

# Addition Race

# Addition Race

- Material:** Game board  
Number cube  
Symbol cube  
Different coloured counter for each player
- Players:** Two or three
- Rules:** The first player rolls the cubes to start a number sentence. For example, if the player rolls "3" and "one more than" then the number of spaces to move must be "4". If the cubes read "5" and "less than", then the number of spaces to move can be anything less than 5. A player must have the exact number in order to finish. For example if a player needs a 2 to finish but rolls a "2" and "more than" then she misses a turn and play passes to the next player.
- Note:** Have students say a number sentence with each roll of the cubes. Example "One more than 3 is 4" or "2 is less than 5."
