

# USING HAND SANITIZER

Hand sanitizer must be alcohol-based to be effective.

1

Use alcohol-based hand sanitizer when soap and water are NOT available.

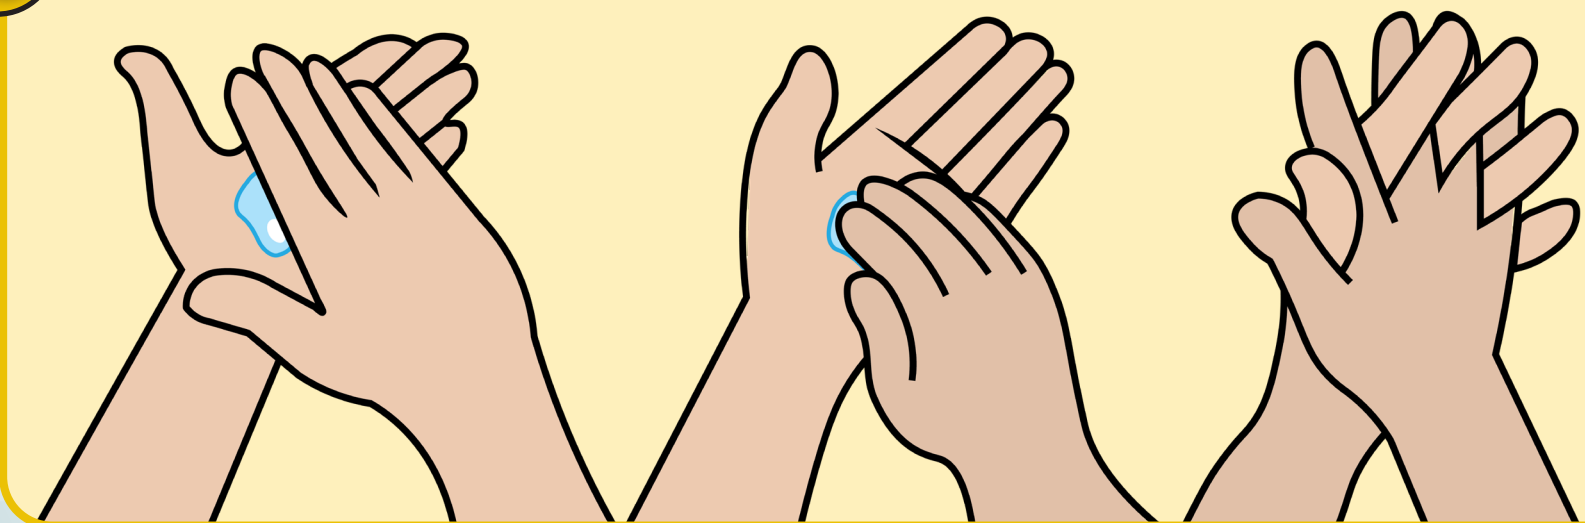

If hands are visibly dirty, wash with soap and water. (Follow handwashing procedure.)

2

Take a small amount of alcohol-based hand sanitizer (about the size of a nickel).

3

Rub it on your fingertips, both sides of your hands and between your fingers. Continue to rub until your hands are dry.

**Warning:** The product is flammable when wet so ensure your hands are dry before performing another task.
