

## Les meubles dans une maison

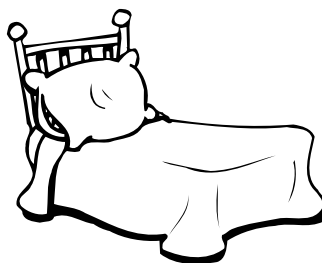

**Learning situation:** To review the different rooms in a house using the linguistic structure, *Dans ma maison/mon appartement il y a...* and different items found in a home.

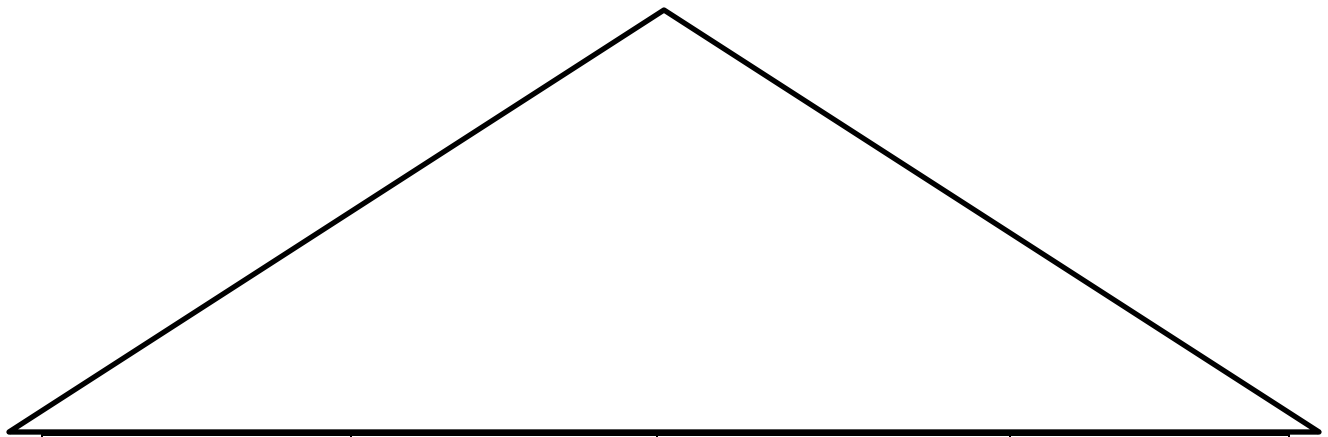

### Teacher modelling and oral interaction:

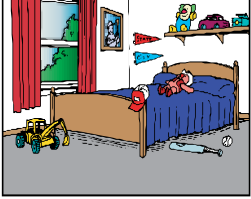

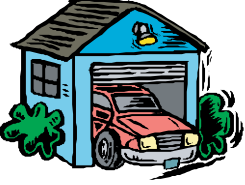

**NOTE:** This learning situation may take several lessons to complete.

- In preparation for this lesson, the teacher projects a visual of a house. There is an example on the next page (this can become a mini word wall). He begins by modelling and pointing to a particular room. **Voici la chambre à coucher. Dans la chambre à coucher il y a un lit. Qu'est-ce qu'il y a dans la chambre à coucher?** The teacher guides the student to chime in, **Dans la chambre à coucher il y a... un lit.**
- The teacher continues to model other examples, **Voici la cuisine. Dans la cuisine il y a une table. Qu'est-ce qu'il y a dans la cuisine? Voici le garage. Dans le garage il y a une auto. Qu'est-ce qu'il y a dans le garage?**
- For a subsequent lesson, the teacher enlarges the visual and provides students with small pictures of the items found in the house. Before asking the students to work in groups, the teacher models the activity with a few students. One student chooses an item and places it in the correct room and says, **Dans la cuisine il y a une table.**
- To extend students' learning, the teacher and class can prepare the game board for the *Jeu du Serpentin* (See [Framework](#) pages 63 and 65).

**NOTE:** The teacher knows his students best and he will decide if he wishes to introduce different types of items/furniture found in the house. There are several books suggested in the resource list that will support this language learning such as *Dans ma chambre*, Collection Lire-tôt or *Viens voir*, Collection Mes premiers petits livres. The teacher can begin modelling reading strategies.
