

Less-Developed, More-Developed

7.1.3
f

1. Use an atlas to look up each of these countries to learn their location and whether they are more-developed or less-developed.
2. Create a colour code, with one colour for more-developed and one colour for less-developed.
3. Locate and label each country on a world map, and colour code.
4. After checking your answers in a class discussion, record any general trends your group has noticed about the world distribution of more- and less-developed nations.
5. Generate questions your group may have about countries that do not appear on this list.

Afghanistan	France	Niger
Angola	Germany	Norway
