

Large and Small Numbers

Material : A set of playing cards without 10s, jacks, queens, and kings.
Aces are worth 1 and jokers 0
OR
4 sets of digits cards (0 to 9)

Players : Two to four

Rules : Deal 6 cards to each player. The players place their cards face up on the table. The object of the game is to make the smallest 3-digit number and the largest 3-digit number possible with the cards they have. For example, with the cards below, possible numbers are:

883
Largest

122
smallest

The player in the group who makes the largest number gets a point, as does the player who makes the smallest number. The first player who gets 8 points wins the game.

Note to parents :

When you play *Largest and Smallest Numbers* with your child, encourage him to read the numbers aloud.
