

# NUMBER SCRABBLE

- Material:** One 1 to 100 chart  
One set of numbers 1 to 100
- Players:** Group of two to four
- Rules:** Each player picks up 7 numbers and places them in front of him or herself so that they are not visible to the other players. Each player in turn places a number anywhere on the chart. In the next, and all other rounds, the number must be placed beside, above, or below one of the numbers already on the board. If the player cannot place a number then another must be drawn from the pile and play passes to the next player.  
The first player to put all of his or her numbers on the board is the winner.
