canada’s involvement in the First World War and identify its impact on Canadian individuals and communities.
Include: internment of ethnocultural groups.

Description of the Learning Experience

International competition for power and military strength among European empires led to World War I, in which Canada was involved as both an ally and colony of Great Britain.

Students read and consult primary and secondary sources to develop an understanding of the main causes, events, and consequences of the First World War, focusing on Canada’s role in supporting the Allied Powers.

Vocabulary: escalation, military alliances, imperialism, nationalism, conscription, internment, ethnocultural (See Appendix D for Vocabulary Strategies.)

 	KC-003 KG-039 KG-040	Students write a short persuasive speech about war and its consequences (e.g., the consequences of war, why it is important to remember that war has happened, how young people can take action to support peace in their communities, the importance of Remembrance Day...). Students share their speeches with the class or at a Remembrance Day service.
Teacher Reflections		

Learning Experience: 6.2.2 Social Change

- KH-035 Describe the causes, main events, and results of the 1919 Winnipeg General Strike.

- KH-037 Describe changing roles for women in Canada from 1914 to 1945.

- KP-046 Describe the struggle for, and identify individuals involved in, women’s suffrage in Manitoba and Canada.
Include: Famous Five (Emily Murphy, Henrietta Muir Edwards, Louise McKinney, Nellie McClung, and Irene Parlby).

- KE-057 Give examples of the impact of technological development on life in Canada from 1914 to 1945.
Examples: electricity, telecommunication, transportation, medicine, industrialization...

- VI-006 Value the contributions of various groups to the development of Canada.
Examples: suffragettes, trade unions...

- VH-013 Appreciate the struggles of past generations in achieving the rights that people in Canada enjoy today.

Description of the Learning Experience

Living conditions, work, gender roles, and politics in Canada were all transformed as a result of technological, economic, and social change in the first half of the 20th century.

Through research, video images, role-plays, and speeches, students explore and represent working conditions, the Winnipeg General Strike, the changing role of women, and technological development in the period from 1914 to 1945.

Vocabulary: trade unions, women’s suffrage, veterans, prohibition, industrialization, lifestyles (See Appendix D for Vocabulary Strategies.)

6.2.2 Social Change

Assessment	Outcomes	Strategies
	KH-035 VI-006 VH-013	<p>Activate</p> <p>Collaborative groups of students view pictures taken during the 1919 Winnipeg General Strike and develop a hypothesis about what is taking place and where. 	KH-035 KH-037 KP-046 KE-057 VI-006 VH-013	Collaborative groups of students read and respond to short historical quotations about social conditions and issues that characterized life in the early 20th century. Students analyze what is being said in the quotations, and generate ideas as to how and why these conditions may have arisen, and changed, over time. Students share ideas in a class discussion.  BLM: Social Conditions
— or —		
	KH-035 KH-037 KP-046 KE-057 VI-006 VH-013	Students view an image of the commemorative banner that adorns the outside of the Walker Theatre in Winnipeg, a national historic site now known as the Burton Cummings Centre for the Performing Arts. Students read the banner and related descriptive information. They discuss the historical significance of the site and generate questions about the events it commemorates. TIP: This discussion offers the opportunity to discuss what students may already know or to generate hypotheses about Nellie McClung’s mock “Women’s Parliament” of 1914. It also offers the opportunity for students to discuss the preservation of the many heritage buildings that exist in Winnipeg that are excellent examples of the architecture and economic life of the Prairies in the early 20th century. Many of the industrial spaces in the Exchange District were warehouses or factories related to the garment industry, which may help students develop a picture of the kinds of work available to women at that time.  Supporting websites can be found at < http://www3.edu.gov.mb.ca/cn/links/ss >

 	KH-037 KE-057 VH-013	Students create a Mind Map illustrating the positive and negative effects of technological development on the lives of Canadians from 1914 to 1945 (e.g., ways in which technological development has made life easier or more difficult). Mind Maps are displayed and students assess what they feel about the overall and long-term effects of technology.
or		
 	KH-035 KH-037 KE-057 VI-006 VH-013	Students are randomly divided into two groups, with half the class representing striking workers during the 1919 Winnipeg General Strike, and the other half representing the Citizens’ Committee of 1000 (a group of employers who actively opposed the strike). Within each group, collaborative groups of students create a placard or pamphlet promoting the point of view of their “side.” Placards or pamphlets are displayed, and students circulate to view and discuss them. TIP: Through guided discussion, students consider how the language and rhetoric used in the course of these kinds of events are often designed to reinforce emotional, adversarial reactions. Encourage students to consider strategies that may have been used to defuse conflict while not sacrificing important values. (J.S. Woodsworth may be considered as an example in this activity.)
or		
 	KH-035 KH-037 KP-046 VI-006 VH-013	In pairs, one student assumes the role of an interviewer and the other a Winnipeg striker or suffragette. In character, students are interviewed in a “Historical Hotseat” in which they explain who they are, what they became famous for, what inspired them to take their noted actions, and the effect their actions may have had on life today.
Teacher Reflections		

Learning Experience: 6.2.3 Depression

- KL-024 Give examples of the influence of the natural environment on daily life for various groups during the Depression.

- KH-036 Identify the prime ministers of Canada from 1914 to 1945 and give examples of their achievements.

- KE-056 Relate stories of the Depression and describe its impact on Canada.
Examples: changes in agricultural practices, development of the social safety net, new political parties...

Description of the Learning Experience

The Great Depression (1929–1939) was a worldwide economic crisis where many people faced debt, poverty, and unemployment. An extended drought made this period particularly difficult for people living in the Canadian West.

Students use images, song, and text from primary and secondary sources to explore what life was like for people living during the Depression, and the impact of the Depression on social reform in Canada.

Vocabulary: depression, economy, relief, social security net (See Appendix D for Vocabulary Strategies.)

6.2.3 Depression

Assessment	Outcomes	Strategies
	KL-024 KE-056	<p>Activate</p> <p>Students listen and respond to a reading from a novel about the effects of the Great Depression in Canada. They discuss what literature can tell us about daily life and the impact of historic events on ordinary people, and the ways in which people cope with hard times.</p> <p>SUGGESTED READING (Excerpts): <i>As for Me and My House</i> by Sinclair Ross. <i>Who Has Seen the Wind</i> by W.O. Mitchell.</p> <p style="text-align: right;"><i>(continued)</i></p> <hr/> <p>Teacher Reflections</p>

6.2.3 Depression

Assessment	Outcomes	Strategies
Apply <i>(continued)</i>		
— or —		
 	KL-024 KH-036 KE-056	Collaborative groups of students create a collage of images, words, and symbols that summarize the impact of the Depression on various groups of people in Canada, and some of its social and political results (e.g., changes in agricultural practices, development of the social safety net, citizen protests, defeat and election of prime ministers, establishment of the Cooperative commonwealth Federation [CCF]...).
— or —		
 	KL-024 KH-036 KE-056	Students write and perform either a protest song or a “feel-good” song to help people cope with the effects of the Depression. The song should contain realistic characteristics of songs of the period (i.e., language, style, format) as well as historical references. Students may decide to use the tune of an existing popular song of the 1930s (or a contemporary song) as the background to their lyrics. TIP: Combine this activity with the previous family activities strategy and present songs at the “Dealing with the Dirty Thirties” day. (See first Applying strategy on page 143.)
— or —		
 	KL-024 KH-036 KE-056	Students write a series of short entries in a personal journal, taking on the role of a person living through the summer and fall of 1932 on a farm in one of the Prairie provinces. Journal entries should include references to the weather, crops, employment, political events, and the impact of the Depression on various people in the family and community. Students read extracts of their journals to their peers in small groups.

or		
 	KL-024 KH-036 KE-056	Students develop a poster or brochure designed to provide people with realistic guidelines for conserving water and using food economically as they live through a drought. Students apply what they have learned about the consequences of drought on people’s lives in the Depression to develop these guidelines.
or		
 	KL-024 KH-036 KE-056	Students write a letter to Prime Minister Bennett from the point of view of an urban or rural citizen of the West living during the Depression. Students share their letters with each other and discuss whether they think this form of citizen protest is effective.
or		
 	KL-024 KH-036 KE-056	Students prepare and present a persuasive speech demanding social change, patterned after the speeches of J.S. Woodsworth or Tommy Douglas. Speeches should highlight the need for government to take responsibility for the welfare of the citizens in hard times, and should make reference to specific actions of the government before and during the Depression. Students present their speeches to the class, and assess the historical accuracy and persuasive qualities of each other’s presentations.

|--------|--|
| KG-042 | Describe Canada’s involvement in the Second World War and identify its impact on Canadian individuals and communities.
<i>Include: internment of ethnocultural groups; the Holocaust.</i> |
|--------|--|
- | | |
|--------|---|
| VG-014 | Appreciate the sacrifices that soldiers and other Canadians made during the World Wars. |
|--------|---|

Description of the Learning Experience

The events of the Second World War permanently transformed international relations and obliged people in all countries of the world to change their ways of thinking about war, peace, and human rights.

Students learn about the principal causes and events of the Second World War, and develop a consciousness of the indelible impact of global conflict in the 20th century.

Vocabulary: dictatorship, anti-Semitism, holocaust, propaganda, atomic weapons (See Appendix D for Vocabulary Strategies.)

6.2.4 World War II

Assessment	Outcomes	Strategies
	<ul style="list-style-type: none"> KI-012 KG-041 KG-042 VG-014 	<p>Activate</p> <p>Collaborative groups of students brainstorm what they know about the Second World War, recording their ideas on chart paper. or		
	KG-041 KG-042	<p>Students use primary and secondary sources to research the Holocaust, and engage in a “brain-writing” activity. In pairs, students record their notes on the Holocaust (e.g., roots of the Holocaust, main events, consequences...). Student pairs are joined into groups of four or six to combine their notes. Groups then participate in a silent carousel activity to share information with other members of the class in the sequence that follows.</p> <ul style="list-style-type: none"> • Large sheets of chart paper are provided at separate centres or tables. Suggested topics for these sheets are: <ul style="list-style-type: none"> — <i>What is the Holocaust?</i> — <i>Why did this happen?</i> — <i>What happened during the Holocaust?</i> — <i>Where did the events of the Holocaust take place?</i> — <i>What were the consequences of this event?</i> — <i>How did the Holocaust end?</i> — <i>What lessons did human beings learn from this event?</i> • Each group circulates from one sheet to another, and is given approximately two minutes at each station. Consulting their group’s notes as needed, one student in the group records facts about the topic on the chart paper. • At the signal, groups circulate to the next large sheet, adding their points, and reading the ideas recorded by other groups. • Chart papers are posted and students are given a few moments to review the accumulated facts. • Students debrief in a guided plenary session. They discuss the lessons learned about human rights, the consequences of racism and prejudice, the effects of all-out war and total power, and the impact of hate propaganda. • Students complete this exercise by submitting a journal reflection on the discussion. <p>TIP: This is a silent “brain-writing” activity, in which students should be encouraged to stick to the facts, and to let the facts speak for themselves. Students should record information clearly and concisely in point form so that the other groups will be able to understand what was written. Advise students that they will have the chance to discuss the implications of the facts later, once they have viewed what all the groups have added to the sheets.</p> <p> Supporting websites can be found at <http://www3.edu.gov.mb.ca/cn/links/ss></p> <p style="text-align: right;"><i>(continued)</i></p>

Students read a short informational text about Canadian anti-Semitic immigration policies during World War II, and discuss the implications of those policies. Following this discussion, students view the Histori.ca *Heritage Minute* “Pauline Vanier” (which describes her efforts to encourage a more open immigration policy in Canada to assist Jews during the Second World War). Students discuss ways in which the video reflects the consequences of Canada’s closed-door policy to Jewish immigrants. Students research the work of the Vanier family and the gradual opening of doors to Jews in Canada through the War Orphans Project, as well as immigration policy changes. Students share and discuss their research findings with each other, and reflect on the non-military, international responsibilities of nations in times of war.

TIP: Encourage students to think unconventionally regarding international commitments during times of war (e.g., peaceful means of minimizing the effects of war, rather than contributing directly through troops and munitions).

SUGGESTED VIDEO: Histori.ca *Heritage Minute*: “Pauline Vanier”

Students read extracts from the wartime speeches of Sir Winston Churchill and discuss the role of leadership and oratory in boosting the morale and determination of the people in the face of war.

TIP: Remind students that the people of London were subjected to the “Blitzkrieg” or lightning war of the Germans, suffering constant air raids and bombardments, and that in the early part of the war it appeared that Germany would successfully conquer all of Europe. Students should also take note of the fact that Adolph Hitler had considerable oratorical powers, which he used to persuade the German people, in particular the youth, of the superiority of the so-called “Aryan” race, and of the importance of establishing military dominance in order to vindicate their race.

CLUSTER

GRADE

6

Cluster 3

Learning Experiences: Overview

6.3.1 Overview of Contemporary Canada

KL-025 Locate on a map of Canada the provinces, territories, and capital cities.

KH-038 Identify the prime ministers of Canada from 1945 to the present and give examples of their achievements.

6.3.2 A Changing and Diverse Population

KI-013 Identify historical reasons for bilingual and multicultural policies in Canada.

KI-013F Describe the impact of the Affaire Forest on the linguistic rights of Franco-manitobains.

KI-014 Identify changes and developments regarding Aboriginal rights in Canada from 1867 to the present.

Examples: suffrage, changes to Status and entitlement, self-governance, land claims, new treaties...

KI-015 Give examples of changes to francophone populations in Canada since Confederation.

Examples: characteristics, distribution...

KI-015F Identify events surrounding the creation of the Division scolaire franco-manitobaine (DSFM).

Examples: Manitoba Schools Question, Bill 113, Article 23 of the Canadian Charter of Rights and Freedoms, the Mahé Ruling, the Manitoba Referral...

VI-007 Value the cultural and linguistic diversity of the Canadian community.

VI-007A Value their First Nation, Inuit, or Métis language, heritage, and culture.

VI-007F Value the French language and their francophone heritage and culture.

VI-008 Demonstrate respect for people of all cultures.

6.3.3 A Modern Industrialized Nation

KE-058 Give examples of ways in which industry and technology have changed life in Canada since 1945.

Examples: urbanization, transportation, communication, education...

KE-059 Give examples of inventions and technologies created in Canada.

Examples: kayaks, snowmobiles, Canadarm, insulin, canola...

6.3.4 Canada on the World Stage

KG-043 Give examples of Canada's involvement in world conflicts since 1945.

Examples: Korean War, Cold War, Gulf War, Bosnia, Afghanistan, international peacekeeping...

KG-044 Give examples of global events and forces that have affected Canadians from 1945 to the present.

Examples: international cooperation, relief efforts, disease, environmental changes, famine, refugee movement...

KG-045 Give examples of Canada's participation in the United Nations and other international organizations.

Examples: the Commonwealth, La Francophonie, Organization of American States...

Cluster Assessment: Tools and Processes

- **Engaging Students in the Cluster:** suggested strategies to activate the cluster and help teachers assess student prior knowledge.
-  **Suggested Portfolio Selections:** this icon is attached to strategies that may result in products, processes, or performances for inclusion in student portfolios.
- **Student Portfolio Tracking Chart:** this chart is designed for students to track their portfolio selections throughout the cluster. It is located in Appendix D.
-  **Skills Set:** this icon identifies the skills that may be targeted for assessment during each strategy, and provides suggestions for that assessment.
- **Skills Checklist:** this teacher tool lists every skill outcome for a particular grade. It is intended to track individual student progress related to skills in each cluster and throughout the grade. It is located in Appendix D.
- **Connecting and Reflecting:** the end-of-cluster summative assessment activity.

Cluster Description

Students explore factors that have shaped contemporary Canadian life. This study includes a focus on the impact of global events and forces, Canadian involvement in international organizations and world conflicts, and the impact of technological and industrial advancements. Students also study developments regarding Aboriginal rights and the evolution of Canada as a bilingual and multicultural nation.

Engaging Students in the Cluster

- Create a Word Splash display of important people, events, and organizations that affected Canada from 1945 to the present.
- View videos showing Canada’s involvement in international organizations.
- Display a wall map of the world, so that students can refer to it throughout the cluster.
- Create a book display of fiction by Canadian authors.
- Create a display of Canadian art.
- Create a listening centre of Canadian music.
- Hold a “Historical Fashion Show” with students wearing clothing from Canada’s past (e.g., the 1940s, ’50s, or ’60s), or have a “Historical Clothing Week” where students come to school each day dressed in fashions from a different decade.
- Create a display of the evolution of a particular technology from 1945 to the present (e.g., automobile, airplane, telephone, refrigerator, television...).

Learning Experiences Summary

6.3.1 Overview of Contemporary Canada

6.3.3 A Modern Industrialized Nation

6.3.2 A Changing and Diverse Population

6.3.4 Canada on the World Stage

Learning Experience: 6.3.1 Overview of Contemporary Canada

KL-025 Locate on a map of Canada the provinces, territories, and capital cities.

KH-038 Identify the prime ministers of Canada from 1945 to the present and give examples of their achievements.

Description of the Learning Experience

Canada is a vast and evolving landscape. The prime ministers since 1945 have played an important role in shaping Canada into a modern nation.

Students review the political map of contemporary Canada and research the key achievements of Canadian prime ministers since 1945.

Vocabulary: political map, federalism (See Appendix D for Vocabulary Strategies.)

6.3.1 Overview of Contemporary Canada

Assessment	Outcomes	Strategies
	KL-025 KH-038	<p>Activate</p> <p>Based on what they know about Canadian history and geography, students reflect on and discuss what might be some of the greatest challenges to a prime minister. TIP: Review with students the idea of federalism, to which they were introduced in Grade 5. Note that the Canadian population is concentrated in Ontario and Québec, and encourage students to question how this concentration might affect the representation of less populated or more remote regions. Ask them to note the many different economic concerns of the provinces and territories, and to observe the challenges to national unity presented by Canada’s geography.</p>
	KL-025	<p>Pairs of students are given a list of capital cities to match up with the correct province or territory. Students are given a set amount of time to complete the list, after which they use an atlas to correct and complete their work.</p> <p> 6.3.1 a BLM: Capital Cities</p>

6.3.1 Overview of Contemporary Canada

Assessment	Outcomes	Strategies
Activate <i>(continued)</i>		
or		
 <p>Appendix A Skill 7a</p>	KL-025	<p>Students draw a map of Canada, unassisted and without the support of maps or atlases. Given approximately 10 minutes, they begin by sketching each of the provinces and territories as outlines of rough geometric shapes. They add to their maps the names of all the provinces, territories, and capital cities they know. After the set time has elapsed, students compare their maps to a political map of Canada in an atlas, and assess their spatial representation of the country as well as their geographic knowledge. Students file maps in their learning journals or portfolios to compare to later versions of the same exercise.</p> <p>TIP: Consider using this strategy twice: once at the beginning of this learning experience and again near the end of the school year, once students have spent more time studying and working with the map of Canada. As expected, the second map will be significantly more detailed and students will have a very concrete and visual example of their personal growth. This strategy also offers the opportunity to clarify the distinction between a physical map and a political map, and to review two additions to Confederation: Newfoundland in 1949, and Nunavut in 1999.</p>
or		
 <p>Appendix A Skill 2</p>	KH-038	<p>Students are asked to name the present prime minister of Canada and to brainstorm what they know about him or her. Ideas are recorded and discussed, and errors are corrected. Students are invited to collect news articles about the current prime minister over the course of this learning experience. These articles can be presented to the class and posted on a “PM” bulletin board.</p> <p>TIP: During the brainstorm session, ask students whether they can name any other prime ministers. Pose questions to the students to elicit what they know (e.g., Do they know of a prime minister who died on September 28, 2000, and whose son spoke eloquently at his funeral? Do they know whether Canada has ever had a female prime minister? Do they know of a prime minister who won the Nobel Peace Prize?). This may also offer the opportunity to clarify or remind students that, in Canada, we do not vote for the prime minister: he or she is the head of the party with the greatest number of elected Members of Parliament in the House. For this reason, some prime ministers served very short terms of office, taking over the leadership of the governing party and the responsibilities of the office until their party was defeated in the next election.</p>

| KI-013 | Identify historical reasons for bilingual and multicultural policies in Canada. |
| KI-013F | Describe the impact of the Affaire Forest on the linguistic rights of Franco-manitobains. |
| KI-014 | Identify changes and developments regarding Aboriginal rights in Canada from 1867 to the present.
<i>Examples: suffrage, changes to Status and entitlement, self-governance, land claims, new treaties...</i> |
| KI-015 | Give examples of changes to francophone populations in Canada since Confederation.
<i>Examples: characteristics, distribution...</i> |
| KI-015F | Identify events surrounding the creation of the Division scolaire franco-manitobaine (DSFM).
<i>Examples: Manitoba Schools Question, Bill 113, Article 23 of the Canadian Charter of Rights and Freedoms, the Mahé Ruling, the Manitoba Referral...</i> |
| VI-007 | Value the cultural and linguistic diversity of the Canadian community. |
| VI-007A | Value their First Nation, Inuit, or Métis language, heritage, and culture. |
| VI-007F | Value the French language and their francophone heritage and culture. |
| VI-008 | Demonstrate respect for people of all cultures |

Note: Aboriginal and francophone learning outcomes are not intended for all students (see page 36 of the overview).

Description of the Learning Experience

The history of Canada is shared by many people, including Aboriginal peoples, French- and English-speaking peoples, and a rapidly changing and culturally diverse population.

Students study historical reasons for Canadian bilingualism and multiculturalism, examine trends in population change, and consider changing developments in Aboriginal rights in Canada.

Vocabulary: multiculturalism, constitution, self-governance (See Appendix D for Vocabulary Strategies.)

6.3.2 A Changing and Diverse Population

Assessment	Outcomes	Strategies
	<ul style="list-style-type: none"> KI-013 KI-014 KI-015 VI-007 VI-007A VI-008 	<p>Activate</p> <p>Collaborative groups of students read and respond to a quotation by Pierre Elliott Trudeau regarding the multicultural nature of Canada.  	KI-013 KI-015 VI-007 VI-007A	<p>Collaborative groups of students select a province or territory and research population statistics regarding ethnic origins and home language. Consulting the Statistics Canada website, each group prepares a spreadsheet, electronic graph, or chart summarizing the statistics for their selected region. After the results for each region have been shared with the class, students discuss the population trends in various regions, and the differences between the regions.</p> <p>NOTE: Encourage students to compare results of a previous census to the results of the most recent census, and to note population trends (e.g., numbers of francophones outside Québec; most rapidly growing and least rapidly growing ethnic populations in various regions...).</p> <p> Supporting websites can be found at <http://www3.edu.gov.mb.ca/cn/links/ss></p>
— or —		
 	KI-013 KI-015 VI-007 VI-007A	<p>Using print and electronic resources, students gather data about the present-day distribution of francophone populations in Canada, and historical information about changes in this population over time.</p> <p>NOTE: Encourage students to become aware of the fact that, although the Constitution protects French language rights in education and federal government services, preserving the vitality of a minority language is often a great challenge. With modern mass communication, urbanization, greater mobility of the population, and increased intermarriage between ethnic groups, the language of the majority tends to dominate at work, at home, and in entertainment. This is particularly reflected in francophone population statistics outside Québec, where families do not always preserve the use of the French language as widely as in the past. Students will also observe that, outside Québec, the highest concentrations of francophone populations are in New Brunswick, Ontario, and southern Manitoba, and francophone populations in other provinces are relatively low. Invite students to consider the historical foundations of this demographic pattern.</p> <p> Supporting websites can be found at <http://www3.edu.gov.mb.ca/cn/links/ss></p>
Teacher Reflections

 	KI-014 VI-007 VI-007A VI-008	Students create a concept overview for self-governance. They discuss the meaning of the term and why it is important to Aboriginal peoples of Canada, based on historical events and government policies of the past.  BLM: Self-Governance
or		
 	KI-013 KI-015 VI-007 VI-007A VI-008	Collaborative groups of students discuss what they have learned about bilingualism in Canada and create a Mind Map to represent the historical importance of bilingualism. The Mind Maps are posted and, in a guided plenary session, students discuss whether they think bilingualism in Canada has been successful in increasing communication and understanding between anglophones and francophones in Canada. NOTE: Help students understand the historical roots of bilingualism by focusing on the history of Québec, and the sentiment of distinctiveness that has characterized Québec politics throughout Canadian history. Point out to students that bilingualism is not a matter of speaking two languages, but also an issue of cultural identity. Bilingualism in Canada was promoted first by Lester Pearson and then by Pierre Elliott Trudeau as a means of being more inclusive of French-speaking Canadians and improving communication between the “two solitudes” of anglophone and francophone Canada. Students should also be made aware that Québec has held two referenda to decide whether Québec citizens were in favour of greater independence for Québec in its relationship to Canada. In the second referendum, held in 1995, the results were extremely close to a majority in favour of greater independence for Québec: 50.56 percent of the voters voted against sovereignty-association, and 49.44 percent voted for sovereignty-association. Bilingualism in Canada, and the protection of official language minority rights in the Constitution, were seen as ways of alleviating longstanding fears that Québec would lose its unique cultural identity and that the voice of francophone Canadians would be lost in an English-speaking-majority society. Learning Experience: 6.3.3 A Modern Industrialized Nation

- KE-058 Give examples of ways in which industry and technology have changed life in Canada since 1945.
Examples: urbanization, transportation, communication, education...
- KE-059 Give examples of inventions and technologies created in Canada.
Examples: kayaks, snowmobiles, Canadarm, insulin, canola...

Description of the Learning Experience

The 20th century has seen Canada take its place among the most technologically developed and highly industrialized nations of the world.

Students will conduct an inquiry into Canadian inventions and technologies of the 20th century, and will consider the effects of technological development, industrialization, and urbanization on life in Canada.

Vocabulary: technology, industrialization, urbanization (See Appendix D for Vocabulary Strategies.)

6.3.3 A Modern Industrialized Nation

Assessment	Outcomes	Strategies
Activate		
	KE-058 KE-059	Students discuss the meaning of the word “technology,” and brainstorm a list of modern technologies and inventions that are part of daily life. Sorting through the list, students try to identify inventions or technologies for which Canadians are known (e.g., Alexander Graham Bell—telephone). They generate questions for further research into the role of Canadians in the development of modern technologies.
	or	
	KE-058 KE-059	Collaborative groups of students engage in a discussion about the question: Does modern technology make life better? Students use concrete examples to support their points of view. Groups share their conclusions in a full class discussion, during which they also discuss benefits and disadvantages of living in a technologically developed society.

Teacher Reflections		

6.3.3 A Modern Industrialized Nation

Assessment	Outcomes	Strategies
Activate <i>(continued)</i>		
— or —		
 	KE-058 KE-059	Students interview parents, grandparents, or other elders about the types of technologies that are part of everyday life today that were not available many years ago (e.g., communication, education, transportation, industrialization, mass production). Students discuss the major changes that have taken place in the use of technology in Canada in the last two generations, and reflect on how this has changed daily life for many people.
— or —		
 	KE-058 KE-059	Students create a list of products they use or consume on a daily basis, and then sort these products into two categories: raw materials (e.g., water, food...) and manufactured products. They may further sort their list into products manufactured in Canada and products manufactured outside Canada. Students write a short reflection on what life would be like if, rather than relying on mass production, they had to produce most of their own commodities, as did many of the Aboriginal peoples and pioneer settlers.
Acquire		
	KE-058 KE-059	Students are divided into seven collaborative groups: transportation, communication, medicine and health, recreation and leisure, education, and business and industry. Each group lists key technologies and inventions that are commonly used in their assigned field, and analyzes how these technologies have changed life for Canadians. Each group prepares and presents an illustrated Mind Map on poster paper, summarizing its information and ideas. TIP: This activity offers an opportunity to discuss with students the fact that many modern technologies are not widely accessible to people in the less-developed nations of the world, even though they may be commonplace and readily available in Canada.

	KE-058 KE-059	<p>Students conduct a survey among class members on the use of communication devices in local households (e.g., How many hours a day does each household spend on the Internet, watching TV, listening to radio, talking on the telephone?). Classroom results are tabulated to create a collective graph. Students interpret the results and discuss what the impact of this use of technology might be on quality of life (e.g., person-to-person interaction, physical activity, recreation, health, listening skills, creativity, access to information...).</p> <p>TIP: Allow students to draw their own conclusions based on the data collected, inviting them to consider both positive and negative effects. Encourage students to recognize that widespread access to many of these communication technologies is relatively recent, and to imagine how people would have spent their leisure time, and carried out their work, in the time prior to the availability of mass communications.</p>
or		
	KE-058 KE-059	<p>Students write a narrative describing a day in the experience of an individual who has travelled in time from an earlier period of Canadian history to today. The story should include details about technologies and ways of life that are completely new to the individual, and should describe his or her personal reaction or point of view about the impact of technology on daily life in Canada.</p> <p>TIP: Encourage students to select and develop the point of view of a person from a particular time and place in Canadian history, perhaps a historical figure they have studied.</p>
<p>Teacher Reflections</p>		

Learning Experience: 6.3.4 Canada on the World Stage

- KG-043 Give examples of Canada’s involvement in world conflicts since 1945.
Examples: Korean War, Cold War, Gulf War, Bosnia, Afghanistan, international peacekeeping...

- KG-044 Give examples of global events and forces that have affected Canadians from 1945 to the present.
Examples: international cooperation, relief efforts, disease, environmental changes, famine, refugee movement...

- KG-045 Give examples of Canada’s participation in the United Nations and other international organizations.
Examples: the Commonwealth, la Francophonie, Organization of American States...

Description of the Learning Experience

Canada, although a middle power in the world, has played an important role in international events, agreements, conflicts, and cooperation in the 20th century.

Students research examples of Canadian involvement in global events since 1945, and examine Canada’s role in international organizations.

Vocabulary: Cold War, free trade, international organizations (See Appendix D for Vocabulary Strategies.)

6.3.4 Canada on the World Stage

Assessment	Outcomes	Strategies
	<p>KG-043 KG-044 KG-045</p>	<p>Activate</p> <p>Referring to a wall map of the world, students name countries with which Canada has a connection, and describe that connection (e.g., former colony of Britain, of France, ally of Russia in World War II, trading partner with U.S...). Using sticky notes, the countries are indicated on the map. Observing the map of the world, students note the countries with which Canada has the most links.</p> <p>TIP: Invite students to think about this topic in advance of the activity. Ask them to collect news clippings of global events that involve Canada. Encourage them to take note of items they use or consume in the course of a regular day in order to expand their awareness of Canada’s global trading relations (e.g., Where are the avocados for their guacamole grown? Where are their name-brand running shoes manufactured? Their CDs? Their bicycles?).</p> <p style="text-align: right;"><i>(continued)</i></p>
	<p>Teacher Reflections</p>	

6.3.4 Canada on the World Stage

Assessment	Outcomes	Strategies
Activate <i>(continued)</i>		
— or —		
	KG-043 KG-044 KG-045	Students brainstorm international events or influences they are aware of that have affected life in Canada (e.g., wars, trade agreements, summit conferences, environmental phenomena, epidemics, discoveries...). Events are recorded on chart paper and the countries involved are identified on a wall map or globe. Students identify recent events in Canada that have affected other countries in the world. In the same way, these national events are recorded and the countries affected are identified on the world map or globe. Students discuss the concept of global interdependence based on the concrete examples they have recorded.
— or —		
	KG-043 KG-044 KG-045	Students read a short text about Marshall McLuhan’s concept of the “global village.” Using Think-Pair-Share, they reflect on the idea and create an illustration of the concept of the global village to share with the class. In a guided plenary session, students discuss the implications of living in a global village (e.g., If we are connected to others across time and space, what are our responsibilities to each other? If a famine, a war, or an environmental disaster happens somewhere else in the world, how does it affect us? Should we be concerned? What should be our response?).
		
— or —		
	KG-043 KG-044 KG-045	Collaborative groups of students discuss what they know about international organizations and their work (e.g., UNICEF, the United Nations, Médecins sans frontières, Free the Children...). Students create a KWL chart about these types of organizations, generating questions to orient further inquiry into Canada’s international involvement and commitments. TIP: Explain to students that there are various types of international organizations: some exist to promote global peace and cooperation, such as the United Nations; some exist as military or defence alliances or trade agreements; others are ways of getting nations together to cooperate and help one another in social, educational, and cultural exchanges.

6

**Canada Today: Democracy, Diversity, and
the Influence of the Past**

4
CLUSTER

Cluster 4

Learning Experiences: Overview

6.4.1 Expressions of Canadian Identity

KI-017 Describe characteristics that define Canada as a country.

Examples: multicultural, bilingual, northern...

KI-018 Give examples of ways in which the government helps protect Canadian identity.

Examples: Canadian content rules in the media; support for the Canadian Broadcasting Corporation and the arts...

KI-019 Give examples from the arts and media that are expressions of Canadian culture and/or identity.

KL-026 Describe the influence of the natural environment on life in Canada.

KL-026A Describe the influence of the land on their First Nation, Inuit, or Métis identity.

Examples: values, beliefs, traditions, customs, art, clothing...

VI-009 Appreciate the arts as important expressions of culture and identity.

VL-011 Value the natural environment.

VL-011A Respect the spiritual dimension of nature.

6.4.2 Government in Canada

KP-049 Describe the main features of the Canadian government.

Include: parliamentary system, federal democracy.

KP-050 Define the term political party and identify political parties and their leaders in Canada.

KP-051 Describe characteristics of the electoral processes in Canada.

KP-052 Identify the main responsibilities of municipal, provincial, First Nations, and federal governments in Canada.

KP-053 Identify elected or appointed municipal, provincial, and federal government representatives and describe their main responsibilities.

Include: Governor General, Manitoba Lieutenant-Governor.

KP-053A Identify and describe the main responsibilities of elected representatives of their Aboriginal community.

VP-016 Respect authority when it is consistent with democratic ideals.

6.4.3 A Community of Communities

KI-016 Describe factors that shape personal and national identities and explain how they may coexist.

Examples: social, cultural, linguistic...

KI-016F Describe the influence of their social, cultural, and linguistic choices on their francophone identities.

KI-020 Identify various groups and organizations that may contribute to personal identity.

KI-020A Identify the roles of Aboriginal organizations and give examples of ways in which they promote Aboriginal rights.

Examples: Assembly of Manitoba Chiefs, Manitoba Métis Federation, Assembly of First Nations, Métis National Council...

KI-020F Describe the role of francophone organizations and identify ways in which they promote francophone rights.

Examples: Société franco-manitobaine, Pluri-Elles...

KP-048 Identify First Nations, Inuit, and Métis perspectives regarding self-determination.

Examples: resource use, land claims, treaties, government...

6.4.4 Creating a Just Society

KC-005 Identify rights and freedoms described in the 1982 Canadian Charter of Rights and Freedoms and explain why they are important.

KC-006 Identify current issues related to citizenship in Canada.

KP-054 Identify factors that contribute to inequities in Canada and propose solutions.

Examples: poverty, racism, sexism...

VC-003 Appreciate the struggles and achievements of past generations in shaping Canada.

VC-004 Appreciate the benefits of living in Canada.

Examples: freedoms, education, health, safety...

VP-017 Be willing to support solutions to address inequities.

6.4.5 Canadian Democracy in the World Context

KC-004 Identify the ideals of democracy and describe the influence of democracy on quality of life for Canadians.

KI-021 Identify various individuals from Canada's past and present, and describe their achievements.

KG-047 Give examples of Canada's connections to other regions of the world.

Examples: environmental, social, political, economic...

VC-002 Be willing to support the ideals of democracy and contribute to local democratic processes.

Examples: school or community projects, student councils...

VC-002A Be willing to participate in democratic processes to protect and affirm their Aboriginal identities.

VG-015 Appreciate Canada's interdependence with other regions of the world.

Cluster Assessment: Tools and Processes

- **Engaging Students in the Cluster:** suggested strategies to activate the cluster and help teachers assess student prior knowledge.
-  **Suggested Portfolio Selections:** this icon is attached to strategies that may result in products, processes, or performances for inclusion in student portfolios.
- **Student Portfolio Tracking Chart:** this chart is designed for students to track their portfolio selections throughout the cluster. It is located in Appendix D.
-  **Skills Set:** this icon identifies the skills that may be targeted for assessment during each strategy, and provides suggestions for that assessment.
- **Skills Checklist:** this teacher tool lists every skill outcome for a particular grade. It is intended to track individual student progress related to skills in each cluster and throughout the grade. It is located in Appendix D.
- **Connecting and Reflecting:** the end-of-cluster summative assessment activity.

Cluster Description

Students explore Canadian governance, citizenship, and identity, and the ideals, responsibilities, and rights of democracy. This study includes a focus on electoral processes, as well as federal, provincial, First Nations, and municipal governments, and the responsibilities of elected representatives. Students examine issues related to the protection and expression of culture and identity and the role of various groups and organizations in the promotion of identity and democratic rights. Students also consider the influence of the natural environment, as well as the contributions of past generations in shaping modern-day Canada.

Engaging Students in the Cluster

- Create a display illustrating the cultural diversity of Canada (e.g., festivals, clothing, food...).
- Set up a voting booth in the classroom with election vocabulary words splashed around the display.
- Post a copy of the Canadian Charter of Rights and Freedoms.
- Have a “Canadian Clothing Day” where students dress in clothing that is distinctly “Canadian” (e.g., red and white colours of the flag, hockey jerseys, Métis sash...).
- Create a bulletin board display highlighting the natural environment and beautiful spots in Canada.
- Post pictures of Canadian landmarks on a map of Canada (e.g., CN Tower in Toronto, Golden Boy in Winnipeg...).
- Set up a “Postcards from Canada” display and have students create postcards from other places in Canada with fictional messages from the “senders.”
- Display images of Canadian and provincial/territorial flags, symbols, and coats of arms around the classroom.
- Create a display of books depicting life in various parts of Canada.
- Set up a “Canadian Citizenship” wall and invite students to post examples of good citizenship.
- Institute a “Good Citizenship” award. “Catch” students in the act of demonstrating significant acts of citizenship and reward them with a Canadian token of appreciation (e.g., Canadian flag lapel pin...).

- VI-009 Appreciate the arts as important expressions of culture and identity.

- VL-011 Value the natural environment.

- VL-011A Respect the spiritual dimension of nature.

Note: Aboriginal and francophone learning outcomes are not intended for all students (see page 36 of the overview).

Description of the Learning Experience

Canada’s distinctive cultural and geographic characteristics are richly expressed in Canadian arts and media.

In this learning experience, students discuss the role of the arts and media in Canada, consider the various factors that define Canadian culture and identity, and explore diverse examples of Canadian arts and media.

Vocabulary: media, performing arts, visual arts (See Appendix D for Vocabulary Strategies.)

6.4.1 Expressions of Canadian Identity

Assessment	Outcomes	Strategies

Learning Experience: 6.4.2 Government in Canada

- KP-049 Describe the main features of the Canadian government.
Include: parliamentary system, federal democracy.
- KP-050 Define the term political party and identify political parties and their leaders in Canada.
- KP-051 Describe characteristics of the electoral processes in Canada.
- KP-052 Identify the main responsibilities of municipal, provincial, First Nations, and federal governments in Canada.
- KP-053 Identify elected or appointed municipal, provincial, and federal government representatives and describe their main responsibilities.
Include: Governor General, Manitoba Lieutenant-Governor.
- KP-053A Identify and describe the main responsibilities of elected representatives of their Aboriginal community.
- VP-016 Respect authority when it is consistent with democratic ideals.

Note: Aboriginal and francophone learning outcomes are not intended for all students (see page 36 of the overview).

Description of the Learning Experience

Canada's federal system of parliamentary democracy, responsible to the people, is designed to ensure fair and open citizen participation at all levels of government.

Through collaborative learning, discussion, and role-plays, students explore the structure and responsibilities of government and electoral processes in Canada.

Vocabulary: legislative, judicial and executive branches, constitutional monarchy, Member of Parliament, Member of the Legislative Assembly, cabinet, political party, platform (See Appendix D for Vocabulary Strategies.)

Note to Teachers: An election simulation may be used as the basis of this learning experience. Contact Elections Canada or Elections Manitoba* to obtain a comprehensive election simulation kit for a federal or provincial election. Select the federal or provincial model based on which election is most current in the news.

Also consider the creation of a current events and issues bulletin board, and encourage students to gather news clippings on political issues in Canada to share with the class for the remainder of Cluster 4.

**The Power to Choose*, a Manitoba curriculum-based program created by Elections Manitoba, includes lesson plans, activities, and support materials for students to experience every aspect of a provincial election. Contact Elections Manitoba at (204) 945-3225 or <www.electionsmanitoba.ca>.

Assessment	Outcomes	Strategies
Activate <i>(continued)</i>		
— or —		
	KP-049 KP-052 KP-053 KP-053A	Collaborative groups of students generate a list of the characteristics of government in Canada (e.g., the prime minister is leader of the federal government, each province or territory has its own government...). Using their lists, each group draws a diagram on chart paper to illustrate the relationships between the various characteristics and to show their understanding of how government works in Canada. Diagrams are posted and students offer each other comments and suggestions for improvements. Misconceptions about the structure and function of government in Canada are clarified in a guided class discussion, and students record new government characteristics they have learned in this activity.
— or —		
	KP-049 KP-050 KP-051 KP-052 KP-053 KP-053A VP-016	Students participate in a carousel activity to reflect on the role, responsibilities, and characteristics of government in Canada. Collaborative groups of students spend approximately five minutes imagining what life would be like in Canada if there were no government. (Prompts: With no established authority, how would the country function? How would life change for Canadians?) A recorder in each group records ideas on chart paper. At a pre-arranged signal, all groups advance in the same direction to the next group's chart. Building on what the previous group has recorded, they add their own ideas to the chart paper. Approximately every two minutes, a signal is given and the groups advance once more, adding their ideas to the next group's chart until ideas begin to repeat themselves or slow down. The final charts are posted and, in a guided plenary session, students discuss the importance and role of government.

Learning Experience: 6.4.4 Creating a Just Society

- KC-005 Identify rights and freedoms described in the 1982 Canadian Charter of Rights and Freedoms and explain why they are important.

- KC-006 Identify current issues related to citizenship in Canada.

- KP-054 Identify factors that contribute to inequities in Canada and propose solutions.
Examples: poverty, racism, sexism...

- VC-003 Appreciate the struggles and achievements of past generations in shaping Canada.

- VC-004 Appreciate the benefits of living in Canada.
Examples: freedoms, education, health, safety...

- VP-017 Be willing to support solutions to address inequities.

Description of the Learning Experience

The 1982 Canadian Charter of Rights and Freedoms protects the rights and freedoms of citizens and ensures that Canada continues to strive toward a just and equitable society.

Students examine the basic provisions of the Charter and consider the benefits of living in Canada. Through role-plays, surveys, and research, students consider some of the causes and effects of inequities in Canadian society, and reflect on possible solutions.

Vocabulary: social justice, inequities (See Appendix D for Vocabulary Strategies.)

6.4.4 Creating a Just Society

Acquire *(continued)*

or

KC-005
 KC-006
 KP-054
 VC-003
 VC-004
 VP-017

Students engage in a role-play to help them observe the causes and effects of racism. Each student is given a Status Card with a message identifying their “status” in society (i.e., star, circle, triangle, or square). The groups need not be equal in size; one group may be considerably larger than the others. Without sharing any details about the relative status of their group, students create tags to wear, showing the symbol of their assigned group. Students then circulate among the members of the class, conversing with various students about their interests as though they were meeting for the first time at a social gathering. Students must bear in mind what they know about the status of their group as they circulate, and interact accordingly. Overtly rude or insulting statements are not allowed. At the end of the assigned time, students debrief the experience in a guided discussion. Discussion prompts might include:

- Could they tell they were being treated as inferiors or as superiors by different groups?
- How did they feel as a result of being told they had a certain inferior or superior status?
- What does this activity tell them of some of the underlying beliefs that motivate racism and discrimination?
- Do they believe these kinds of discriminatory attitudes and beliefs exist in Canadian society?
- What would be some of the effects of these beliefs?
- Can they think of historical examples of discrimination or inequities suffered by Canadians of previous generations?
- What can citizens do in their daily lives to overcome these kinds of inequities?
- What can they do as young people in their schools and communities?

Based on this discussion, students write a personal journal reflection on the sources and results of inequities in society.

TIP: Pose guiding questions that help students discover the arbitrary nature of discrimination, the factors that contribute to inequities, and how concealed or veiled beliefs about the superiority and inferiority of certain groups can affect equality of opportunity and fair treatment.

Learning Experience: 6.4.5 Canadian Democracy in the World Context

- KC-004 Identify the ideals of democracy and describe the influence of democracy on quality of life for Canadians.

- KI-021 Identify various individuals from Canada’s past and present, and describe their achievements.

- KG-047 Give examples of Canada’s connections to other regions of the world.
Examples: environmental, social, political, economic...

- VC-002 Be willing to support the ideals of democracy and contribute to local democratic processes.
Examples: school or community projects, student councils...

- VC-002A Be willing to participate in democratic processes to protect and affirm their Aboriginal identities.

- VG-015 Appreciate Canada's interdependence with other regions of the world.

Note: Aboriginal and francophone learning outcomes are not intended for all students (see page 36 of the overview).

Description of the Learning Experience

Citizenship involves a commitment to democratic ideals and an awareness of global responsibilities in an increasingly interdependent world.

Students consider Canadian examples of global citizenship, reflect on the importance of democratic ideals in Canada and the world, and assess their own active democratic citizenship.

Vocabulary: democratic ideals, rule of law, global interdependence (See Appendix D for Vocabulary Strategies.)

Note to Teachers: As this is the final learning experience, offer the students many opportunities to discuss and reflect on what they have learned over the year. Invite them to propose ways in which they feel prepared to actively contribute to their groups, their school, their community, their country, and the world. In support of democratic ideals, teachers are advised to structure the learning activities so that students make their own decisions and choices.

	KC-004 KI-021	<p>Collaborative groups of students reach consensus about a Canadian citizen they would like to nominate as a member of a “Canadian Democracy Hall of Fame.” Each group selects a spokesperson to present their nominee and his or her achievements to the class. (Students may also create a poster of their nominee for display on a “Canadian Democracy Hall of Fame” bulletin board.)</p> <p>TIP: Encourage students to consult their notes and previous projects from earlier in the year to select an individual who has advanced the principles of democracy through her or his actions (e.g., Nellie McClung—vote for women; Tommy Douglas and J.S. Woodsworth—medicare and social security; Elijah Harper—Aboriginal voice in constitutional change; John Diefenbaker—the Bill of Rights; Pierre Elliott Trudeau—multiculturalism...).</p>
or		
	KG-047 VG-015	<p>Using Think-Pair-Share, students consult their notes and resources to make a list of Canada’s connections to other regions of the world. Students present their list of countries to the class, using a wall map of the world to identify countries as they are listed.</p> <p>TIP: This activity reviews some of the information students acquired in LE 6.3.4: Canada on the World Stage. Encourage students to include a variety of examples of international connections based on their previous knowledge and their personal experience (e.g., politics, trade, media, immigration, environment, social, cultural...).</p>
or		
	KC-004 KG-047 VC-002 VC-002A VG-015	<p>In a class discussion, students review the responsibilities of democratic citizenship, and then read the provided short quotes related to Canada’s global responsibilities. Students brainstorm their responsibilities to people and places outside their local community and their country (i.e., as citizens of one of the most developed, richest, and most democratic nations of the world, what kinds of responsibilities do they have toward the rest of the world? How can they show they are being responsible democratic citizens on the world stage?).</p>

Strategies

Activate *(continued)*

or

KC-004
VC-002
VC-002A

Collaborative groups of students review the advantages or benefits of life in Canada (as explored in LE 6.4.4). Using this list of benefits as a basis, students decide how many aspects of quality of life in Canada relate to, or begin with, the ideals of democracy (i.e., rule of law, freedom, equality, citizen participation in government, fairness, and justice). For example, they may note that the universal health care provision is based on the principle of equality— that all citizens, regardless of their income, should have the right to medical services. In a guided discussion, students consider if, how, and why democracy can make life better for citizens.

KC-004
KI-021
KG-047
VG-015

Acquire

Using print and Internet resources as needed, collaborative groups of students develop a list of countries with which Canada has environmental, social, political, economic, or educational connections. Each group presents its list to the class, placing self-stick notes on a world map to identify the location of each identified country. Considering the world map and the many countries identified, students discuss what global interdependence means in their lives.

TIP: This activity may begin with simple connections from their daily experience (e.g., the banana I ate this morning had a sticker saying it came from Puerto Rico; my sweatshirt was made in Romania; my running shoes were made in Mexico; I have relatives in the Philippines; my camera was made in Japan; my family has a foster child in Zambia; my favourite TV program is from the U.S.; my sister is on an exchange program in France...). Encourage students to understand interdependence by trying to imagine life in Canada without any of these international connections.

or		
 	KC-004 KG-047 VC-002 VC-002A VG-015	<p>Collaborative groups of students develop a list of the ideals—the perfect standards—that true democracy strives to achieve. Possible guiding questions include:</p> <p>In a perfectly democratic world...</p> <ul style="list-style-type: none"> • would some people be starving while others are overfed? • would children have to pay for the environmental abuses and mistakes of previous generations? • would some people be excluded from having a say in government? • would education be only for those who can afford it? • would dictators and armies run countries and make decisions? • would more money be spent on weapons than on food? • would countries help one another out with money and food and medicine and education? • would some countries control and use other countries to their own advantage? <p>Once students have envisioned what the ideals of democracy mean on a global scale, they use images and words to create a visual display (e.g., poster, mural, collage...) of the ideals of democracy at work in the world. The display should creatively represent all of the basic ideals of democracy and should show examples of local actions that support global concerns.</p> <p>TIP: Review with the class the principle of the rule of law (i.e., that no individual, group, or government stands outside of or above the law, and that all people and leaders have to answer for their actions). Students are already familiar with principles of equality of opportunity, individual freedoms, full citizen participation in government, and fair legal processes and protection. In this activity, highlight the global interdependence that democratic ideals support (i.e., if all human beings are equal, individual rights and freedoms should not only be available to certain privileged countries or groups, but to all people of all countries).</p>

1 – Active Listening

Skills

S-400 Listen to others to understand their perspectives.

Active listening is an integral component of all learning. Students use active listening skills in a wide variety of classroom experiences including brainstorming, discussion, collaborative group activities, note taking, listening to instructions and presentations, and viewing media. To develop active listening skills, students need opportunities to observe good models of active listening, and to practise the physical behaviours, positive attitudes, and cognitive skills that enable them to become effective students. Information on specific active listening strategies is found on page 8 of “Strategies That Make a Difference” (Manitoba Education and Training, 1996a).

Think about...

- focusing assessment on a manageable number of outcomes/students
- constructing student-generated assessment criteria (e.g., What does an active listener look/sound like? Why?)
- recording focused observations to monitor student growth over time as well as determine which students need differentiation
- guiding self-assessment, using a Met/Developing/Not-Yet-Met strategy
- orally guiding/facilitating reflection, using a Y-chart, T-Chart, or journals (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)

2 – Brainstorming

Skills

S-100	Collaborate with others to establish and carry out group goals and responsibilities.
S-400	Listen to others to understand their perspectives.
S-401	Use language that is respectful of human diversity.

Brainstorming may take place individually or as a small-group or large-group strategy. Brainstorming encourages students to focus on a topic and to contribute to a free flow of ideas, exploring what they know or may want to know about a topic. The teacher or students may stimulate thinking by posing questions, reading brief text excerpts, or displaying/viewing pictures or other media. All ideas that are contributed are accepted, and no efforts are made to judge or criticize the validity or appropriateness of ideas.

Individual brainstorming allows the student to focus on what he or she knows about a topic and a variety of possible solutions to a problem. Similarly, small or large group brainstorming allows students to focus on what they know about the topic, but also exposes the students to the ideas and knowledge of others. Group brainstorming allows individuals to piggyback on the ideas of others and to extend, revise, and incorporate new ideas into their thinking. Essential behaviours in brainstorming include active listening, acceptance of others' contributions, temporary suspension of judgement, and openness to new ideas. Brainstorming may be carried on over a period of days, weeks, or even months by making additions to the initial brainstorm charts (use a different-colour marker/font) to show growth over time.

Think about...

- focusing assessment on a manageable number of outcomes/students
- recording focused observations to determine participation, active listening, and acceptance of others' ideas, as well as prior knowledge, gaps or misconceptions, and starting points for instruction and remediation
- orally guiding/facilitating reflection (e.g., What do we/I notice about our/my thinking?; Evidence of our/my thinking is...) using a Y-chart, T-Chart, or journals (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)

BLMs

Note: The following departmental publication is available at the Manitoba Text Book Bureau.
Independent Together: Supporting the Multilevel Learning Community

- BLM 1: Reflection—Metacognition
- BLM 5: Focused Observation Form

3 – ORAL COMMUNICATION

3a – Discussion

Skills

S-100	Collaborate with others to establish and carry out group goals and responsibilities.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-400	Listen to others to understand their perspectives.
S-401	Use language that is respectful of human diversity.
S-402	Persuasively express differing viewpoints regarding an issue.
S-404	Elicit and clarify questions and ideas in discussions.
S-405	Articulate their beliefs and perspectives on issues.

Discussion provides students with opportunities to generate and share their questions and ideas related to a concept, issue, object, or experience. Vary discussions to include both large- and small-group activities in order to encourage participation by all students. (See page 29 of “Strategies That Make a Difference” for suggested discussion strategies, including Inside-Outside Circles, Talking Chips, and Talking Circles/Talking Sticks.) Consider assigning specific roles for students to take during discussions, and provide opportunities for students to experience various roles (e.g., discussion leader, note-taker, timer, questioner...).

In the exchange of information that occurs in discussion, students contribute ideas, listen carefully to what others have to say, think critically, seek clarification, and develop positions or relevant arguments. Emphasize active listening during discussion, and model both the affective and cognitive skills students need to become active participants in discussions that reflect higher-order thinking. Discussions provide teachers with valuable information to assess student understanding, as well as the students’ values and attitudes, and assists in planning for learning and instruction.

Think about...

- focusing assessment on a manageable number of outcomes/students
- constructing student-generated criteria (e.g., What does an effective discussion group member look/sound like?)
- recording focused observations to determine affective and cognitive skills or higher-order thinking skills
- guiding peer- and self-assessment, using a Met/Developing/Not-Yet-Met strategy
- orally guiding/facilitating reflection, using a Y-chart, T-Chart, or journals (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)

(continued)

3a – Discussion (*continued*)

3b – Public Speaking

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-302	Draw conclusions based on research and evidence.
S-304	Distinguish fact from opinion and interpretation.
S-400	Listen to others to understand their perspectives.
S-401	Use language that is respectful of human diversity.
S-402	Persuasively express differing viewpoints regarding an issue.
S-403	Present information and ideas orally, visually, concretely, or electronically.
S-405	Articulate their beliefs and perspectives on issues.

Public speaking provides students with opportunities to organize, write, and communicate their ideas to an audience. Students learn that both the way in which they say something and how they physically present themselves are as important as the message itself. As students prepare for oral presentations, they need to consider their audience, the purpose of the presentation (e.g., to share information or perspectives, to persuade...), as well as the format of the presentation, so that they may prepare accordingly.

Components of speeches include

- an introduction to engage the audience and establish the purpose
- a body that outlines the main supporting points
- a conclusion that restates the main ideas and leaves the audience with a lasting impression.

Debriefing and post-presentation feedback from the audience helps students understand how they may improve their oral communication techniques. As students gain experience with writing and presenting speeches, they develop confidence in communicating.

Think about...

- sharing and reflecting on exemplars of oral presentations
- modelling, guiding, and offering time to practise writing and presenting speeches
- focusing assessment on the accuracy and completeness of the information, as well the effective use and application of information, visual aids, and other technical supports
- constructing student-generated assessment criteria (e.g., What does a quality speech look/sound like? Why?)
- offering descriptive feedback

(continued)

3b – Public Speaking (*continued*)

- recording focused observations to monitor student growth over time and to determine which students need differentiation
- guiding self-assessment, using a Met/Developing/Not-Yet-Met strategy
- orally guiding/facilitating reflection, using a Y-chart, T-Chart, or journals (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)
- using videotape to record presentations for review and reflection

**BLMs**

Note: The following departmental publication is available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 1: Reflection—Metacognition

- BLM 5: Focused Observation Form

4 – COLLABORATIVE LEARNING

4a – Collaborative Groups

Skills

S-100	Collaborate with others to establish and carry out group goals and responsibilities.
S-101	Use a variety of strategies to resolve conflicts peacefully and fairly. <i>Examples: clarification, negotiation, compromise...</i>
S-102	Make decisions that reflect fairness and equality in their interactions with others.
S-104	Negotiate constructively with others to build consensus and solve problems.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-400	Listen to others to understand their perspectives.
S-401	Use language that is respectful of human diversity.
S-404	Elicit and clarify questions and ideas in discussions.
S-405	Articulate their beliefs and perspectives on issues.

Collaborative groups provide students with opportunities to work together to accomplish shared goals, and require the establishment of a positive, safe, and inclusive classroom culture. Collaborative learning experiences help students develop greater self esteem and positive relationships with their peers, as well as skills related to problem solving, decision making, and critical/creative thinking. Frequent experience in a variety of collaborative structures allows students to gain expertise in various roles and practise interacting fairly and respectfully with one another. Emphasize that both the individual and group are accountable in collaborative learning experiences. (See pages 21–22 of “Strategies That Make a Difference” for information on Specific Cooperative Learning Strategies, including Community Check, Co-op Co-op, and Corners.)

Middle Years research shows that students learn best when offered a wide range of learning experiences in which they have opportunities to interact with their peers. Due to their physical development at this age, Middle Years students need opportunities for physical movement during their learning. As well, their social and emotional development is such that Middle Years students are seeking their own identity independent from adults, necessitating them to seek approval and a sense of belonging from their fellow students.

Think about...

- focusing assessment on a manageable number of outcomes/students
- constructing student-generated assessment criteria (e.g., What does a quality collaborative group/group member look/sound like? Why?)
- offering descriptive feedback

(continued)

4a – Collaborative Groups *(continued)*

- following collaborative learning activities with debriefing activities
- recording focused observations to assess group processes
- guiding peer- and self-assessment through opportunities for group processing and debriefing
- orally guiding/facilitating reflection, using a Y-chart, T-Chart or journals (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)

BLMs

Note: The following departmental publications are available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 1: Reflection-Metacognition
- BLM 2: Constructing Student-Generated Criteria for Quality Work
- BLM 5: Focused Observation Form

Kindergarten to Grade 8 English Language Arts: A Foundation for Implementation, “Strategies That Make a Difference”

4b – Using a Continuum of Points of View

Skills

S-100	Collaborate with others to establish and carry out group goals and responsibilities.
S-101	Use a variety of strategies to resolve conflicts peacefully and fairly. <i>Examples: clarification, negotiation, compromise...</i>
S-102	Make decisions that reflect fairness and equality in their interactions with others.
S-104	Negotiate constructively with others to build consensus and solve problems.
S-105	Recognize bias and discrimination and propose solutions.
S-301	Evaluate the advantages and disadvantages of solutions to a problem.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-400	Listen to others to understand their perspectives.
S-401	Use language that is respectful of human diversity.
S-402	Persuasively express differing viewpoints regarding an issue.
S-403	Present information and ideas orally, visually, concretely or electronically.
S-404	Elicit and clarify questions and ideas in discussions.
S-405	Articulate their beliefs and perspectives on issues.

Every individual holds personal points of view. Using this strategy, students’ attitudes are represented by where they physically place themselves along a line or continuum. Using a physical continuum to elicit the expression and exchange of opinions, beliefs, and values is a means of inviting students to explore their own preconceptions, to learn about the perspectives of others, and to reflect on changes in their points of view. Using a continuum helps students recognize that, for many questions, there are no black-or-white, right-or-wrong answers, but rather a wide range of points of view. It is also a way of encouraging students to make explicit their own points of view and to actively listen to others to understand their position, rather than debating an issue to identify a winning or a losing argument. Encourage students to be spontaneous and frank in this activity, and to not concern themselves with discussion until after they have found their own position on the continuum. Emphasize the idea that in this activity, there are no “right” or “wrong” positions, and all perspectives are equally valid.

(continued)

4b – Using a Continuum of Points of View *(continued)*

Think about...

- offering descriptive feedback on how students express themselves and listen to others' perspectives
- recording focused observations to observe student values and group processes
- providing debriefing opportunities for students to reflect on attitudinal changes they undergo as a result of engaging in the activity.

**BLMs**

Note: The following departmental publication is available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 1: Reflection-Metacognition
- BLM 5: Focused Observation Form

4c – Consensus Decision Making

Skills

S-100	Collaborate with others to establish and carry out group goals and responsibilities.
S-101	Use a variety of strategies to resolve conflicts peacefully and fairly. <i>Examples: clarification, negotiation, compromise...</i>
S-102	Make decisions that reflect fairness and equality in their interactions with others.
S-104	Negotiate constructively with others to build consensus and solve problems.
S-105	Recognize bias and discrimination and propose solutions.
S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-301	Evaluate the advantages and disadvantages of solutions to a problem.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>
S-400	Listen to others to understand their perspectives.
S-401	Use language that is respectful of human diversity.
S-402	Persuasively express differing viewpoints regarding an issue.
S-404	Elicit and clarify questions and ideas in discussions.
S-405	Articulate their beliefs and perspectives on issues.

Consensus decision making is a complex collaborative process that relies on the understanding of certain basic principles, as well as the application of interpersonal skills. As students practise consensus decision making, they come to understand that consensus is the result of negotiating and cannot be reached by more simple means such as majority vote or compromise. Its goal is to bring all participants to a common, shared agreement that reflects the perspectives of each and every team member. For this reason, consensus building requires a supportive, safe, and inclusive classroom culture, active listening, and a high degree of commitment from all team members. Students may assume specific roles within the group (e.g., facilitator, scribe, timekeeper, questioner...) or create variations depending on the nature of the task. The only essential role in a consensus decision-making task is that of facilitator.

(continued)

4c – Consensus Decision Making (*continued*)

Basic principles of consensus decision making:

- All members are equal and have a valid perspective to contribute to the group.
- Everyone has the right, but not the obligation, to change his or her mind.
- The decision is reached when all the members decide on a common course of action.

Indispensable elements:

- Willingness of each member to share power
- Respect for assigned roles
- Commitment to follow the established process
- Clear common objective
- Neutral facilitator accepted by the group

Practical considerations:

- Begin with simple issues to allow students to focus on the processes of reaching consensus before engaging in more complex issues.
- Generally, a heterogeneous team of four to six members is the most effective in collective decision making.
- Establish ground rules for the process at the beginning of the year.
- Students should sit in a circle or face one another.
- Give each student the chance to take on a leadership role over the course of the year.
- Teacher intervention should be minimal. Teachers may wish to allocate an initial period of time for *dialogue*, or exchange of ideas, before indicating that it is time to pass on to the *discussion* phase, during which the purpose is to make a decision.

Student Roles within Collaborative Groups

If students have little experience with cooperative learning, it is advisable to assign a specific role to each group member. As they develop the skills and competencies of collaborative decision making, students may select their own roles, or create variations, depending upon the nature of the task at hand. The number and type of roles may vary according to the group task, size, and dynamic. The only essential role in groups of four or more is that of a facilitator. Possible roles include

- *Facilitator*: remains objective, poses questions, ensures that each group member has the chance to speak in turn
- *Task Protector*: presents and supports the central task and reminds group members to focus on the main idea without straying
- *Spokesperson*: reports ideas and decisions to other groups
- *Timer*: monitors time and reminds group members of the time constraints
- *Materials Person*: coordinates space and makes sure that the group has the necessary materials to carry out its task

(*continued*)

Appendix A – Skills Assessment**4c – Consensus Decision Making** *(continued)*

- *Scribe*: records and organizes ideas
- *Researcher* : locates sources, definitions, and helpful information as needed
- *Graphic Artist*: creates charts or illustrated representations of ideas and information
- *Keeper of the Peace*: mediates conflicts and proposes solutions as needed
- *Questioner*: checks that every member of the group is satisfied with the decision

Think about...

- focusing assessment on a manageable number of outcomes/students
- constructing student-generated assessment criteria (e.g., What does a quality collaborative group/group member look/sound like? Why?)
- offering descriptive feedback
- recording focused observations to assess group process
- guiding peer- and self-assessment, using a Met/Developing/Not-Yet-Met strategy
- orally guiding/facilitating reflection, using a Y-chart, T-Chart, or journals (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)

**BLMs**

Kindergarten to Grade 8 English Language Arts: A Foundation for Implementation, “Strategies That Make a Difference”

- BLM 56: Checklist and Learning Log
- BLM 57: Self-Assessment of a Collaborative/Cooperative Task

5 – Using Graphic Organizers

Skills

- | | |
|-------|--|
| S-200 | Select information from a variety of oral, visual, material, print, or electronic sources.
<i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i> |
| S-201 | Organize and record information in a variety of formats and reference sources appropriately.
<i>Examples: maps, charts, outlines, concept maps...</i> |

Frames and graphic organizers are tools that assist students with thinking, organizing, comprehending, reviewing, and representing. Frames and graphic organizers are also referred to as thinking frames, webs, thinking maps, mind maps, semantic maps, and concept organizers. Model the use of frames (e.g., webbing brainstorming contributions, using various types of frames to organize the same information...), and discuss the role of frames in helping students organize their thinking. Provide frequent opportunities for students to practise using familiar frames, and introduce additional types of frames as appropriate. Consider teaching and modelling the use of one graphic organizer at a time, and posting graphic organizers around the classroom for students to use as models and references.

(Note: It takes approximately 6–8 weeks for students to internalize and apply a new strategy independently.)

Think about...

- offering descriptive feedback
- recording focused observations on students' independent choice of, or creation of, graphic organizers to organize thoughts and ideas
- orally guiding/facilitating student reflection (e.g., Graphic organizers help me... because ...; Evidence of this is...)

BLMs

Note: The following departmental publication is available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 5: Focused Observation Form

6 – INQUIRY PROCESS

6a – Sorting and Classifying

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>

Sorting and classifying helps students make sense of information. Sorting and classifying also helps teachers and students identify prior knowledge as students make connections between previous experiences and new information. Sorting is the process of identifying unique characteristics within a set and dividing the items based on their differences. Classifying involves identifying common characteristics and grouping items/ideas that share these characteristics into labelled categories. Students may sort and classify, or compare and contrast, based on student-generated or pre-determined criteria.

Think about...

- teaching, modelling, guiding, and debriefing the process of sorting and classifying
- recording focused observations to determine sorting skills used to identify unique characteristics within a set
- recording focused observations on students' classifying skills
- recording focused observations on students' development to compare and contrast

BLMs

Note: The following departmental publications are available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 5: Focused Observation Form

Kindergarten to Grade 8 English Language Arts: A Foundation for Implementation, "Strategies That Make a Difference"

- BLM 64: Venn Diagram

Success for All Learners

- Page 6.100: Sort and Predict Frame
- Page 6.103: Compare and Contrast Frame

6b – Generating Questions

**Skills**

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-300	Plan topics, goals, and methods for historical inquiry and research.
S-309	Interpret information and ideas in a variety of media. <i>Examples: art, music, historical fiction, drama, primary sources...</i>
S-404	Elicit and clarify questions and ideas in discussions.

Providing students with opportunities to generate their own questions allows them to focus and plan their inquiry and identify purposes for their learning. When students search for answers to questions they believe to be important, they are better motivated to learn, and the result is deeper understanding. Framing student research around an overall investigative question and then providing opportunities for groups or individuals to generate their own questions connects all stages of inquiry into a meaningful whole. Model the process of generating effective questions by using “Think-Alouds” (“Strategies That Make a Difference,” Manitoba Education and Training, 1996a, page 288).

Think about...

- focusing assessment on a manageable number of outcomes/students
- constructing student-generated assessment criteria (e.g., What makes a good questions?)
- recording focused observations on students’ growing competence in formulating questions

**BLMs**

Note: The following departmental publication is available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 2: Constructing Student-Generated Criteria for Quality Work
- BLM 5: Focused Observation Form

6c – KWL

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.

The acronym KWL stands for what students **K**now, what they **W**ant to know, and what they **L**earned. There are many variations of the KWL strategy and all of them provide a systematic process for accessing prior knowledge, developing questions, reviewing, and summarizing learning. A KWL may be used for short- or long-term learning, and should be revisited throughout the learning process in order to provide opportunities for students to reflect on their learning. Model each of the phases of KWL and provide guided practice in the use of the strategy before expecting independent use.

Think about...

- focusing assessment on a manageable number of outcomes/students
- recording focused observations to determine prior knowledge, gaps, misconceptions, curiosity, and starting points for instruction
- adding a KWL chart to the students’ portfolios as evidence of growth in their thinking over time

BLMs

Note: The following departmental publications are available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 5: Focused Observation Form

Kindergarten to Grade 8 English Language Arts: A Foundation for Implementation, “Strategies That Make a Difference”

- BLM 65: KWL Plus
- BLM 66: KWL Plus Map

Success for All Learners

- Page 6.94: KWL Plus
- Page 6.95: Knowledge Chart

6d – Preparing and Conducting Interviews

Skills

S-102	Make decisions that reflect fairness and equality in their interactions with others.
S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-300	Plan topics, goals, and methods for historical inquiry and research.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>
S-308	Compare diverse perspectives in a variety of information sources.
S-400	Listen to others to understand their perspectives.
S-401	Use language that is respectful of human diversity.
S-404	Elicit and clarify questions and ideas in discussions.

Conducting interviews allows students to collect and record information from a primary source and creates opportunities for students to draw upon first-hand knowledge and experience.

Practical Considerations

After establishing the purpose of the interview (e.g., gathering facts, opinions, or stories) and identifying candidates to interview, students formulate appropriate questions. The questions should be both closed and open-ended, clearly stated, and include follow-up questions for in-depth information. Students need to consider how they will record information from the interview (e.g., audio recording, videotape, written notes) and practise both their questioning skills and recording information during mock interviews. Provide students with opportunities to view or listen to examples of interviews (both effective and ineffective) in order to observe and discuss interview techniques.

Working with Potentially Sensitive Issues

It is critical that students who engage in demographic and ethnographic research conduct their studies ethically, respectfully, and without bias—particularly when potentially sensitive issues are addressed. From the beginning stage of question formulation, to the collection, analysis, and presentation of data, students need to be fully aware of the areas of potential concern.

Before students embark on surveying a group concerning their culture, heritage, ethnicity, or other potentially sensitive areas, ask the students to consider why and how they will use the data. Ask them to consider:

- Why do they need that particular information? Is there a real purpose for the data?

(continued)

Appendix A – Skills Assessment

6d – Preparing and Conducting Interviews (*continued*)

- Why is it important to gather statistics on different groups?
- How will they analyze their data to ensure it is treated with fairness and respect?
- What do they need to know about a particular groups' social context, historical experiences, and other factors so that they will be able to interpret survey results fairly?

Ensure that students understand the need to respect individual rights to privacy, as well as individual decisions to not answer particular questions, or to not participate in the survey. Help students avoid the pitfalls of stereotyping and ensure students respect the rights of interviewees to self-identify their ethnic, cultural, linguistic, or other aspect of group identity, if they so choose.

At the question formulation stage, students require guidance to create questions that demonstrate sensitivity and respect for the interviewees. Depending on the nature of the interview and the target audience, examples of sensitivities include

- the use of appropriate language
- respect for privacy
- questions that are free of bias
- asking questions that respect religious or cultural protocols
- avoiding personal questions that might make interviewees uncomfortable

At the data analysis and presentation stage (and particularly if the data presents a negative view of individuals or a particular group of people), ensure that students consider contextual information in order to give a fair and respectful presentation of their results and conclusions. For example, reporting and studying different rates of employment will be more meaningful and relevant if there is a discussion of the factors that create employment barriers for some groups and privilege others.

Following the interview, students reflect on the survey process and send thank-you letters to their interview subjects.

Think about...

- focusing assessment on a manageable number of students/outcomes
- constructing student-generated assessment criteria (e.g., What are the characteristics of good questions and/or effective interviews?)
- recording focused observations to monitor student growth over time and to determine which students need differentiation and/or appropriate scaffolding
- orally guiding/facilitating student reflection on the interview process

BLMs

Note: The following departmental publication is available at the Manitoba Text Book Bureau *Independent Together: Supporting the Multilevel Learning Community*

- BLM 2: Constructing Student-Generated Criteria for Quality Work
- BLM 5: Focused Observation Form

6e – Field Trips

Skills

S-100	Collaborate with others to establish and carry out group goals and responsibilities.
S-101	Use a variety of strategies to resolve conflicts peacefully and fairly. <i>Examples: clarification, negotiation, compromise...</i>
S-102	Make decisions that reflect fairness and equality in their interactions with others.
S-103	Make decisions that reflect care, concern, and responsibility for the environment.
S-106	Treat places and objects of historical significance with respect. <i>Examples: burial grounds, memorials, artifacts...</i>
S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-300	Plan topics, goals, and methods for historical inquiry and research.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-305	Observe and analyze material and visual evidence for research. <i>Examples: artifacts, photographs, works of art...</i>
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>
S-308	Compare diverse perspectives in a variety of information sources.
S-309	Interpret information and ideas in a variety of media. <i>Examples: art, music, historical fiction, drama, primary sources...</i>
S-400	Listen to others to understand their perspectives.
S-401	Use language that is respectful of human diversity.

Learning happens best in a context that gives meaning to knowledge, values, and skills learning outcomes. Experiences that take students outside the classroom can be highly motivating and complement classroom-based learning. Accessing community resources provides knowledge and understanding of the broader environment and allows students to learn from the resources and expertise available in the community at large. Students also gain practical experience when they are involved in planning the purpose and logistics of the field trip. As well, teachers gain valuable insights into their students as they observe their interactions outside the classroom. Teachers are encouraged to prepare students for field trips through pre-teaching or the use of anticipation guides. Many field-trip sites provide pre-trip materials for classroom use.

(continued)

Appendix A – Skills Assessment**6e – Field Trips** *(continued)*

Think about...

- engaging students in planning a field trip based on primary inquiry questions or the “W” in a KWL strategy
- orally guiding/facilitating reflection to assess the outcomes of the field trip and to facilitate student inquiry
- engaging in a debriefing process after the field trip to identify further questions, misconceptions, and new learnings, as well as to plan follow-up activities
- applying the knowledge acquired during the field trip to follow up classroom activities

**BLMs**

Note: The following departmental publications are available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 2: Constructing Student-Generated Criteria for Quality Work
- BLM 6: Daily Observation Form

Success for All Learners

- Page 9.5: Teacher’s Planning Sheet for Learning Experiences Outside the Classroom

6f – Collecting and Analyzing Images

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-202	Distinguish between primary and secondary information sources for research.
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-305	Observe and analyze material and visual evidence for research. <i>Examples: artifacts, photographs, works of art...</i>
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>
S-308	Compare diverse perspectives in a variety of information sources.
S-309	Interpret information and ideas in a variety of media. <i>Examples: art, music, historical fiction, drama, primary sources...</i>

Collecting and analyzing images related to an idea or concept helps students acquire new information, stimulates questions, and provides opportunities for sorting and classifying. Images may include calendars, art, photographs, news and magazine clippings, and clip art. After establishing the criteria that the images are intended to represent (e.g., landforms, daily life, Canadian symbols...), students may browse a predetermined set of images or search for images matching the criteria. As well, encourage students to generate their own questions about the images in order to pursue a deeper analysis of the content.

Think about...

- how students connect images to the topic/theme under consideration
- student ability to extract information from images and captions
- how students analyze and apply the ideas and information in the images
- how students apply critical thinking skills regarding the images they use (e.g., bias, authenticity, primary/secondary sources...)
- student independence in locating appropriate images related to the topic/theme

BLMs

Social Studies BLM: Analyzing Images

Skill 6g – Viewing Visual Media

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-202	Distinguish between primary and secondary information sources for research.
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-305	Observe and analyze material and visual evidence for research. <i>Examples: artifacts, photographs, works of art...</i>
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>
S-308	Compare diverse perspectives in a variety of information sources.
S-309	Interpret information and ideas in a variety of media. <i>Examples: art, music, historical fiction, drama, primary sources...</i>

Video and media can offer students insights into experiences that would otherwise be unavailable to them. A key to teaching with video is to provide students with opportunities to be critical active viewers rather than passive recipients, and to include before-, during-, and after-viewing strategies. Introduce the video by setting the tone for viewing and explain how the segment relates to the ideas they are exploring.

Consider the use of a variety of strategies, before, during, and after viewing as indicated below. As well, consider these ideas:

- View longer videos in segments of 20 to 30 minutes.
- Tell students the name of the video and details about the theme before viewing.
- Clarify key terms or challenging vocabulary.
- Give the students a purpose, or something to watch for as they view the film.
- Avoid having students take notes during the video—this is difficult to do and interferes with active listening.
- If the film depicts a series of events, encourage students to focus on sequence and on causality (what led to what) rather than on dates and statistics.
- Encourage students to be critical about how realistically the video represents the topic (particularly if it deals with historical topics).

(continued)

Skill 6g – Viewing Visual Media *(continued)***Before viewing**

- Establish a purpose for viewing by describing what the students are about to view and points to watch for.
- Activate with “story-mapping” (i.e., predicting what the video might be about).
- Have students create questions about what they are wondering, or provide “focus questions” (i.e., informational questions, intuitive/interpretive questions...).

During viewing

- **Silent viewing:** Mute the volume to focus on cues (e.g., body language, setting, gestures, facial expressions...), and then review the segment with the sound. Discuss how perceptions changed with the sound.
- **Sound only:** Darken the screen to focus on audio cues (e.g., background noises, tone, sound effects...), and then review the segment with video. Discuss how perceptions changed with the video.
- **Jigsaw:** One group views silently while the other group listens only to the soundtrack. Members from opposite groups collaborate to share their information and ideas. Alternately, one-half of the class, the “listeners,” sits with their backs to the screen while the other half of the class, the “viewers,” faces the screen. After the video segment, the listeners ask the viewers questions, and the viewers describe what was happening in response to the listeners’ questions.
- **Freeze frame:** Pause the image to freeze the picture. Discuss new vocabulary, make further predictions and inferences, or have small-group discussions about connections to the concept, topic, or theme.

After viewing

- Students may ask new questions (e.g., “Some of my questions that were answered were...”, “Now, I know/wonder...”).
- Discuss and evaluate what they viewed and their feelings and connections to the content.
- Represent their new learning, or add new information to their inquiry journal or notebook.

(continued)

Appendix A – Skills Assessment

Skill 6g – Viewing Visual Media (*continued*)

Suggested outline for post-viewing reflection or discussion:

Video title and topic:	
Date of viewing:	
What did you see? Describe the images that impressed you.	What did you hear? Relate 4 – 5 ideas or words that you recall from the narration.
How did you feel about what you saw and heard?	Facts that were presented in the film:
What questions do you have?	Note one thing you learned about the past by viewing this video.
Did this film use or portray primary sources? Describe them.	
Write a comment on each element to evaluate this film. Historical accuracy: Photography: Clear narration: Interest and creativity:	

Think about...

- observing evidence of new understandings and/or gaps or misperceptions in students' understanding
- recording focused observations to facilitate further student inquiry (Note: Watch for individuals' curiosities, new questions, expertise....)

6h – Preparing and Conducting Surveys

Skills

S-100	Collaborate with others to establish and carry out group goals and responsibilities.
S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-300	Plan topics, goals, and methods for historical inquiry and research.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-308	Compare diverse perspectives in a variety of information sources.
S-400	Listen to others to understand their perspectives.
S-401	Use language that is respectful of human diversity.

Creating and conducting surveys is a form of participatory research that involves students in learning about their communities. Surveys may take the form of interviews where questions are asked and the responses recorded, or individual surveys where the person taking the survey records the answers. Surveys provide large amounts of information from a broad range of people and may take a lot of time to prepare, administer, and analyze. For this reason, consider whether the information you are collecting already exists (e.g., Internet, library, public records...) before conducting a survey.

In creating the survey identify the survey objectives to help focus concise, unbiased questions that will provide relevant information and avoid unnecessary data. To achieve the best possible completion rate, keep the survey as short as possible, ideally less than fifteen questions. The order of questions matters. Place simple questions first, more complex or controversial questions in the middle, and demographic questions, if required, at the end. Questions should be brief, direct, unambiguous, written in neutral language, and cover a single topic. Close-ended questions (e.g., Yes/No, True/False, Multiple Choice) are easier to administer and analyze. Open-ended questions may provide answers unrelated to the research topic and respondents may be reluctant to complete the survey. Before administering the survey, test it on people who are not familiar with the survey to determine if the questions are clear and the responses are providing the information required to address the research question.

(continued)

Appendix A – Skills Assessment**6h – Preparing and Conducting Surveys** *(continued)*

It is important to provide students with guidance in creating questions/surveys that demonstrate sensitivity and respect for the interviewees. Students need to understand the importance of

- using appropriate language
- respecting personal privacy
- ensuring that survey questions are not biased
- asking questions that respect religious or cultural protocols and/or sensitivities
- avoiding personal questions that might make interviewees uncomfortable

Surveys can be online or in paper format. Online surveys provide flexibility of completion times and facilitate summarization and analysis of data. Paper surveys are more cumbersome to process but are easier to present. After the survey has been administered, collate the results for analysis. A spreadsheet may be a useful tool for recording and analyzing results. Once the results are analyzed, communicate your findings with the survey participants and your community. Ensure that survey participants know their anonymity will be protected, and finish each survey with a sincere thank-you.

Think about...

- focusing assessment on a manageable number of students/outcomes
- constructing student-generated assessment criteria (e.g., What are the characteristics of good questions and/or effective surveys?)
- recording focused observations to monitor students' ability to analyze and draw conclusions from the information they collect through the use of surveys
- orally guiding/facilitating student reflection on the survey process

7 – SOCIAL STUDIES

7a – Creating Maps

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-205	Construct maps that include a title, legend, compass rose, scale, and latitude and longitude.
S-206	Select and interpret various types of maps for specific purposes.
S-207	Use latitude and longitude to locate and describe places on maps and globes.
S-302	Draw conclusions based on research and evidence.
S-403	Present information and ideas orally, visually, concretely, or electronically.

Students need to understand that maps are abstract representations of places on the Earth, and that maps illustrate real geographic information through the use of points, lines, symbols, and colours. Maps help students understand how both physical and human features are located, distributed, and arranged in relation to one another.

Students need opportunities to both read/interpret and create different types of maps. When engaging students in map-making, encourage the use of mental maps to help them think spatially. Verbalize directions or read stories aloud and have students create mental images of described places and spaces. Have students—individually or collaboratively—create maps from these oral sources of information to practise listening skills, following directions, and visualizing.

Early Years students create maps with simple pictorial representations of their surrounding environment (e.g., the classroom, school, and neighbourhood...) in a variety of media. By beginning with objects, pictures, or drawings and then moving to abstract symbols, younger students come to understand the idea of symbolic representation. As students grow developmentally, the maps they create become increasingly more abstract, and students become proficient in the use of various map components (e.g., title, legend, compass rose, scale, latitude and longitude...). Map-making and map reading should eventually become as natural for students as reading and writing. Encourage students to incorporate maps into their daily work (e.g., journals, stories, research...).

(continued)

Appendix A – Skills Assessment**7a – Creating Maps (continued)**

Map construction can be an individual, small-group, or class learning experience, and provides students with opportunities to develop, clarify, and communicate their understanding of abstract ideas in a visual and symbolic format. Through the use of symbols and drawings in the creation of maps, students demonstrate their understanding of place, distance, and relationships.

Think about...

- observing for students' map-reading, interpreting, and creating skills
- constructing student-generated assessment criteria (e.g., What are the components of a quality map?)
- focusing assessment on the accuracy and completeness of the information in the map
- recording focused observations to monitor student growth over time and to determine which students need differentiation
- guiding peer and self-assessment, using a Met/Developing/Not-Yet-Met strategy
- adding student-made maps to the students' portfolios as evidence of understanding of mapping skills

**BLMs**

Note: The following departmental publication is available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 2: Constructing Student-Generated Criteria for Quality Work

7b – Using/Interpreting Maps

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-206	Select and interpret various types of maps for specific purposes.
S-207	Use latitude and longitude to locate and describe places on maps and globes.
S-302	Draw conclusions based on research and evidence.

Students need to understand that maps are abstract representations of places on the Earth, and that maps illustrate real geographic information through the use of points, lines, symbols, and colours. Maps help students understand how both physical and human features are located, distributed, and arranged in relation to one another. Students also need to know that maps represent a particular time and place and change over time. It is important to teach them to look for the source of the map and when/where it was created in order to be aware of its historical and political context and implications.

Students need opportunities to both read and create different types of maps. As students engage in strategies that involve map-reading/interpretation, they learn that maps have particular components (e.g., title, symbols, legend, directions, scale...). Students also come to understand that maps are important sources of physical and human geographic information and are fundamental to social studies inquiry. Maps help students think critically as they find locations and directions, determine distances, observe distributions of people and resources, and interpret and analyze patterns and relationships.

Encourage students to consult maps when they engage in individual research and when they are working in collaborative groups. As well, use and interpret maps as a whole-class learning experience. Maps, globes, and atlases are rich and engaging resources that stimulate questions, conversation, and critical thinking.

Think about...

- teaching, modelling, and guiding map-reading/interpreting skills
- observing students' knowledge and skills in reading and interpreting a variety of maps and atlases to plan for differentiation
- observing students' skills in connecting information from maps to other concepts
- orally guiding/facilitating reflection, using a Y-chart, T-Chart, or journals (e.g., What did I learn from this map? Compare/contrast different maps...). (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)
- adding map interpretations and reflections to the students' portfolios as evidence of understanding of mapping skills

(continued)

7b – Using/Interpreting Maps *(continued)***BLMs**

Note: The following departmental publication is available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 1: Reflection-Metacognition

7c – Interpreting Timelines

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>

Timelines generally consist of a vertical or horizontal line, with graduated marking points to indicate years, decades, centuries, or other periods of time. The points symbolically represent a chronological sequence of time, making past events more concrete in nature for students. The portrayal of significant dates, events, people, and ideas provides a visual reference for students, and helps them organize their thinking chronologically. Similar to maps, timelines require an understanding of proportion and scale, but they also use images, icons, and vocabulary that are associated with specific historical periods.

Interpreting timelines through social studies inquiry helps students imagine and visualize events of the past, and therefore better understand abstract concepts related to history and chronology. Students need to see and interpret timelines and understand their nature and purpose before they are asked to create their own timelines.

Think about...

- teaching, modelling, and guiding interpretation of timelines
- planning for differentiation by observing students' knowledge and skills in interpreting timelines
- observing students' skills in connecting information from the past, present, and future, and descriptions of periods of time
- orally guiding/facilitating reflection, using a Y-chart, T-Chart, or journals (e.g., What I am learning about timelines? Evidence of my learning is...). (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)
- adding student timeline interpretations and reflections to the students' portfolios as evidence of understanding

BLMs

Note: The following departmental publication is available at the Manitoba Text Book Bureau.
Independent Together: Supporting the Multilevel Learning Community

- BLM 1: Reflection-Metacognition
- BLM 6: Daily Observation Form

7d – Creating Timelines

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-204	Create timelines and other visual organizers to sequence and represent historical figures, relationships, or chronological events.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>
S-403	Present information and ideas orally, visually, concretely, or electronically.

Timelines generally consist of a vertical or horizontal line, with graduated marking points to indicate years, decades, centuries, or other periods of time. The points symbolically represent a chronological sequence of time, making past events more concrete in nature for students. The portrayal of significant dates, events, people, and ideas provides a visual reference for students, and helps them organize their thinking chronologically. Similar to maps, timelines require an understanding of proportion and scale, but they also use images, icons, and vocabulary that are associated with specific historical periods.

Before students create their own timelines, they need opportunities to use and understand the nature and purpose of timelines. Students first examine, discuss, and use prepared timelines. Next, they contribute to the making of a class timeline, discussing and placing events on the timeline. The timeline can be an ongoing project that is integrated into the instructional process. Ideally, a class timeline would occupy the length of one wall of the classroom, providing room for all of the historical events that are discussed, as well as space for drawings, pictures, and illustrations. Finally, individually or in collaborative groups, students create their own timeline. Depending on developmental ability, students might simply label and illustrate events on a timeline that already has periods of time indicated. Alternately, students can integrate mathematical skills to determine and mark time periods on the timeline, before labelling and illustrating events.

(continued)

7d – Creating Timelines (*continued*)

Think about...

- constructing student-generated assessment criteria (e.g., What are the components of a quality timeline?)
- focusing assessment on the accuracy and completeness of the information (e.g., chronological order, scale, appropriate choice of images...)
- offering descriptive feedback
- recording focused observations to monitor student growth over time and to determine which students need differentiation
- guiding peer and self-assessment
- orally guiding/facilitating reflection, using a Y-chart, T-Chart or journals (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)
- adding a timeline and reflection to the students’ portfolios as evidence of growth and understanding of timelines

BLMs

Note: The following departmental publication is available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 1: Reflection-Metacognition
- BLM 2: Constructing Student-Generated Criteria for Quality Work
- BLM 5: Focused Observation Form

7e – Social Action

Skills

S-100	Collaborate with others to establish and carry out group goals and responsibilities.
S-101	Use a variety of strategies to resolve conflicts peacefully and fairly. <i>Examples: clarification, negotiation, compromise...</i>
S-102	Make decisions that reflect fairness and equality in their interactions with others.
S-103	Make decisions that reflect care, concern, and responsibility for the environment.
S-104	Negotiate constructively with others to build consensus and solve problems.
S-105	Recognize bias and discrimination and propose solutions.
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-301	Evaluate the advantages and disadvantages of solutions to a problem.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-400	Listen to others to understand their perspectives.
S-401	Use language that is respectful of human diversity.
S-402	Persuasively express differing viewpoints regarding an issue.
S-403	Present information and ideas orally, visually, concretely, or electronically.
S-404	Elicit and clarify questions and ideas in discussions.
S-405	Articulate their beliefs and perspectives on issues.

As students are given opportunities to develop and use the skills of active responsible citizenship, they should also be encouraged—when necessary and in appropriate ways—to engage in social action.

Student social action involves students interacting with others for the purpose of change. Social action might involve just a few students, the entire class, several classrooms or grades, the entire school, or the greater community. As students develop knowledge, values, and skills related to citizenship, they need to understand that social action is not only a right but is perhaps the most important responsibility for citizens living within a democratic society. They also need to learn that, in most cases, social action involves collaboration, cooperation, and being respectful of others.

Social action is a natural result of authentic social studies inquiry. As students learn about social issues that affect them or others, and as they become aware of problems and injustices in their communities, and if they are truly empowered to be active and responsible citizens, they are likely to take actions that initiate change. If and when they do take action, there is perhaps no better means of assessing student learning. As students engage in social action, their behaviours become an observable expression of the social studies knowledge, values, and skills they have been learning.

(continued)

7e – Social Action (*continued*)

Empowered students might initiate social action on their own (e.g., coming to the aid of a victim of bullying, circulating a petition in the classroom or school...) or teachers may choose to encourage student social action. Student social action may be the culminating activity of a learning experience, a particular cluster, or the school year. It might take the form of a local classroom or school project, such as a recycling/anti-litter campaign, or the creation of a local nature preserve. Social action with a global focus might involve raising funds for a community well or sending school supplies to children in a developing country. Events such as UNICEF campaigns and Earth Day may trigger projects. Opportunities might also arise for students to be involved in more complex civil action, where projects involve the lobbying of policy/lawmakers and legislators.

Social action is the ultimate application of social studies learning. It is through social action that students' altruistic attitudes are expressed within the context of the knowledge and skills of the curriculum. Social action projects not only familiarize students with specific issues, but also provide opportunities to understand useful processes, such as conducting issue-based research, letter-writing campaigns, media publicity, the creation of surveys and petitions, and demonstrations and other civil actions.

Think about...

- setting classroom goals for developing action plans and becoming active responsible citizens
- constructing student-generated assessment criteria (e.g., What does a democratic classroom/an active responsible citizen look/sound like? Why?)
- offering descriptive feedback to students regarding their approach to social action
- recording focused observations to inform instruction
- guiding peer and self-assessment
- orally guiding/facilitating reflection, using a Y-chart, T-Chart or journals (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)
- adding an account and/or images of evidence of social action to the students' portfolios

BLMs

8 – Content Reading

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction.</i>
S-202	Distinguish between primary and secondary information sources for research.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>
S-308	Compare diverse perspectives in a variety of information sources.
S-309	Interpret information and ideas in a variety of media. <i>Examples: art, music, historical fiction, drama, primary sources...</i>
S-310	Recognize that interpretations of history are subject to change as new information is uncovered or acknowledged.

Content reading is integral to acquiring information and ideas for learning about a particular class topic or theme; and content subject areas are ideal contexts for improving, acquiring, and applying reading comprehension skills and strategies to make meaning of a variety of texts. Teachers need to extend reading instruction beyond the ELA classroom, and to offer students opportunities to practise reading comprehension strategies and to make connections in the content areas. Text sets are valuable resources for supporting content reading and a broad range of reading abilities. A text set consists of a variety of non-fiction and fiction texts on a theme or unit of study (e.g., picture books, visuals, short stories, historical fiction, atlases, songs, poetry, media texts, vignettes, textbooks...).

Competent readers use reading comprehension strategies independently before, during, and after reading. Additional information on characteristics of readers may be found in *Success for All Learners* (Manitoba Education and Training, 1996b, page 6.39). Each day, teachers need to model a variety of before, during, and after strategies to help students choose and become independent in the use of these strategies. Developing readers need access to texts that they can read, and scaffolding and guided instruction to successfully access the required information and ideas from texts that they cannot yet read independently.

Think about...

- using read-aloud, shared reading, guided reading, partner reading, and independent reading literacy contexts for assessing comprehension strategies and differentiating instruction
- monitoring students' choices of texts for seeking information

(continued)

8 – Content Reading (continued)

- observing comprehension strategies including predicting, questioning, imaging, self-monitoring, re-reading, inferring, skimming and scanning, retelling, and summarizing
- recording focused observations to determine students’ ability to get information and ideas from textual cues (titles, subtitles, tables of content, images, captions...) and text structures/features (compare and contrast, sequential, description, cause and effect...)

9 – WRITING

9a – Journals

**Skills**

S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-401	Use language that is respectful of human diversity.
S-405	Articulate their beliefs and perspectives on issues.

Journals are notebooks in which students record their personal thoughts and ideas, as well as information and questions about, and reflections on, what they hear, view, read, write, discuss, and think. Journals provide students with the opportunity to use exploratory language. The responses in personal journals are based on student feelings, and teachers should be sensitive to the private nature of personal journals. Other journals explore, clarify, and discover ways of refining and assessing thinking. Journals may include both written and representational formats. They may be a separate notebook or a section of a larger notebook, and, as well, may be specifically devoted to response and used across curriculum areas.

Think about...

- using student journals as a tool to observe values
- constructing student-generated assessment criteria (e.g., What does quality reflective journal writing look like?)
- posing questions and offering prompts to encourage reflection
- guiding self-assessment of journals
- encouraging students to select journal entries for inclusion in their portfolios as evidence of growth in metacognitive thinking over time
- assessing the journal for growth over time and/or for summative purposes

Appendix A – Skills Assessment

9b – Exit Slip

**Skills**

S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-405	Articulate their beliefs and perspectives on issues.

An Exit Slip is simply a brief note or conversation with students at the end of a lesson. Exit Slips provide students with opportunities to reflect on their learning and provide teachers with feedback to inform future instruction as students summarize their understanding of a lesson. Exit Slips may be open-ended, include a reflective stem (e.g., Today I learned...; I am still confused about...; I would like to know more about...; A question I have is...), or used to set a learning goal for the next day. Exit Slips may be completed individually or in small groups. Review Exit Slip responses to guide planning for future instruction.

Think about...

- observing students' perceived strengths and areas for further learning
- focusing assessment on the accuracy and completeness of the information
- observing students' opinions, assumptions, and conclusions about their learning of a topic/issue/theme

**BLMs**

Note: The following departmental publication is available at the Manitoba Text Book Bureau.

Success for All Learners

- Page 6.61: Admit and Exit Slips

9c – RAFT

Skills

S-102	Make decisions that reflect fairness and equality in their interactions with others.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-307	Compare differing accounts of historical events.
S-401	Use language that is respectful of human diversity.
S-402	Persuasively express differing viewpoints regarding an issue.
S-403	Present information and ideas orally, visually, concretely, or electronically.
S-405	Articulate their beliefs and perspectives on issues.

RAFT (Role, Audience, Format, Topic) is a writing strategy that provides students with opportunities to creatively analyze and synthesize information by writing from a different viewpoint. Students assume a Role other than themselves (e.g., animal, historical figure, comic book character...). They choose an Audience (e.g., a person living in another time or place, a corporation, an inanimate object...). They select a Format (e.g., poem, letter, journal...) for their writing. They also choose a Topic (e.g., plea, persuasion, demand, excuse...) related to the inquiry. Because the focus of the writing is so well defined in a RAFT, students gain experience in clearly and completely explaining their point of view. Teachers need to model and guide the use of RAFT before students work independently. RAFT may be used as an activating strategy to help identify students' prior knowledge or as a culminating task to demonstrate understanding.

Think about...

- sharing and reflecting on examples of point-of-view genre in literature
- focusing assessment on the accuracy and completeness of the information
- constructing student-generated assessment criteria (e.g., What does a quality written point of view (RAFT strategy) look/sound like? Why?)
- recording focused observations to monitor student growth over time and to determine which students need differentiation
- guiding peer and self-assessment
- having students include RAFT examples in their portfolios as evidence of learning

(continued)

9c – RAFT *(continued)***BLMs**

Success for All Learners

- Page 6.116: Reading from Another Point of View

9d – Persuasive Writing

**Skills**

S-102	Make decisions that reflect fairness and equality in their interactions with others.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-307	Compare differing accounts of historical events.
S-401	Use language that is respectful of human diversity.
S-402	Persuasively express differing viewpoints regarding an issue.
S-403	Present information and ideas orally, visually, concretely, or electronically.
S-405	Articulate their beliefs and perspectives on issues.

Persuasive writing provides opportunities for students to present ideas and information and express their opinions and viewpoints on an issue. Persuasive writing is also often a component of social action. Students need to be aware of their intended audience as they state their view, and present evidence and examples to support their position. Composing persuasive writing allows students to practise organizational skills and make connections between prior knowledge and new understandings. Teachers need to model, guide, and offer time for students to practise persuasive writing techniques. Persuasive writing can provide evidence of attitudinal changes as students evaluate and synthesize new knowledge and information.

Think about...

- sharing and reflecting on examples of persuasive writing
- focusing assessment on the accuracy and completeness of the information
- constructing student-generated assessment criteria (e.g., What does quality persuasive writing look/sound like? Why?)
- recording focused observations to monitor student growth in order to determine which students need differentiation
- guiding peer and self-assessment
- having students include persuasive writing examples in their portfolios as evidence of learning

**BLMs**

Note: The following departmental publication is available at the Manitoba Text Book Bureau.
Independent Together: Supporting the Multilevel Learning Community

- BLM 2: Constructing Student-Generated Criteria for Quality Work

Appendix A – Skills Assessment

9e – Descriptive Writing

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-401	Use language that is respectful of human diversity.

Descriptive writing presents people, places, things, or events with enough detail to enable the reader to create a mental picture and share the writer's sensory experience (e.g., sights, smells, sounds, tastes, and feelings) of the subject of the writing. It provides opportunities for students to express their feelings creatively and to experiment with language to convey those feelings to the audience. Encourage the use of pre-writing strategies (e.g., brainstorming, conferencing, drawing, read/listen to examples of descriptive writing, observe/view...) and planning structures (e.g., outlining, mapping, story frames...) to assist students in the writing process. The writing form may be a paragraph, essay, poem, character portrait/sketch, or other forms of descriptive writing. As students engage in the writing process, encourage them to share their drafts with peers and revise their writing to create the desired mood.

Think about...

- sharing and reflecting on examples of descriptive writing
- modelling, guiding, and offering time to practise descriptive writing
- constructing student-generated assessment criteria (e.g., What does quality descriptive writing look/sound like? Why?)
- offering descriptive feedback
- recording focused observations to monitor student growth over time and to determine which students need differentiation
- guiding peer and self-assessment
- having students select descriptive writing pieces for inclusion in their portfolios and highlighting evidence of their own growth
- posing reflective questions (e.g., What are you discovering as you write? What surprises you? What might your readers think as they read this piece? What goals do you have for your next writing piece?...)

(continued)

Appendix A – Skills Assessment

9f – Narrative Writing

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction..</i>
S-300	Plan topics, goals, and methods for historical inquiry and research.
S-302	Draw conclusions based on research and evidence.
S-304	Distinguish fact from opinion and interpretation.
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>
S-401	Use language that is respectful of human diversity.

Narrative writing presents a personal or fictional experience or tells the story of a real or imagined event. Narrative writing takes many forms (e.g., paragraph, anecdote, short story, diary, autobiography, myth, legend, newspaper article, dialogue, personal letter...). As students plan their narrative, they may need guidance in developing the details to create an identifiable storyline that is easy for the reader to follow. Encourage the use of pre-writing strategies (e.g., brainstorming, conferencing, drawing, read/listen to examples of narrative writing, research, observe/view...) and planning structures (e.g., outlining, mapping, story frames...) to assist in the writing process and to recreate their narrative for the reader by including details that support, explain, and enhance the story. Composing narrative writing provides students with opportunities to think and write stories about people, places, and events.

Think about...

- sharing and reflecting on examples of narrative writing
- modelling, guiding, and offering time to practise narrative writing
- constructing student-generated assessment criteria (e.g., What does quality narrative writing look/sound like? Why?)
- offering descriptive feedback
- recording focused observations to monitor student growth over time and to determine which students need differentiation
- guiding peer and self-assessment
- having students select narrative writing pieces for inclusion in their portfolios and highlighting evidence of their own growth
- posing reflective questions (e.g., What are you discovering as you write? What surprises you? What might your readers think as they read this piece? What goals do you have for your next writing piece?...)

(continued)

- BLM 5: Focused Observation Form

9g – Expository Writing

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-300	Plan topics, goals, and methods for historical inquiry and research.
S-302	Draw conclusions based on research and evidence.
S-304	Distinguish fact from opinion and interpretation.
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>
S-401	Use language that is respectful of human diversity.

The purpose of expository writing is to inform, clarify, explain, define, or instruct the reader on a particular topic. Expository writing provides opportunities for students to develop skills in clarity and organization in their writing. Expository writing also allows students opportunities to become familiar with and use text structures (e.g., compare/contrast, cause/effect, problem/solution, main idea/detail, sequence/chronology...). Forms of expository writing include paragraphs, essays, reports, news articles, research, and business or formal letters. Encourage the use of pre-writing strategies (e.g., brainstorming, conferencing, drawing, reading/listening to examples of expository writing, research, observe/view...) and planning structures (e.g., outlining, mapping, story frames...) to assist students in the writing process. As students encounter this type of writing in much of their content reading, gaining experience in composing expository may help them develop skills in reading for information.

Think about...

- sharing and reflecting on examples of expository writing
- focusing assessment on the accuracy and completeness of the information
- modelling, guiding, and offering time to practise expository writing
- constructing student-generated assessment criteria (e.g., What does quality expository writing look/sound like? Why?)
- offering descriptive feedback
- recording focused observations to monitor student growth over time and to determine which students need differentiation

(continued)

9g – Expository Writing *(continued)*

- guiding self- and peer assessment
- having students select expository writing pieces for inclusion in their portfolios and highlighting evidence of their growth
- posing reflective questions (e.g., What are you discovering as you write? What surprises you? What might your readers think as they read this piece? What goals do you have for your next writing piece?...)

Appendix A – Skills Assessment

9h – Creating Plans/Outlines

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-300	Plan topics, goals, and methods for historical inquiry and research.

Plans and outlines may be used for a wide variety of purposes, both simple and complex (e.g., determining roles for a group activity, planning events or special days, creating goals for research projects, drafting plot outlines...). Creating a written plan provides opportunities for students to establish a process for achieving their learning goals. Students identify their goals, outline the steps they will use to achieve them, and determine how they will know their goals have been attained. As students engage in planning, they come to understand that the plan is a means to achieving an end, and not the end itself. Written plans may be developed collaboratively or individually.

Think about...

- focusing assessment on a manageable number of learning outcomes/students
- focusing assessment on the accuracy and completeness of the information
- teaching, modelling, and guiding the creation of plans and outlines
- constructing student-generated assessment criteria (e.g., What does a quality plan or outline look/sound like? Why?)
- recording focused observations to monitor student growth over time and to determine which students need differentiation
- guiding peer and self-assessment
- encouraging students to revise plans/outlines as needed
- orally guiding/facilitating reflection on planning, using a Y-chart or journals (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)

(continued)

Appendix A – Skills Assessment

9i – Recording Information

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-202	Distinguish between primary and secondary information sources for research.
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>
S-309	Interpret information and ideas in a variety of media. <i>Examples: art, music, historical fiction, drama, primary sources...</i>

As students are engaged in inquiry and research, they need to experience various strategies for recording and organizing acquired information. Strategies may include drawing, simple note-making skills, process notes, Slim Jims, concept maps, or graphic representations. Additional information on information processing strategies may be found in *Success for All Learners* (Manitoba Education and Training, 1996b, page 6.49) and “Strategies That Make a Difference” (Manitoba Education and Training, 1996a, pages 59-64, 76-77, and 114-117). As students develop a repertoire of strategies, they become able to choose the most appropriate method related to the purpose and the type of information.

Think about...

- teaching and modelling one strategy at a time for recording information (Note: It takes students approximately six to eight weeks to internalize a strategy and to apply it independently.)
- focusing assessment on the accuracy and completeness of the information
- recording focused observations to determine which students need differentiation and scaffolding
- guiding peer and self-assessment
- observing students’ choices of strategies for recording information
- orally guiding/facilitating reflection, using a Y-chart or T-chart. (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)

10 – PRESENTATIONS/REPRESENTATIONS

10a – Dramatic Presentations

Skills

S-100	Collaborate with others to establish and carry out group goals and responsibilities.
S-102	Make decisions that reflect fairness and equality in their interactions with others.
S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-400	Listen to others to understand their perspectives.
S-401	Use language that is respectful of human diversity.
S-402	Persuasively express differing viewpoints regarding an issue.
S-403	Present information and ideas orally, visually, concretely, or electronically.
S-405	Articulate their beliefs and perspectives on issues.

Drama is a form of language and literature that tells a story through the actions and speech of characters. Drama (also known as role-play) is a powerful tool that can stimulate creative and critical thinking through a variety of intelligences and develop language and literacy. Dramatizations are often collaborative in nature and intended to be shared with a broader audience. In planning dramatizations, students consider how the structure of the presentation will effectively communicate new information to their intended audience. Drama provides opportunities for students to make connections between their personal experiences and the lives of others, and explore diverse perspectives or points of view, and helps students develop empathy and enrich their social consciousness.

Guidelines for drama and role-play

- The context and roles should be clearly defined, while allowing some latitude for spontaneity and creativity on the part of the students.
- Determine a designated time frame for the presentation.
- When topics are controversial or require solutions, encourage students to consider diverse perspectives and alternative solutions, to use language appropriately, and to take a position and reach a conclusion or resolution.
- Provide students time to prepare and to access any preparatory information they need.

(continued)

10a – Dramatic Presentations (*continued*)

- Role descriptions should provide enough information to help students “enter into” the character they are to portray (general characteristics, beliefs, and values) but should not follow a pre-determined script.
- Students may complete a character outline (see BLM) to help them prepare.
- Appropriate use of props and costumes
- Discuss with students the effectiveness of realism versus fantasy scenarios, the need to be mindful of anachronisms, oversimplifications, and the indiscriminate use of stereotypes.

Variations

- Use of props and costumes
- If there are not enough roles for everyone in the group, one student could be assigned the task of being a witness or observer who “thinks out loud” to the audience without disrupting the action.
- Students could be asked to reverse roles or switch points of view in a second role-play.
- A narrator or series of narrators may be named to help set the scene and expand on what is happening.

Think about...

- focusing assessment on a manageable number of outcomes/students—keeping the end in mind
- constructing student-generated assessment criteria (e.g., What does a quality dramatization/role-play look/sound like? Why?)
- offering descriptive feedback and conferencing with students throughout the process
- orally guiding/facilitating reflection on planning, using a Y-chart or journals (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)
- allowing time for a group debriefing, including the audience, after the presentation.
- recording focused observations during the planning and presentations of dramatizations

10b – Video Production

Skills

S-100	Collaborate with others to establish and carry out group goals and responsibilities.
S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-309	Interpret information and ideas in a variety of media. <i>Examples: art, music, historical fiction, drama, primary sources...</i>
S-401	Use language that is respectful of human diversity.
S-402	Persuasively express differing viewpoints regarding an issue.
S-403	Present information and ideas orally, visually, concretely, or electronically.

Video projects provide opportunities for students to develop and apply skills in research, critical thinking, problem solving, collaborative learning, and communication, and to express their creativity. Students learn to mix moving and still images, text, sound, music, and dialogue to create compelling stories and to communicate messages. Students produce videos for a variety of reasons—to inspire, to inform, to instruct, and to entertain. Video project subjects include biographies, social issues/advocacy, community stories/local history, how to, news, commercials, science and nature, reenactments, travel and tourism, or documentaries.

Students need to plan their video project before taping. Once a topic is chosen, students prepare a descriptive overview and conduct their research. They then plan the script, create a storyboard, record the scenes, and edit. Students can assume the roles of Executive Director, Director, Producer, Researcher, Scriptwriter, Storyboard Artist, Set Designer, Camera Operator, Sound Technician, Editor, Online Graphic Artist, and Actors. Video production helps students learn media literacy skills and become more critical consumers of media.

(continued)

10b – Video Production (*continued*)

Think about...

- constructing student-generated assessment criteria (e.g., What does a quality video look/sound like? Why?)
- focusing assessment on the accuracy and completeness of the information
- conferencing with students throughout the process
- orally guiding/facilitating reflection on planning, using a Y-chart or journals (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)
- offering descriptive feedback
- recording focused observations during the planning and production of videos

10c – Artistic Representations

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction.</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-309	Interpret information and ideas in a variety of media. <i>Examples: art, music, historical fiction, drama, primary sources...</i>
S-403	Present information and ideas orally, visually, concretely, or electronically.

Engaging in the creation of art allows students to express their learning and their understanding in alternative ways, but, more importantly, provides a venue for them to be truly creative. When they are given opportunities to communicate their ideas artistically, not only do students learn more about the topic at hand, they learn about themselves, their culture and identity, as well as the larger world around them.

The processes related to the creation of art include exploration and active learning, as well as the use of imagination. These processes enhance student understanding and engage their attention. As well, the opportunity to be creative motivates and connects students to subject matter in emotional, physical, and personal ways. Art supports the development of spatial, kinesthetic, interpersonal, and intrapersonal intelligences, and promotes open-ended, non-linear thinking. As students participate in meaningful artistic activities, they are better able to understand and appreciate the constant flow of images, sounds, and messages (e.g., art and media) that surround them. They also come to understand and empathize with people from diverse groups and cultures (e.g., racial, religious, age, gender, and language).

Think about...

- constructing student-generated assessment criteria (e.g., What does a quality artistic representation look like?)
- encouraging the exploration and use of a variety of media in their artistic representations
- conferencing with students throughout the process
- guiding peer and self-assessment
- focusing on the principles and elements of art (e.g., line, colour, shape, texture, movement, balance...)
- posing reflective questions
- offering descriptive feedback
- having students select artistic pieces for inclusion in their portfolios and highlighting evidence of their understanding

(continued)

10c – Artistic Representations *(continued)*

- posing reflective questions (e.g., What are you discovering as you create? What surprises you? What might your audience think as they view this piece? What goals do you have for your next artistic piece? Why did you choose this medium to express your understanding?)

**BLMs**

Note: The following departmental publication is available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 1: Reflection-Metacognition
- BLM 2: Constructing Student-Generated Criteria for Quality Work

10d – Musical Representations

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-309	Interpret information and ideas in a variety of media. <i>Examples: art, music, historical fiction, drama, primary sources...</i>
S-401	Use language that is respectful of human diversity.
S-403	Present information and ideas orally, visually, concretely, or electronically.
S-405	Articulate their beliefs and perspectives on issues.

Making music in the classroom contributes to students’ cognitive development including reasoning, creativity, thinking, decision-making, and problem-solving skills. Creating songs, raps, chants, or other musical forms helps focus learners’ attention and provides a safe and motivating social learning context in which all students can contribute. Putting curricular concepts into musical form is consistent with theories of multi-sensory learning. Students can create lyrics to demonstrate their understanding of concepts and perform them to original or familiar melodies. Making music is a motivating and fun activity that engages the whole brain and helps move information into long-term memory. Making music also creates a language-rich environment and promotes self-esteem and a sense of inclusion and collaboration.

Think about...

- encouraging the use of a variety of musical genres
- conferencing with students throughout the process
- guiding peer and self-assessment
- focusing on the principles of music (e.g., rhythm, harmony...)
- offering descriptive feedback
- having students select recordings of their musical pieces for inclusion in their portfolios to highlight evidence of their understanding
- posing reflective questions (e.g., What are you discovering as you create? What surprises you? What might your audience think as they listen to this piece? What goals do you have for your next musical piece? Why did you choose this genre to express your understanding?)

BLMs

Note: The following departmental publication is available at the Manitoba Text Book Bureau.
Independent Together: Supporting the Multilevel Learning Community

- BLM 1: Reflection-Metacognition
- BLM 2: Constructing Student-Generated Criteria for Quality Work

11 – INFORMATION AND COMMUNICATION TECHNOLOGIES

11a – Print and Electronic Research

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-202	Distinguish between primary and secondary information sources for research.
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-300	Plan topics, goals, and methods for historical inquiry and research.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-305	Observe and analyze material or visual evidence for research. <i>Examples: artifacts, photographs, works of art...</i>
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>
S-307	Compare differing accounts of historical events.
S-308	Compare diverse perspectives in a variety of information sources.
S-309	Interpret information and ideas in a variety of media. <i>Examples: art, music, historical fiction, drama, primary sources...</i>
S-310	Recognize that interpretations of history are subject to change as new information is uncovered or acknowledged.

Print and electronic research is one way of gathering knowledge within the inquiry process. The inquiry process includes the following stages:

- Choose a theme or topic.
- Identify and record prior knowledge.
- Ask initial questions.
- Explore and select primary and secondary sources.
- Plan for inquiry.
- Gather, process, and record information.
- Focus the inquiry.

(continued)

Appendix A – Skills Assessment

11a – Print and Electronic Research (*continued*)

- Plan to express learning.
- Create performances/demonstrations/products.
- Celebrate and reflect.

Research helps students construct knowledge and develop their understanding as they acquire new information and build on prior knowledge. The focus of the research is often guided by student-generated questions related to the knowledge-learning outcomes. Observe and offer guidance to students as they engage in research in order to help them focus their learning. Additional information on the inquiry process may be found in *Independent Together: Supporting the Multilevel Learning Community* (Manitoba Education and Youth, 2003, Chapter 6, Integrated Learning Through Inquiry: A Guided Planning Model pages 6.1–6.18) and “Strategies That Make a Difference” (Manitoba Education and Training, 1996a, pages 73–93).

Think about...

- focusing assessment on a manageable number of outcomes/students—keeping the end in mind
- focusing assessment on the accuracy and completeness of the information
- constructing student-generated assessment criteria (e.g., referencing sources, avoiding plagiarism, recognizing bias, relevancy, validity of sources...)
- recording focused observations to monitor student growth over time and to determine which students need differentiation
- encourage students to use a variety of before, during, and after strategies throughout the research process.
- conferencing with students throughout the research process

BLMs

Note: The following departmental publication is available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 2: Constructing Student-Generated Criteria for Quality Work
- BLM 5: Focused Observation Form
- BLM 7: Our/My Learning Plan

11b – Using Graphics Software

Skills

S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-403	Present information and ideas orally, visually, concretely, or electronically.

Students may use graphics software to illustrate and label concepts and ideas. Images created with graphics software may be imported into other applications (e.g., word processor, presentation software...) and more fully explained. Students may change and adapt previously created images to reflect new understanding as additional information is acquired.

Think about...

- focusing assessment on the visual representation of concepts and ideas
- constructing student-generated assessment criteria (e.g., What do quality illustrations/diagrams look like?)
- having students select graphics for inclusion in their portfolios and highlighting evidence of their understanding
- offering descriptive feedback
- guiding peer and self-assessment

BLMs

Note: The following departmental publication is available at the Manitoba Text Book Bureau.
Independent Together: Supporting the Multilevel Learning Community

- BLM 2: Constructing Student-Generated Criteria for Quality Work

11c – Email

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>
S-401	Use language that is respectful of human diversity.

Email offers authentic opportunities for students to communicate with others, near and far. Students articulate ideas and information and analyze responses for relevancy and accuracy. Students may use email to conduct interviews, request information, state a position, or share understandings on a topic or issue. Help students identify the purpose of their email communications and model compositions to achieve various purposes. As well, assist students in selecting style and language to match audience and purpose, and ensure that they use language that is respectful of others. Teach students about safety on the Internet and the importance of not including personal information in email communication with people they do not know.

Think about...

- modelling appropriate Internet practices
- focusing assessment on the clarity of student communication and the match of style and tone with purpose
- constructing student-generated assessment criteria (e.g., What does an appropriate Internet communication look/sound like? Why?)
- offering descriptive feedback
- guiding student self-reflection regarding email they send and receive (e.g., tone, validity, bias, accuracy...)

BLMs

Note: The following departmental publication is available at the Manitoba Text Book Bureau.
Independent Together: Supporting the Multilevel Learning Community

- BLM 2: Constructing Student-Generated Criteria for Quality Work

11d – Desktop Publishing

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-302	Draw conclusions based on research and evidence.
S-401	Use language that is respectful of human diversity.
S-403	Present information and ideas orally, visually, concretely, or electronically.

Desktop publishing includes the use of text, images, maps, and charts to communicate information and concepts. It provides opportunities for students to synthesize new knowledge and represent their understandings creatively. Examples of desktop-published products include brochures, posters, and newsletters. They may be produced collaboratively or individually. Encourage students to identify the purpose of the final product and to plan accordingly to ensure it communicates the purpose effectively to their intended audience.

Think about...

- focusing assessment on the layout, organization, visual appeal, content choices, and whether the final product communicates the purpose effectively
- focusing assessment on the accuracy and completeness of the information
- constructing student-generated assessment criteria (e.g., What does a quality brochure look like?)
- having students select published pieces for inclusion in their portfolios and highlighting evidence of their understanding
- offering descriptive feedback throughout the process
- guiding peer and self-assessment

BLMs

Note: The following departmental publication is available at the Manitoba Text Book Bureau.
Independent Together: Supporting the Multilevel Learning Community

- BLM 1: Reflection-Metacognition
- BLM 2: Constructing Student-Generated Criteria for Quality Work

11e – Word Processing

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.

Word processing supports students throughout the writing process and facilitates them in revising initial drafts and in the organization of their writing to best represent their current understandings. Students may take advantage of standard word-processing features to improve their writing (e.g., spell- and grammar check, thesaurus, formatting options...). Encourage students to organize and save electronic copies of drafts as they work through the editing and revision process as evidence of their growth and improvement over time.

Think about...

- modelling and guiding the development of word-processing skills and strategies
- constructing student-generated assessment criteria (e.g., What does a quality word-processed document look like?)
- having students select word-processed pieces for inclusion in their portfolios and highlighting evidence of their understanding
- recording focused observations to determine skills in organizing information and ideas, revising and editing, and organizing and saving electronic copies of files
- offering descriptive feedback

BLMs

Note: The following departmental publications are available at the Manitoba Text Book Bureau.

Kindergarten to Grade 8 English Language Arts: A Foundation for Implementation, “Strategies That Make a Difference”

- BLM 28a: Writing Self-Assessment
- BLM 28b: Writing Self-Assessment (continued)

Independent Together: Supporting the Multilevel Learning Community

- BLM 2: Constructing Student-Generated Criteria for Quality Work
- BLM 5: Focused Observation Form

11f – Concept Mapping

**Skills**

- | | |
|-------|---|
| S-200 | Select information from a variety of oral, visual, material, print, or electronic sources.
<i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction..</i> |
| S-203 | Select and use appropriate tools and technologies to accomplish tasks. |

Concept mapping involves the visual organization of ideas and information. This helps students identify patterns and relationships, build upon prior knowledge, review concepts, and stimulate creative thinking. As students acquire new information, they can organize additional ideas and information graphically to integrate new knowledge and reinforce their understandings. This helps students identify misconceptions and clarify their thinking. The use of colours, symbols, and images reinforces written text. The ease with which changes in relationships can be represented makes concept mapping particularly helpful for some students. Concept mapping examples include facilitating brainstorming (Activating), gathering information (Acquiring), or displaying new understanding (Applying).

Think about...

- modelling and guiding the use of concept mapping
- constructing student-generated assessment criteria (e.g., What does a quality concept map look like?)
- having students select concept maps for inclusion in their portfolios to highlight evidence of their understanding
- offering descriptive feedback
- guiding peer and self-assessment

**BLMs**

Note: The following departmental publication is available at the Manitoba Text Book Bureau.
Independent Together: Supporting the Multilevel Learning Community

- BLM 2: Constructing Student-Generated Criteria for Quality Work

11g – Multimedia Presentations

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-401	Use language that is respectful of human diversity.
S-403	Present information and ideas orally, visually, concretely, or electronically.
S-405	Articulate their beliefs and perspectives on issues.

Multimedia presentations (e.g., web page, *PowerPoint*...) provide opportunities for students to synthesize new knowledge and share their understandings. Multimedia presentations allow students to represent their understandings creatively by including text, images, sound clips, and hyperlinks that support their ideas and information. Presentations are often collaborative in nature and intended to be shared with a broader audience. In planning their presentations, students need to consider how the structure of the presentation will communicate information effectively to their intended audience. Provide students time to practise before they give their presentations.

Think about...

- focusing assessment on a manageable number of outcomes/students—keeping the end in mind
- focusing assessment on the accuracy and completeness of the information
- constructing student-generated assessment criteria (e.g., audience engagement, audio/visual appeal, content, presentation techniques...)
- offering descriptive feedback throughout the process
- having students select multimedia presentations for inclusion in their portfolios and highlighting evidence of their understanding
- recording focused observations to monitor student growth and to determine which students need differentiation

(continued)

11g – Multimedia Presentations *(continued)*

- guiding peer and self-reflection on whether the presentation effectively communicates the intended message
- orally guiding/facilitating reflection, using a Y-chart or journals (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)

**BLMs**

Note: The following departmental publication is available at the Manitoba Text Book Bureau.

Independent Together: Supporting the Multilevel Learning Community

- BLM 1: Reflection-Metacognition
- BLM 2: Constructing Student-Generated Criteria for Quality Work
- BLM 5: Focused Observation Form

11h – Creating Animations

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-403	Present information and ideas orally, visually, concretely, or electronically.

Creating animations provides students with opportunities to apply new knowledge and graphically represent concepts and ideas. Students may create animations to illustrate patterns, cycles, changes over time, or cause-and-effect relationships, as well as stories. In creating animations, students develop skills in problem solving, sequencing, timing, and duration of scenes/screens to communicate the concepts and ideas they are illustrating. The interactive and graphic nature of animations provides alternative ways for students to demonstrate their learning.

Think about...

- focusing assessment on how the animation creatively communicates a concept or idea
- constructing student-generated assessment criteria (e.g., What does quality animation look/sound like? Why?)
- offering descriptive feedback
- having students select animations for inclusion in their portfolios and highlighting evidence of their understanding
- recording focused observations to monitor student growth over time and to determine which students need differentiation
- guiding peer and self-assessment
- orally guiding/facilitating reflection, using a Y-chart or journals (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)

BLMs

Note: The following departmental publication is available at the Manitoba Text Book Bureau.
Independent Together: Supporting the Multilevel Learning Community

- BLM 1: Reflection-Metacognition
- BLM 2: Constructing Student-Generated Criteria for Quality Work
- BLM 5: Focused Observation Form

11i – Using Software

**Skills**

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-304	Distinguish fact from opinion and interpretation.
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>

Using software allows students to access new information and interact with simulations and/or animations to explore new concepts and ideas. Simulations provide an environment where students can explore, experiment, question, and hypothesize about real-life situations that would otherwise be inaccessible. Students can explore “what-if” scenarios as they predict the results of various actions, modify parameters accordingly, and evaluate the resulting outcomes. Simulations and animations allow students to visualize complex and dynamic interactions and develop deeper understandings than may be achieved through a text description. By exploring a simulated environment, students can “learn by doing.” Using software also allows students to practise specific skills and receive corrective feedback.

Think about...

- focusing assessment on students’ skills in exploring concepts and ideas with simulations and/or animations
- offering descriptive feedback on students’ explorations to deepen their understandings and test their hypotheses
- orally guiding/facilitating reflection, using a Y-chart or journals (e.g., Using this software helps me...) (See pages 26–28 of “Strategies That Make a Difference” for information on Y-Charts and T-Charts.)

**BLMs**

Note: The following departmental publication is available at the Manitoba Text Book Bureau.
Independent Together: Supporting the Multilevel Learning Community

- BLM 1: Reflection-Metacognition

11j – Using Spreadsheets/Databases

Skills

S-200	Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>
S-201	Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>
S-203	Select and use appropriate tools and technologies to accomplish tasks.
S-302	Draw conclusions based on research and evidence.
S-303	Evaluate personal assumptions based on new information and ideas.
S-306	Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>

Spreadsheets and databases allow students to record and graphically represent data, analyze relationships and patterns, and manipulate data to solve problems. There are several opportunities to integrate spreadsheet and database skills. With spreadsheets, students can enter formulas to calculate values (e.g., population density equals population divided by area). Additionally, students can chart their data by creating graphs to facilitate data analysis. Databases are particularly useful for students to make comparisons in their recorded research (e.g., characteristics of daily life in communities studied, location and characteristics of geographic regions...). Students may then query the data to identify patterns and relationships. As students develop the skills to use spreadsheets and databases, they are able to apply these skills in the context of analyzing issues and concepts related to their investigations.

Think about...

- modelling and guiding the use of spreadsheets/databases
- focusing assessment on the analysis of patterns and relationships rather than isolated technology skills
- recording focused observations to determine prior knowledge, gaps, points for instruction, and/or growth over time
- offering descriptive feedback to improve understanding of relationships between various factors in data analysis and/or research

- 6.4.5g** Connecting and Reflecting

Charts and Checklists

Appendix C

GRADE

6

Skills Checklist												
Active Democratic Citizenship	S-100 Collaborate with others to establish and carry out group goals and responsibilities.											
	S-101 Use a variety of strategies to resolve conflicts peacefully and fairly. <i>Examples: clarification, negotiation, compromise...</i>											
	S-102 Make decisions that reflect fairness and equality in their interactions with others.											
	S-103 Make decisions that reflect care, concern, and responsibility for the environment.											
	S-104 Negotiate constructively with others to build consensus and solve problems.											
	S-105 Recognize bias and discrimination and propose solutions.											
	S-106 Treat places and objects of historical significance with respect. <i>Examples: burial grounds, memorials, artifacts...</i>											
Managing Information and Ideas	S-200 Select information from a variety of oral, visual, material, print, or electronic sources. <i>Examples: maps, atlases, art, songs, artifacts, narratives, legends, biographies, historical fiction...</i>											
	S-201 Organize and record information in a variety of formats and reference sources appropriately. <i>Examples: maps, charts, outlines, concept maps...</i>											
	S-202 Distinguish between primary and secondary information sources for research.											
	S-203 Select and use appropriate tools and technologies to accomplish tasks.											
	S-204 Create timelines and other visual organizers to sequence and represent historical figures, relationships, or chronological events.											
	S-205 Construct maps that include a title, legend, compass rose, scale, and latitude and longitude.											
	S-206 Select and interpret various types of maps for specific purposes.											
	S-207 Use latitude and longitude to locate and describe places on maps and globes.											
	S-207A Use traditional knowledge to read the land.											
	S-208 Orient themselves by observing the landscape, using traditional knowledge, or using a compass or other tools and technologies.											

Skills Checklist									
Critical and Creative Thinking	S-300 Plan topics, goals, and methods for historical inquiry and research.								
	S-301 Evaluate the advantages and disadvantages of solutions to a problem.								
	S-302 Draw conclusions based on research and evidence.								
	S-303 Evaluate personal assumptions based on new information and ideas.								
	S-304 Distinguish fact from opinion and interpretation.								
	S-305 Observe and analyze material and visual evidence for research. <i>Examples: artifacts, photographs, works of art...</i>								
	S-306 Assess the validity of information sources. <i>Examples: purpose, context, authenticity, origin, objectivity, evidence, reliability...</i>								
	S-307 Compare differing accounts of historical events.								
	S-308 Compare diverse perspectives in a variety of information sources.								
	S-309 Interpret information and ideas in a variety of media. <i>Examples: art, music, historical fiction, drama, primary sources...</i>								
S-310 Recognize that interpretations of history are subject to change as new information is uncovered or acknowledged.									
Communication	S-400 Listen to others to understand their perspectives.								
	S-401 Use language that is respectful of human diversity.								
	S-402 Persuasively express differing viewpoints regarding an issue.								
	S-403 Present information and ideas orally, visually, concretely, or electronically.								
	S-404 Elicit and clarify questions and ideas in discussions.								
S-405 Articulate their beliefs and perspectives on issues.									

Vocabulary Strategies

Appendix D

GRADE

6

Vocabulary

Vocabulary development is integrated within each learning experience, introducing or reinforcing understanding of specific words and concepts within the context of the learning experiences and the cluster. A variety of vocabulary strategies may be used to assist students in activating, acquiring, and applying the appropriate vocabulary. Strategies may be modified to suit different grades.

Activate

- Using a word processor, students type new vocabulary in a word bank. Students may change the colour and/or font of the words they recognize and explain the meaning to each other, or highlight related words and explain their relationship to each other.
- Students come to class dressed in a costume that represents a new vocabulary word or dramatizes the meaning of new vocabulary. Students guess the meaning of the word/concept that is illustrated.
- Cooperative groups of students are provided with three vocabulary words. Students discuss each word and agree upon a meaning for each. A reporter from each group reads the definitions aloud. Students suggest the matching vocabulary word, and provide a reason for their choice.

Acquire

- Using print and electronic resources, students research vocabulary and, using a word processor, create a three-column chart. Students insert the vocabulary word in the first column and either a definition, synonyms/antonyms, image representing the word, or use the word in a sentence in the other two columns.
- Using Hot Potatoes, students create a crossword puzzle, a cloze passage, a multiple choice quiz, or a matching quiz using vocabulary. Students exchange quizzes with each other and solve.
- Introduce new vocabulary as “word of the day.” Students write the word, identify its root word, prefix, suffix, synonyms, antonyms, illustrate the word, and use it in a sentence.
- Using a word processor, students type new vocabulary into a word bank. Individually or in collaborative groups, students create a picture dictionary, inserting digital images or clip art representing the new vocabulary. Alternately, they create a talking dictionary, recording and inserting sound clips explaining the word, or using it correctly in a sentence.
- Using graphics software, students create mini-posters that include the vocabulary word, an illustration, and/or a definition. Print and display mini-posters, or set as desktop wallpaper.
- Using Inspiration vocabulary templates, students identify antonyms, synonyms, and/or people associated with new vocabulary.

- Students use “Pocket Definitions” to reinforce new vocabulary. Students write new vocabulary on slips of paper and put them in their pockets. Several times throughout the day, call out “Pocket Definitions!” Students take the slips of paper out of their pockets and practise the words and definitions.
- Using a word processor, word art, or concept mapping, students create a word splash of new vocabulary. Students add definitions, explanations, or illustrations of the vocabulary. TIP: Students may add further information by inserting text boxes, comments, or sound clips.
- Student’s use self-stick notes to label items displayed in an artifact centre (e.g., Red River Cart, kayak, map projection, longbow...). Students add and label additional items related to new vocabulary.
- Students create desktop vocabulary placemats or bumper stickers. Students illustrate their placemats/bumper stickers with new vocabulary, definitions, and pictures representing the new vocabulary. Students may refer to their placemats throughout the cluster.
- Students match new vocabulary to magazine pictures or clip art illustrating the new word.
- Students practise new vocabulary using flash cards.
TIP: Have students create a personal set of flash cards.
- List vocabulary words from a piece of text the students will be reading. Students use the words to compose a short story. Students share their stories and compare them with the original text.
- Using a word processor, students create a clip-art collage of images representing new vocabulary. Students record a sound clip of the vocabulary word and insert it next to the related image. Students predict the vocabulary word each image represents, and check their answer by playing the sound clip.
- Students contribute to the development of a Word Wall that contains key words related to a current topic of study. Students record words and definitions they contributed in personal dictionaries.
- Students complete a Word Cycle think sheet related to new vocabulary. Given vocabulary terms, students arrange the words and indicate the relationships among them. Using a Think-Pair-Share strategy, students identify the relationship between all adjoining words and justify their choices.
TIP: For more information on Word Cycle, see *Success for All Learners*, pp. 6.31-6.32 or “Strategies That Make a Difference”, p. 216. For a Word Cycle blackline master, see *Success for All Learners*, p. 6.99. For more information on Think-Pair-Share/Think-Pair-Square, see “Strategies That Make a Difference”, p. 15.

Vocabulary

- Students sort and predict vocabulary terms. Working in partners or small groups, students categorize and predict the meaning of a bank of words. Reporters from each group share the categories with the class. Students compare the categories from each group and discuss word placements. Students use a concept map to show understanding and connections between categories.
- Using concept mapping, students create a Word Explosion, choosing a root word and developing new words by adding prefixes and suffixes to develop new vocabulary. Students create posters of their Word Explosion activities and display them in the classroom. Students create and add new words to the posters as they are encountered.

Apply

- Students complete a concept frame or organizer to illustrate their understanding of vocabulary.
- Provide students with a vocabulary word and a definition for a different vocabulary word. One student reads her or his word and the student with the corresponding definition reads it and then reads out his or her word. Students continue until all the words and definitions are matched.
- Provide some students with a vocabulary words and others with definitions. Students match the word with the correct definition in the least amount of time.
- Cooperative groups of students are provided three vocabulary words. Students research the definitions and record them in their own words. Students create three additional incorrect definitions. The group reporter reads all four definitions to the class and students guess the correct meaning from the four definitions.
- Students compose and perform a song demonstrating the meaning of vocabulary words.
- Students perform role-play vignettes, use mime, or create tableaus to illustrate the meaning of new vocabulary. Students guess the words.
- Using graphics software, students create a paneled comic strip that incorporates vocabulary. Students include speech bubbles and/or text demonstrating the meaning of vocabulary words with each panel.
- Using a word processor, students play “Vocabulary Bingo.” Students enter new vocabulary to fill the bingo squares. The teacher provides a definition, explanation, synonym, antonym, or cloze sentence for vocabulary words. Students match words on their bingo card to the given clue, highlighting the word or changing the font or colour. The first student to fill in the card or a designated row or column calls “Bingo!”
TIP: In classrooms with one computer, students may create individual bingo cards and print them.

- Using word-processing or graphics software, students create word graphics that represent the meaning of new vocabulary words. Students share word graphics in an electronic Gallery Walk.
- Collaborative groups of students create “The Answer is...” puzzles using new vocabulary and quiz each other, (e.g., “The answer is “title, legend, compass rose, scale, latitude, longitude” What is the question?” – The question is “What are the elements of a map?”).
- Students play new vocabulary “Password.” Four students are divided into two teams of two. One student on each team is given a “secret” vocabulary word on a slip of paper. Taking turns, the first team member provides a one-word clue to her or his partner, who attempts to guess the “secret” word. The second team member provides an additional clue to his or her partner. Students continue until the vocabulary word is guessed.
- Students compose poems (e.g., Cinquain, Haiku...) to illustrate the meaning of new vocabulary.
- Students play “Vocabulary Beach Ball.” Label a beach ball with vocabulary words. Students sit in a circle and toss the beach ball to each other. The student who catches the ball reads the word closest to his or her right thumb, defines the word, and/or uses it in a sentence. The student then tosses the ball to another student.
- Using presentation or web authoring software, students create a web page or interactive glossary of new vocabulary. The presentation may include links to definitions, labelled diagrams, pictures, phrases, or sentences using the word in context, sound clips associated with the word, or digital pictures of classroom explorations with the concept represented by the word.
TIP: The presentation may be developed throughout the cluster and used as a culminating activity.
- Reinforce understanding of new vocabulary with exit or permission slips, (e.g., students must respond with the correct vocabulary word when given a definition in order to leave for recess.)
TIP: Show students a picture illustrating the vocabulary word or provide the word and have students respond with its meaning.
- Students play “Spelling in Motion” to practise new vocabulary. Taking turns, one student calls out a new vocabulary word, then spells the word out loud, repeats the word, and finally states an action word. Students perform the action, spelling the word aloud. (e.g., One student says, “Citizen, c-i-t-i-z-e-n, Citizen, jumping jacks.” Other students do jumping jacks as they spell the word, performing one jumping jack for each letter as they spell the word.)
TIP: Students may do the activity in pairs. Other actions may include hand clapping, finger snapping, shaping the letters with their bodies...

Vocabulary

- Using presentation software, students create a rapid-fire class quiz. Collaborative groups of students create a three-part slide that includes an illustration or clip-art image representing the word, a definition, and the vocabulary word. Students set the timing feature so the illustration appears first, followed in three seconds by the definition, and followed five seconds later by the word. Each group's slide is included in a class presentation. During the presentation, students are encouraged to call out their guesses before the word appears.
- Using animation software or animation features of presentation software, students create an animation illustrating the meaning of cluster vocabulary.
- Using presentation software, students create an interactive four-slide riddle for new vocabulary words. Students create three clues for each new vocabulary word, entering one clue for each of the first three slides. The fourth slide contains the vocabulary word that answers the riddle. Students share their riddles with other students who use the clues to guess the vocabulary word.

Grade 6 Recommended Learning Resources

Sensitive Content and Local Selection of Learning Resources

Although each resource listed in this bibliography has been reviewed by a team of Manitoba social studies teachers, school divisions/districts are advised to review all learning resources locally before they are used with students. This will ensure that local sensitivities are considered and that appropriate resources are selected for use in social studies classrooms. Although a statement of **caution** appears at the end of those annotations with potentially sensitive content, as identified by teacher/evaluators, **all books/videos need to be reviewed for local sensitivities.**

Definitions of Terms Used in the Learning Experiences

- **Student Breadth:** identifies student learning resources that address a wide range of topics for a particular grade.
- **Student Depth:** identifies student learning resources that provide especially effective learning experiences for students for a particular grouping of learning outcomes.
- **Student Breadth and Depth:** identifies comprehensive learning resources that provide both breadth and depth dimensions for a particular grouping of learning outcomes.
- **Teacher Reference:** identifies classroom strategies to assist teachers in implementing the learning outcomes identified for Social Studies.

How To Access Learning Resources

The resources listed are available from the Instructional Resources Unit (IRU), Manitoba Education, Citizenship and Youth, and accessible by Manitoba educators and registered patrons of the IRU.

To register as a patron, renew resources and inquire about loans, contact:

Instructional Resources Unit	Telephone	(204) 945-5371

In the Global Classroom 1

(Stand-Alone).

Pike, Graham.

Pippin Publishing Corporation (UTP), 1998. 255 p. ISBN 0-88751-081-7.

This is a softcover Kindergarten to Grade 8 teacher reference resource. This resource emphasizes a teaching and learning strategy that combines child-centred and world-minded educational thinking. It builds frameworks for cross-curricular delivery and offers a wealth of practical and engaging activities for students.

Themes within the text include: interconnections (perceptions, local and global communities); environment and sustainability (natural, built, social, and inner); health (physical, mental, emotional, spiritual, social, societal, and environmental); perception (perceptions and cross-cultural encounters); technology (benefits, tools, problem solving, technological change, social values, and consequences in the future); and futures (alternative, probable, and preferred).

The resource includes materials related to citizenship, diverse perspectives, global, identity, and economic learning outcome experiences.

Comment: Charts are included at the beginning of each chapter to indicate activities within the chapter and the index. The grade level for which the activities are suggested is not included.

Suggested Use:

Kindergarten; Kindergarten – Cluster 1; Kindergarten – Cluster 2; Kindergarten – Cluster 3;

Grade 1; Grade 1 – Cluster 2; Grade 1 – Cluster 3;

Grade 2; Grade 2 – Cluster 3;

Grade 3; Grade 3 – Cluster 3;

Grade 4; Grade 4 – Cluster 2; Grade 4 – Cluster 3;

Grade 5; Grade 5 – Cluster 4;

Grade 6; Grade 6 – Cluster 2; Grade 6 – Cluster 4;

Grade 7; Grade 7 – Cluster 1; Grade 7 – Cluster 2; Grade 7 – Cluster 3; Grade 7 – Cluster 4;

Recommended Learning Resources

Grade 8; Grade 8 – Cluster 2; Grade 8 – Cluster 3; Grade 8 – Cluster 4; Grade 8 – Cluster 5;
Teacher Reference

Date Recommended: 2003-Mar-10

In the Global Classroom 2

(Stand-Alone).

Pike, Graham.

Pippin Publishing Corporation (UTP), 1998. 260 p. ISBN 0-88751-085-X.

This softcover Grade 5 to 8 teacher reference resource focuses on global education and the development of thinking skills to prepare young people for the challenging decisions they face outside the classroom. A number of the lessons challenge preconceived ideas. Topics in this follow-up to *In the Global Classroom 1* include Peace, Rights and Responsibilities, Equity, Economics, Development, Global Justice, Citizenship, and Mass Media.

The resource is divided into themes. Each theme has a variety of lessons, including a description of purpose, suggested grade level, time required, and resources. Reproducible support materials are included where needed. The lessons also provide a section on procedure and a final section that discusses what the students will gain from the lesson.

Suggested Use:

Grade 5; Grade 5 – Cluster 4;

Grade 6; Grade 6 – Cluster 4;

Grade 7; Grade 7 – Cluster 2;

Grade 8; Grade 8 – Cluster 5;

Teacher Reference

Date Recommended: 2003-Mar-10

Is That Right? Critical Thinking and the Social World of the Young Learner

(Stand-Alone).

Wright, Ian.

Pippin Publishing Corporation (UTP), 2002. 139 p. ISBN 0-88751-094-9.

This teacher resource emphasizes that there is no better day than today to teach our children the value and rewards of critical thinking. It defines critical thinking as the ability to make reasoned judgements in problematic situations. It also demonstrates how critical thinking can be applied to social studies and other subject areas. It includes practical activities and assessment approaches (including rubrics). Chapters focus on critical thinking, teaching critical thinking, and assessing critical thinking.

This resource is based on current research. It is suitable for a wide range of learning styles, promotes active learning and creativity, and is well organized.

Suggested Use:

Kindergarten; Kindergarten – Cluster 2;

Grade 1; Grade 1 – Cluster 3;

Grade 2; Grade 2 – Cluster 3;

Grade 3; Grade 3 – Cluster 1; Grade 3 – Cluster 3;

Recommended Learning Resources

Grade 4; Grade 4 – Cluster 2;

Grade 5; Grade 5 – Cluster 1;

Grade 6; Grade 6 – Cluster 4;

Grade 7; Grade 7 – Cluster 3; Grade 7 – Cluster 4;

Grade 8; Grade 8 – Cluster 1;

- My Canada: Our Song: The Story of O Canada: The Canadian National Anthem

My Canada: A Bloom of Friendship: The Story of the Canadian Tulip Festival

(Non-Fiction).

Renaud, Anne.

(My Canada series). Lobster Press Limited (UTP), 2004. ISBN 189322289-X.

Grade 6 – Cluster 4 – Canada Today: Democracy, Diversity, and the Influence of the Past

- Canadian identity

Suggested Use:

Grade 6; Grade 6 – Cluster 4; Student - Depth

Date Recommended: 2005-July-25

My Canada: Our Song: The Story of O Canada: The Canadian National Anthem

(Non-Fiction).

Kuitenbrouwer, Peter.

(My Canada series). Lobster Press Limited (UTP), 2004. ISBN 189422267-9.

Grade 6 – Cluster 4 – Canada Today: Democracy, Diversity, and the Influence of the Past

- Canadian identity

Note: Teacher Read-Aloud

Suggested Use:

Grade 6; Grade 6 – Cluster 4; Student - Depth; Teacher Reference

Date Recommended: 2005-July-25

My Country, Our History: Canada from 1867 to the Present

(Student Book) (Integrated Resource).

Hux, Allan D.

Pippin Publishing Corporation (UTP), 2002. 224 p. ISBN 0-88751-091-4.

This softcover resource supports the majority of the Grade 6 learning outcomes for the Manitoba social studies curriculum. It focuses on Canada's history from Confederation to the present day. It does not provide a comprehensive focus on how the provinces and territories joined Canada. Canada's involvement in international organizations is not treated in-depth. It should be noted that the discussion of the Northwest Territories government is somewhat inaccurate.

The resource chronologically follows the history of Canada and is broken into major themes and time periods. Study questions and case studies are provided throughout the student text. The text uses bold typeface to highlight key words. The resource is laid out with each paragraph enumerated, so it is easy to find specific material. It contains a thorough table of contents but no index. Aboriginal and Francophone content is limited.

Suggested Use: Grade 6; Grade 6 – Cluster 1; Grade 6 – Cluster 2; Grade 6 – Cluster 3; Grade 6 – Cluster 4; Student - Breadth and Depth

Date Recommended: 2003-Mar-10

My Country, Our History: Canada from 1867 to the Present. Teacher's Resource Book

(Integrated Resource).

Hux, Allan D.

Pippin Publishing Corporation (UTP), 1996. 218 p. ISBN 0-88751-059-0.

This teacher's resource package is designed to be used with the student text, My Country, Our History. This resource supports the majority of the Grade 6 learning outcomes for the Manitoba social studies curriculum. It focuses on Canada's history from Confederation to the present day. This resource has a strong emphasis on teaching English language arts, and is designed to be used with English as a Second Language students. Significant Aboriginal and Francophone content is lacking in this resource.

Recommended Learning Resources

Suggested Use: Grade 6; Grade 6 – Cluster 1; Grade 6 – Cluster 2; Grade 6 – Cluster 3; Grade 6 – Cluster 4; Teacher Reference

Date Recommended: 2003-Mar-10

Ojibway Ceremonies

(Fiction).

Johnston, Basil.

McClelland & Stewart Limited (RAN), 1982. 171 p. ISBN 0-7710-4445-3.

Grade 6 – Cluster 3 – Shaping Contemporary Canada (1945–Present)

- Aboriginal rights (values)

Suggested Use: Grade 6; Grade 6 – Cluster 3; Teacher Reference

Date Recommended: 2003-Aug-25

Ojibway Heritage

(Fiction).

Johnston, Basil.

McClelland & Stewart Limited (RAN), 1976. 171 p. ISBN 0-7710-4442-9.

Grade 6 – Cluster 3 – Shaping Contemporary Canada (1945–Present)

- Aboriginal rights (values)

Suggested Use: Grade 6; Grade 6 – Cluster 3; Teacher Reference

Date Recommended: 2003-Aug-25

Date Recommended: 2003-Aug-25

Through Other Eyes: Developing Empathy and Multicultural Perspectives in the Social Studies

(Stand-Alone).

Unrau, N.J.

(The Pippin Teacher's Library series). Pippin Publishing Corporation (UTP), 1999. 138 p. ISBN 0-88751-088-1.

This Middle Years teacher resource includes extensive activities aimed at developing empathy and awareness of cultural diversity in students, and encouraging them to think from different perspectives. This objective is achieved by giving students different scenarios and critical thinking opportunities. Specific knowledge objectives are not addressed in the resource, and it is difficult to find activities for some grade levels. The discussion topics also offer a limited range of scope.

Curricular connections are made to English language arts.

Suggested Use:

Grade 5; Grade 5 – Cluster 4;

Grade 6; Grade 6 – Cluster 1; Grade 6 – Cluster 2; Grade 6 – Cluster 3; Grade 6 – Cluster 4;

Grade 7; Grade 7 – Cluster 2; Grade 7 – Cluster 3; Grade 7 – Cluster 4;

Grade 8; Grade 8 – Cluster 1; Grade 8 – Cluster 2; Grade 8 – Cluster 3; Grade 8 – Cluster 4; Grade 8 – Cluster 5;

Teacher Reference

Date Recommended: 2003-Mar-10

The True Story of Trapper Jack's Left Big Toe

Appendix G

GRADE

6

Grade 6 Resources Organized by Learning Experiences

Sensitive Content and Local Selection of Learning Resources

Although each resource listed in this bibliography has been reviewed by a team of Manitoba social studies teachers, school divisions/districts are advised to review all learning resources locally before they are used with students. This will ensure that local sensitivities are considered and that appropriate resources are selected for use in social studies classrooms. Although a statement of **caution** appears at the end of those annotations with potentially sensitive content, as identified by teacher/evaluators, **all books/videos need to be reviewed for local sensitivities.**

Definitions of Terms Used in the Learning Experiences

- **Student Breadth:** identifies student learning resources that address a wide range of topics for a particular grade.
- **Student Depth:** identifies student learning resources that provide especially effective learning experiences for students for a particular grouping of learning outcomes.
- **Student Breadth and Depth:** identifies comprehensive learning resources that provide both breadth and depth dimensions for a particular grouping of learning outcomes.
- **Teacher Reference:** identifies classroom strategies to assist teachers in implementing the learning outcomes identified for social studies.

How To Access Learning Resources

The resources listed are available from the Instructional Resources Unit (IRU), Manitoba Education, Citizenship and Youth, and accessible by Manitoba educators and registered patrons of the IRU.

To register as a patron, renew resources and inquire about loans, contact:

Instructional Resources Unit	Telephone	(204) 945-5371

Videos

- Alexander Graham Bell
Media Booking #6754
See annotation, page G16

Grade 6 Video Annotations

(Titles are listed in alphabetical order.)

Alexander Graham Bell. (2001). [videocassette]. Series: Inventors of the World. Wynnewood, PA: Schlessinger Media. Media Booking #6754

This video explores the life and times of Alexander Graham Bell, whose understanding of sound, speech, and the challenges faced by the hearing-impaired led to experiments with the use of electricity and the development of the telephone. The video shows his early life, his work on improving the telegraph, and the creative process through which he came to devise the telephone. The program also notes the impact of the telephone upon the society of the time and reveals several of Bell's inventive accomplishments that followed it.

Batoche: Four Bloody Days in May. (1998). [videocassette]. Series: Historylands: Canada's Heritage Series. [Toronto]: Good Earth Productions. Media Booking #1522

The video introduces viewers to events and sites in Canadian history. It presents the story of the rebellion in Batoche, Saskatchewan in May 1885 when Canadian troops under the command of Major Frederick Middleton crushed the Métis and their native allies who were under the command of Louis Riel and Gabriel Dumont.

A Border Story. (2004). [videocassette]. Series: My Brand New Life. [Canada]: Productions La Fete (Trading) Inc. and National Film Board of Canada. Media Booking #3517

The video shows a comparison of July 1st and July 4th through visits of two adolescents to Ottawa and Washington, DC, USA. It is great for discussing personal and national identities.

Canadian Steel, Chinese Grit: Monument of the Nameless Heroes. (1998). [videocassette]. Winnipeg: Winnipeg Chinese Cultural and Community Centre. Media Booking #5752

Program 2 considers the contribution of the Chinese railroad workers to Manitoba's history after the completion of the CPR in 1885. The video explains why they came to Manitoba, the nature of the work that they undertook, and the impact of the Chinese Exclusion Act upon them. It reveals historic and modern day efforts of Manitoba's Chinese community to preserve its culture and introduce China's traditions, language, and people to its children.

Chilkoot Trail: The Meanest 32 Miles in History. (1998). [videocassette]. Series: Historylands: Canada's Heritage Series. [Toronto]: Good Earth Productions. Media Booking #1491

Through archival footage, historical sequences, documentary, and interviews, this video explores the 51-km Chilkoot Trail, a route followed by the stamperders of the Klondike gold rush. The Chilkoot Trail was once considered to be the meanest 32 miles in history and is now a historic site. The video also relates the story of a family seeking to learn the whereabouts of their descendant, John Clark Romaine, a prospector who perished on the Chilkoot Trail.

Dawson City: Heart of the Klondike. (1999). [videocassette]. Series: Historylands: Canada's Heritage Series. [Toronto]: Good Earth Productions. Media Booking #0933

Through archival footage, historical sequences, documentary, and interviews, this video reveals the world of the Yukon that existed during the gold rush and gave rise to Dawson City, the heart of the Klondike.

Resources Organized by Learning Experiences

The Great Depression. (1999). [videocassette]. Series: Living Histories. Toronto: Five Corners Communications and Vision TV. Media Booking #5597

This video is designed to personalize history for young people by sharing the experiences of people who lived through the events and trends of the 20th century. The personal recollections are interspersed with archival footage to give viewers multiple perspectives on Canadian historical issues and events. The video features the compelling life stories of four seniors, men and women, who bring the Great Depression to life for students. Poverty, homelessness, soup lines, and relief camps are all vividly recalled, as is the sense of community and sharing that made life on the farms and in the cities bearable during this difficult period in Canadian history.

Louis Riel: Part One: Manitoba: the Red River Rebellion. (2000). [videocassette]. Coquitlam, BC: Classroom Video. Media Booking #7428

Known as the Father of Manitoba, Louis Riel was at the centre of the Métis resistance that led to the establishment of Manitoba as Canada's fifth province. Archival photographs are used throughout this video to tell the story of this charismatic individual, from his St. Boniface birth in 1844 and his schooling in Montreal, to his election as a Member of Parliament and his exile from Canada. This video relates the story of events at the Red River Settlement, including the establishment of the Provisional Government of 1869, the capture of Fort Garry by Riel's Métis soldiers, the role of Prime Minister John A. Macdonald, and the execution of Thomas Scott.

Note: The video could be viewed in segments as natural pauses are included.

Caution: The execution of Thomas Scott is a sensitive issue.

Music for Whose Ears. (2004). [videocassette]. Series: My Brand New Life. [Canada]: Productions La Fete (Trading) Inc. and National Film Board of Canada. Media Booking #3557

The video discusses factors that shape personal and national identities as well as the various groups and organizations that may contribute to personal identities.

Nellie McClung: The Sculpting of Angels. (2000). [videocassette]. Series: Life and Times. Halfmoon Bay, BC: Raincoast Storylines Ltd. and Canadian Broadcasting Corporation. Media Booking #5132

This video examines the life and times of author, social reformer, suffragist, and legislator, Nellie McClung. The video describes her early years and family life and how her career as a writer laid the foundations for her work in social reform and politics. It discusses her role in the temperance movement and her efforts as a social activist to help women gain the right to vote in Manitoba and Alberta. She was elected to the Alberta legislature in 1921, Nellie continued to fight for equal rights for women and, by October 18, 1929, women had become equal to men in the eyes of the law. She retired in 1933, joined Canada's delegation to the League of Nations in 1938, and continued to write. She died in 1951 at the age of 77.

Note: The video is 45 minutes long and should be watched in segments.

The Origin of the RCMP: The Great March West. (1999). [videocassette]. [Winnipeg]: Manitoba Hydro and Royal Canadian Mounted Police. Media Booking #1828

The video introduces students to the history of the Royal Canadian Mounted Police with an emphasis on their participation in the Great March West, which began in July 8, 1874.

Our National Parliament: The Inside Story. (1991). [videocassette]. Series: Government in Canada: Citizenship in Action. Montreal: National Film Board of Canada. Media Booking #9036

The video is designed to introduce students to the Canadian system of government. It presents the daily routines of the Crown, the House of Commons, and the Senate, and describes their roles in our parliamentary system. The video considers such topics as the role of the prime minister, cabinet, opposition parties, question period, the opening of Parliament, and the stages through which a bill moves to becoming law. The video also presents a look at the daily work of Ethel Blondin, M.P. for the Western Arctic and Liberal critic for Aboriginal Affairs.

Note: The video was produced in 1991 but it gives a good overall explanation of Canadian government. Politicians are not current, but changes could be discussed.

Passport to Canada. Volume 3: Making it Work. (2002). [videocassette]. Series: Passport to Canada. Montreal: National Film Board of Canada. Media Booking # 6572

The video discusses valuable information about Canada's government. There is a great deal of information to show all at once, but the video is presented in three distinct sections that could be viewed at separate times.

Note: The map that shows the number of seats per area for a federal election shows that the Northwest Territories and Nunavut have only one seat between the two jurisdictions. In actual fact, each territory has one seat each.

Remembrance Day. (1988). [videocassette]. Ottawa: Supply and Services Canada. Media Booking #7515

The song written by Bryan Adams and Jim Vallance is performed by Bryan Adams. The song honours the Canadian recipients of the Victoria Cross, and the many Canadians who fought and died so that others might live in peace and freedom. The video uses live footage from battles fought, with scenes of Remembrance Day celebrations.

A Scattering of Seeds: The Creation of Canada Series

Each individual video in this series is 24 minutes in length. Each video has considerable detail, and need not be watched in its entirety. The recommended videos in this series include:

- **Acadian Spirit: The Legacy of Philippe d'Entremont.** (1997). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8653

The video presents the story of Philippe d'Entremont, one of the early founders of the Acadian community of Pubnico, Nova Scotia. The video traces Acadian history through 300 years from the first settlements, to the Expulsion of 1755, and to today's festivals and enduring way of life.

- **Breaking the Ice: The Mary Ann Shadd Story.** (1997). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8647

This video profiles Mary Ann Shadd, Abolitionist, integrationist, and teacher who lived in Windsor, Ontario, and became the first female publisher and first female lawyer in North America.

Resources Organized by Learning Experiences

- **First Lady of the Yukon: Martha Black.** (1998). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8669
Through documentary and archival footage, excerpts from her writings, and interviews with publisher and journalist Florence Whyard, this video examines the life and times of Martha Black. Black left a life of privilege in Chicago to begin again in the Yukon during the Klondike gold rush of 1898. She crossed the Chilkoot Trail to manage a saw mill in Dawson City. She eventually married lawyer and politician, George Black, who became Territorial Commissioner and entered federal politics in 1921. Martha herself was elected to Parliament in 1935, when her husband became too ill to seek re-election. She died in 1957, having become a legend in the Yukon and one of Canada's most celebrated pioneers.
- **The First Seeding: The Legacy and Tenacity of Louis Hebert.** (1997). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8667
This video examines the role of Louis Hebert, apothecary and first farmer of New France. It shows how social, cultural and demographic trends have influenced Quebec agriculture from the 17th century to modern times.
- **For the Love of God: The Mennonites and Benjamin Eby.** (1997). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8528
This video relates the history of the Mennonite people and describes Benjamin Eby's arrival in Ontario in 1807 where he found the community of St. Jacobs. It shows how modern day society has challenged the philosophies of life, values, and beliefs of modern day Mennonites.
- **The Force of Hope.** (1997). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8526
This video profiles the efforts of Father McGauran. He comforted the sick and dying Irish immigrants who arrived at the Québec quarantine station of Grosse Isle during the Summer of Sorrow in the Irish Potato Famine of 1847.
- **The Fullness of Time: Ukrainian Stories from Alberta.** (1997). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8665
The video describes how Harvey Spak's grandfather and other Ukrainian immigrants came to eastern Alberta to settle around the turn of the century.
Note: The drowning of twin brothers in 1948 and the death of his grandfather is related in this story.

Resources Organized by Learning Experiences

- **The Impossible Home: Robert Kroetsch and his German Roots.** (1997). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8661

Robert Kroetsch sets out to explore his German roots. He describes the link between his search and his writing, the reasons for his great-great-grandfather's emigration to Ontario, the movement of the Kroetsch family further west, and the importance of oral tradition to his family's background.
- **A Land as Green as the Sea.** (1997). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8668

Tom Radford traces his Scottish roots in Canada, the United States, and Scotland. As he discovers his ancestral background, he comes to understand the reasons for the Scottish migration, its role in our country's development, and the importance of music, memory, history, and tradition in the lives of the Scots.
- **Passage from India.** (1997). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8663

This video profiles Begga Singh and other East Indian immigrants who came to Canada around the turn of the 20th century.
- **The Road Chosen: The Story of Lem Wong.** (1997). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8527

This video profiles the life and times of Lem Wong. Only 16 years old on his arrival in Vancouver in 1897, Lem Wong worked his way across Canada as a laundry man and fruit and vegetable seller, finally settling in London, Ontario where he opened Wong's Café in 1914. Interspersed with his story are glimpses of the conditions encountered by Chinese immigrants at the turn of the 20th century.
- **Something from Nothing: The Shumiatcher Saga.** (1997). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8524

Judah and Chasia Schumiatcher came to Canada to escape the Russian pogroms. Their son, Morris, started the Smithbilt Hat Company, which would become known for the white cowboy hats worn at the Calgary Stampede and at the 1988 Winter Olympics. The video focuses on the influences of earlier generations and of Judaic traditions in their lives.
- **Sons and Daughters: The Italians of Schreiber.** (1997). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8655

This video examines the modern ties of an Italian family and community in Schreiber, Ontario. It describes the origins of the Italian population in Schreiber and the close-knit relationships that have developed through the generations.

- **Watari Dori: A Bird of Passage.** (1997). [videocassette]. Series: A Scattering of Seeds: The Creation of Canada. [Canada]: White Pine Pictures, History Channel, Vision TV and Saskatchewan Communications Network. Media Booking #8656

This video profiles Irene Tsuyuki, who was incarcerated at the Japanese internment camp of Tashme in British Columbia during World War II. After repatriating to Japan with her parents, she returned to Canada in 1949 when the restrictions against Japanese Canadians were lifted. She married in 1950 and raised her family of five children and eight grandchildren. She returns to Tashme with a Canadian woman who taught Tsuyuki at the camp to share memories and come to terms with the past.
