

Touchez, touchez, devinez!

Learning situation: To review fruits and vegetables using the linguistic structure, **C'est...**

Teacher modelling and oral interaction:

- In preparation for this learning situation, the teacher can use a bag containing several fruits and/or vegetables (plastic or real). The teacher hides one fruit or vegetable in a small bag.
- First, the teacher models the game by showing the students the bag and says, **Touchez, touchez, devinez!** He puts his hand into the bag and says, **C'est une pomme.** The teacher may wish to model the answer with a colour. **C'est une pomme verte.**
- Next, the students close their eyes and the teacher hides a different fruit or vegetable in the bag and says, **Touchez, touchez, devinez!** to a few students. The students then take turns guessing what the teacher has hidden in the bag.
- Some students may be ready to lead the game.
