# TECHNICAL-VOCATIONAL EDUCATION MEDIA OVERVIEW

In 2013, Manitoba Education released the document *Technical-Vocational Education Overview* to provide the philosophical and pedagogical underpinnings for curriculum development and the teaching of courses in the Senior Years Technology Education Program. This overview presents educators with the vision and goals of technical-vocational education (TVE) in Manitoba.

Topics include the following:

- curriculum revitalization and renewal
- curriculum framework and implementation
- articulation of programming
- assessment and reporting
- safety
- employability/essential skills and career development
- sustainable development

The TVE curriculum includes Grades 9 to 12 courses in a variety of areas, including interactive digital media.

# INTERACTIVE DIGITAL MEDIA OVERVIEW

## Introduction

*Grades 9 to 12 Interactive Digital Media: Manitoba Technical-Vocational Curriculum Framework of Outcomes* identifies the goals, general learning outcomes (GLOs), and specific learning outcomes (SLOs) for nine interactive digital media courses. This framework is intended for use in all Manitoba schools teaching interactive digital media as part of the Senior Years Technology Education Program.

## Curriculum Description

The high school interactive digital media program provides students with the opportunity to learn the knowledge, skills and attitudes required to develop and produce interactive digital media projects, such as apps, games, websites, virtual worlds, and cross-platform media.

Students will gain knowledge and skills in digital design, asset creation, coding, and project management. Using a project-based approach, they will combine technology and artistic skills to create authentic interactive digital media applications.

Students will be exposed to the professional aspects of making a living in interactive digital media, learning all aspects of the profession, including the entrepreneurial skills to pursue self-employment.

Graduates of the program will be equipped with the knowledge, skills, and attitudes needed to find entry-level employment in the industry. Careers include the following:

- customer support
- quality assurance manager
- web designer
- web developer
- web manager
- social media manager
- advertising and marketing specialist
- app developer
- game developer
- asset developer
- animator
- beta / alpha tester
- computer programmer
- digital artist
- cinematographer

Graduates will also have the opportunity to continue their education in post-secondary institutions.

## Delivery of the Interactive Digital Media Subject Area

To receive a Senior Years Technical Education diploma, a student must complete at least eight departmentally developed courses from an approved technical-vocational cluster, together with 16 compulsory credits and six optional credits.

The grade level in which the courses are offered are a local, school-based decision, but it is highly recommended that the sequencing of credits align with the following schedule.

Cross-curricular learning outcomes from subjects including, but not limited to, English Language Arts, Mathematics, and Science are to be integrated into the authentic activities of the course.

Outcomes dealing with the following topics are also integrated into most courses:

- health and safety
- sustainability
- ethical and legal standards
- employability skills
- the IT industry
- evolution, technological progression, and emerging trends

In the TVE curriculum, the emphasis is on applied activities. For instructional purposes, the sequence of learning outcomes and the outcomes can vary based on the activities within the course. Teachers are advised to select the activities best suited to teach the learning outcomes, based on a variety of factors, including access to resources or regional needs.

The curriculum is not sequential. In other words, learning outcomes might be taught in an order different from how they appear in the document. In light of rapid changes in technology, teachers are encouraged to update their activities in order to meet the needs of students.

## Interactive Digital Media Goals, General Learning Outcomes (GLOs), and Specific Learning Outcomes (SLOs)

*Grades 9 to 12 Interactive Digital Media: Manitoba Technical-Vocational Curriculum Framework of Outcomes* identifies specific learning outcomes (SLOs) for use in all Manitoba schools teaching Grades 9 to 12 Interactive Digital Media as part of the Senior Years Technology Education Program. SLO statements define what students are expected to achieve by the end of a course.

It is essential for students to learn and demonstrate safety practices and employability skills; therefore, some SLOs related to health and safety, as well as to employability skills are repeated in several courses.

Please note that SLOs are not identified for the goals and GLOs that are not addressed in a given course.

---

**Goal 1:** Describe and apply appropriate **health and safety** practices.

**GLO 1.1:** Describe and apply appropriate **health and safety** practices.

---

---

**Goal 2:** Demonstrate the identification, selection, use, and maintenance of **software, hardware, supplies, and equipment**.

**GLO 2.1:** Demonstrate the identification, selection, and use of **software**.

**GLO 2.2:** Demonstrate the identification, selection, use, and maintenance of **hardware**.

**GLO 2.3:** Demonstrate the identification, selection, use, and maintenance of **supplies and equipment**.

---

**Goal 3:** Incorporate **project management** processes throughout the development cycle.

**GLO 3.1: Document** the development process.

**GLO 3.2: Collaborate** with peers, teachers, and clients.

**GLO 3.3: Assess** the project development process.

**GLO 3.4:** Incorporate **quality assurance** processes.

**GLO 3.5: Manage** projects.

---

**Goal 4: Conceptualize** projects.

**GLO 4.1:** Discuss and incorporate interactive digital media development **theory**.

**GLO 4.2:** Explore and research **project ideas, audience, clients, and project requirements**.

**GLO 4.3:** Assess, analyze, and select project **concept**.

---

**Goal 5: Plan** projects.

**GLO 5.1: Determine scope, timeline, and milestones**.

**GLO 5.2:** Develop **linear and non-linear stories, plans, and flowcharts**.

---

**Goal 6: Develop** projects.

**GLO 6.1:** Develop and test **prototypes**.

**GLO 6.2:** Create and incorporate **assets**.

**GLO 6.3:** Use **code** to solve problems.

**GLO 6.4:** Evaluate and incorporate **security features**.

---

---

**Goal 7: Publish, release or present, and assess** projects.

**GLO 7.1: Publish, release or present, and assess** projects.

---

**Goal 8:** Describe and demonstrate the transferable **cross-curricular** knowledge and skills relevant to the interactive digital media industry.

**GLO 8.1: Read, interpret, and communicate** information.

**GLO 8.2:** Apply the knowledge and skills from **other subject areas** (mathematics, science, art, business education) relevant to interactive digital media design.

---

**Goal 9:** Demonstrate awareness of **sustainability** as it pertains to interactive digital media development.

**GLO 9.1:** Describe the interactive digital media design industry's **sustainability practices** and impact on the environment.

**GLO 9.2:** Describe the impact of **human sustainability** on the well-being of those employed in interactive digital media design and the users of their services.

**GLO 9.3:** Describe **sustainable business practices** within the interactive digital media design industry.

---

**Goal 10:** Demonstrate awareness of the **ethical and legal standards** as they pertain to interactive digital media design.

**GLO 10.1:** Demonstrate awareness of the **ethical and legal standards** as they pertain to interactive digital media design.

---

---

**Goal 11:** Demonstrate **employability skills**.

**GLO 11.1:** Demonstrate **fundamental employability skills**.

**GLO 11.2:** Demonstrate awareness of **cultural proficiency** and its importance in the workplace.

**GLO 11.3:** Demonstrate understanding of the **business operation** of an interactive digital media design organization.

**GLO 11.4:** Demonstrate **critical thinking skills**.

---

**Goal 12:** Demonstrate understanding of the **interactive digital media industry**.

**GLO 12.1:** Demonstrate understanding of the **scope** of the interactive digital media industry.

**GLO 12.2:** Demonstrate understanding of the **educational and career opportunities**, as well as **industry and professional associations**.

**GLO 12.3:** Demonstrate understanding of **working conditions** in interactive digital media.

---

**Goal 13:** Demonstrate awareness of the **evolution, technological progression, and emerging trends** in interactive digital media.

**GLO 13.1:** Describe the **history, technological progression, and emerging trends** in interactive digital media.

## Course Descriptions

Course titles, descriptions, and codes for the nine interactive digital media courses follow. For an explanation of the codes, refer to the [Subject Table Handbook: Technology Education: Student Records System and Professional School Personnel System](#) (Manitoba Education and Training).

9093 Exploration of Interactive Digital Media  
15S/15E/15M  
10S/10E/10M

This optional course is designed for students to explore interactive digital media. Students will learn the basic steps in creating digital assets and in coding.

9094 Introduction to Interactive Digital Media  
20S/20E/20M

This course is designed for students interested in interactive digital media. They will learn to conceptualize, plan, develop, and publish an interactive digital media project. Projects involve an introduction to asset development and coding.

9095 Interactive Digital Media Design  
30S/30E/30M

In this course, students will learn about the design principles required to complete an interactive digital media project, integrating artistic and technical theory and skills.

9096 Interactive Digital Asset Creation  
30S/30E/30M

This course focuses on the creation of original assets to support interactive digital media projects by using a variety of software. Examples of assets include vector images, rasterized images, 2-D animations, 3-D models, sound effects, and rigging.

9097 Coding for Interactive Digital Media  
30S/30E/30M

This course focuses on the creation of interactive components of projects by using basic coding. Students will learn programming theory, and how to incorporate it into interactive digital media projects.

9098 Advanced Interactive Digital Asset Creation  
40S/40E/40M

This course builds on the skills and knowledge learned in 9096 Interactive Digital Asset Creation. Students will learn the skills related to creating advanced features of dynamic asset creation, and to applying code to assets.

9099 Advanced Coding for Interactive Digital Media  
40S/40E/40M

This course builds on the skills and knowledge learned in 9097 Coding for Interactive Digital Media. Students will learn to code in more than one language, focusing on advanced programming theory and techniques.

9100 Project Management for  
Interactive Digital Media 40S/40E/40M

In this course, students will collaborate with others as they apply the knowledge and skills learned in previous courses in order to create, manage, and release an authentic interactive digital media project.

9101 Futures in Interactive  
Digital Media 40S/40E/40M

In this course, students will synthesize and apply skills and knowledge learned in previous courses to create their own portfolio site to prepare them for either self-employment, entry-level employment, or post-secondary opportunities in interactive digital media.

## Curriculum Implementation Dates

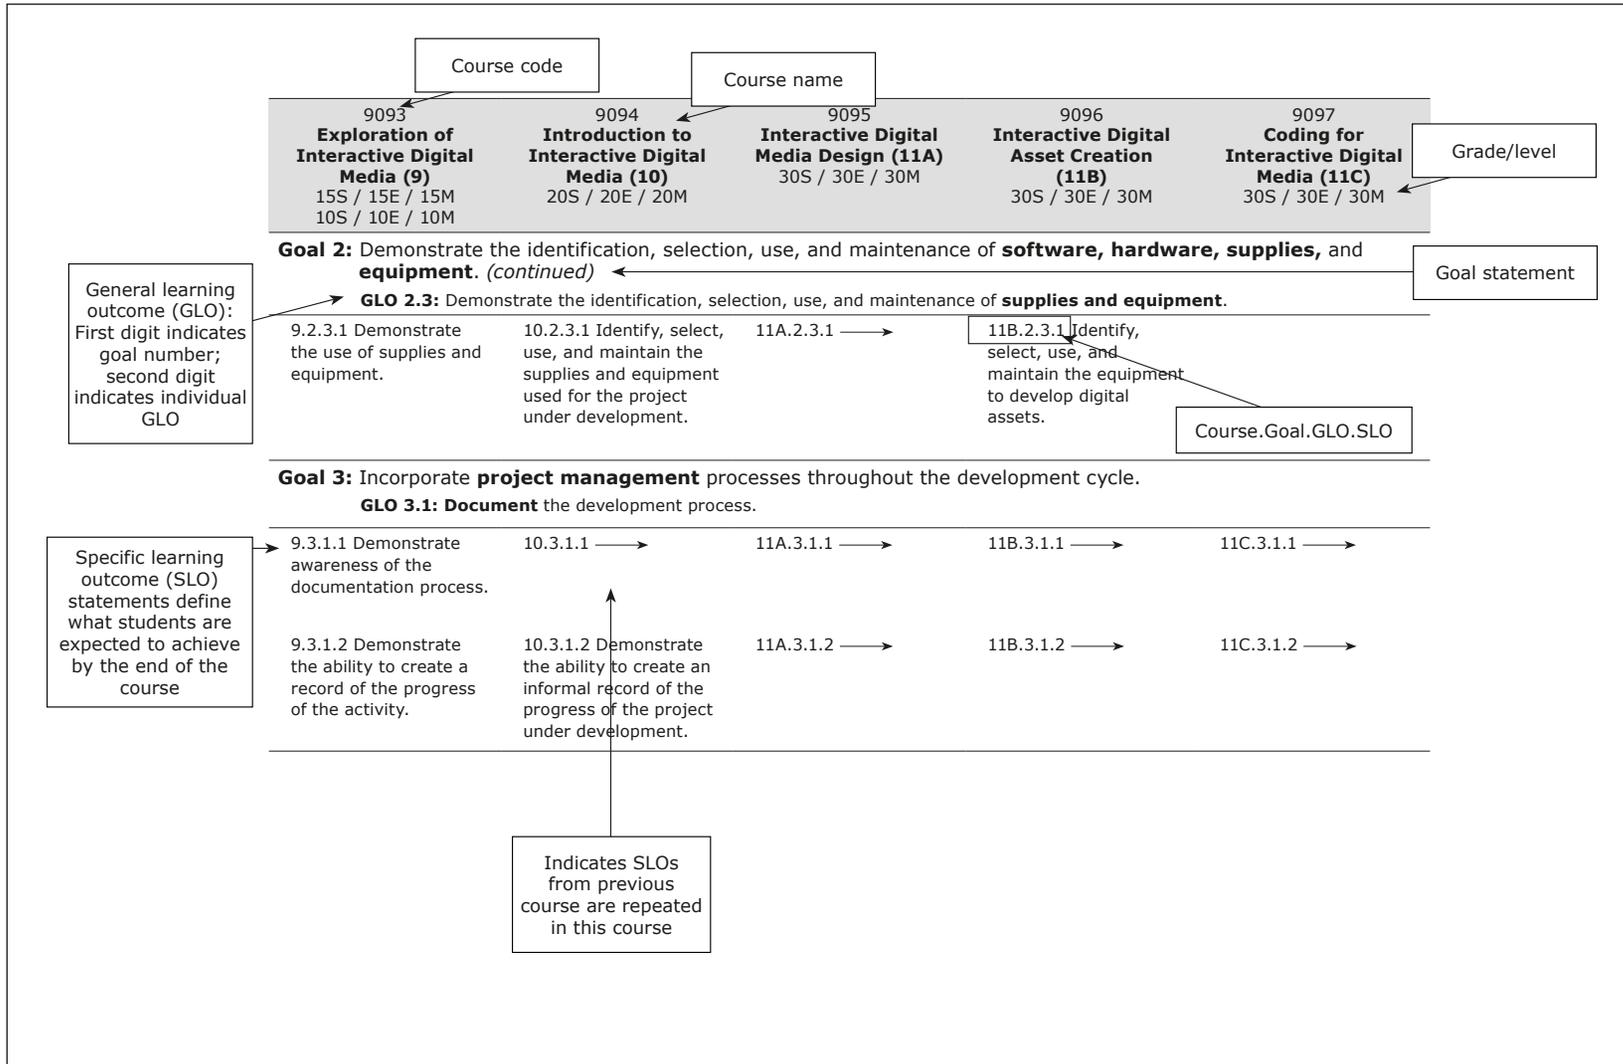

During **voluntary implementation**, teachers have the option of teaching the entire new draft curriculum as soon as Manitoba Education and Training releases it on the [Technology Education](#) website. They also have the option of teaching the courses from the previous curriculum. Teachers who implement courses before system-wide implementation need to ensure that students who are already taking courses from the previous curriculum achieve all SLOs with a minimum of redundancy.

Voluntary implementation of all interactive digital media courses began in the fall of 2015 and will continue until their respective system-wide implementation dates.

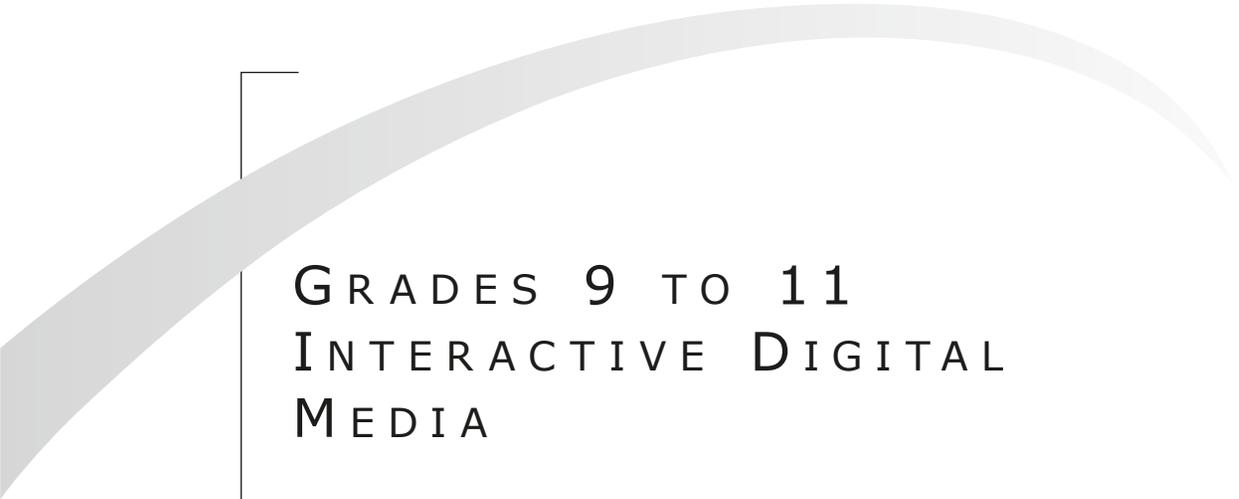

Date	System-Wide Implementation
Fall 2016	Grade 9 (optional)
Fall 2017	Grade 10
Fall 2018	Grade 11
Fall 2019	Grade 12

Under **system-wide implementation**, all teachers in Manitoba teach the new curriculum and use the new course codes. Teachers will no longer be able to use the previous course codes. Course codes are found in the [Subject Table Handbook: Technology Education](#).
